The first known geared clock was invented by the great mathematician, physicist and engineer Archimedes during the 3rd century BC. Archimedes created his astronomical clock that was also a cuckoo clock with birds singing and moving every hour.

Clock - Wikipedia

The mechanical clock was invented in the Middle Ages. Who made the first one and when is not known but it was around the end of the 13th century. In 1309 a clock is recorded in a church in Italy. The oldest working clock in the world is in Salisbury Cathedral.

A History of Clocks - Local Histories

The history of clocks is very long, and there have been many different types of clocks over the centuries. Not all historians agree on the history of the clock. The word clock was first used in the 14th century (about 700 years ago). It comes from the word for bell in Latin ("clocca").

The History of the Clock - UKEssays.com

The origins of our 24 hour day can be traced back at least 4000 years, to ancient Egypt and Babylon, and perhaps further back in time. The Egyptians and Babylonians divided the parade of stars that appeared in the sky each night into 12 sections, marked by the various stars that rose and set that night.

History | 24hourtime.info

At times, the book also felt disjointed, jumping around from one time period to the next and then back again. That made it hard to keep track of the chronology, somewhat ironic in a book about the "history of the hour." (Unless the entire book is supposed to be a parable of the clock's/the hour's development, in which case it goes over my head.)

History of the Hour: Clocks and Modern Temporal Orders ...

In the UK the clocks go forward 1 hour at 1am on the last Sunday in March, and back 1 hour at 2am on the last Sunday in October. The period when the clocks are 1 hour ahead is called British ...

When do the clocks change? - GOV.UK

The origin of the hourglass is unclear. Its predecessor the clepsydra, or water clock, is known to have existed in Babylon and Egypt as early as the 16th century BCE.

Hourglass - Wikipedia

Twice a year, in March and November, clocks around the world move forward or backward by an hour at 2 a.m. for Daylight Saving Time. The system reduces electricity usage by extending daylight ...
