A modern forbidden romance wrapped in the glamorous and exclusive world of K-pop, XOXO is perfect for fans of Jenny Han and Maurene Goo. Finding the dreamy stranger who swept you off your feet in your homeroom is one thing, but Jaewoo isn't just any student. Turns out, Jaewoo is a member of one of the biggest K-pop bands in the world. And like most K-pop idols, Jaewoo is strictly forbidden from dating anyone. *Exposure to loud noise continues to be the largest cause of hearing loss in the adult population. The problem of NIHL impacts a number of disciplines. US standards for permissible noise exposure were originally published in 1968 and remain largely unchanged today. Indeed, permissible noise exposure for US personnel is significantly greater than that allowed in numerous other countries, including for example, Canada, China, Brazil, Mexico, and the European Union. However, there have been a number of discoveries and advances that have increased our understanding of the mechanisms of NIHL. These advances have the potential to impact how NIHL can be prevented and how our noise standards can be made more appropriate.*

*Digital Media: Human-Technology Connection examines what it is like to be alive in today's technologically textured world and showcases specific digital media technologies that makes this kind of world possible. So much of human experience occurs through digital media that it is time to pause and consider the process and proliferation of digital consumption and humanity's role in it through an interdisciplinary array of sources from philosophy, media studies, film studies, media ecology and philosophy of*

*technology. When placed in the interpretive lens of artifact, instrument, and tool, digital media can be studied in a uniquely different way, as a kind of technology that pushes the boundaries on production, distribution and communication and alters the way humans and technology connect with each other and the world. The book is divided into two sections to provide overarching definitions and case study specifics. Section one, Raw Materials, examines pertinent concepts like digital media, philosophy of technology, phenomenology and postphenomenology by author Stacey O Irwin. In Section Two, Feeling the Weave, Irwin uses conversations with digital media users and other written materials along with the postphenomenological framework to explore nine empirical cases that focus on deep analysis of screens, sound, photo manipulation, data-mining, aggregate news and self-tracking. Postphenomenological concepts like multistability, variational theory, microperception, macroperception, embodiment, technological mediation, and culture figure prominently in the investigation. The aim of the book is to recognize that digital media technologies and the content it creates and proliferates are not neutral. They texture the world in multiple and varied ways that transform human abilities, augment experience and pattern the world in significant and comprehensive ways.*

This book takes a look at the shocking war being waged over your CD collection, a struggle that will determine who controls popular music - and to a large extent, popular culture - in the coming years. It's a battle of multinational corporate giants versus Internet entrepreneurs working out of their bedrooms, challenging the fat cats who have built fortunes on the bones of underpaid musicians. It's also a war for the hearts and minds of a new generation and a culture that doesn't feel the need to hold a plastic disc in its hands to enjoy music.
