The impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous two years. It is denoted as a ratio between citations and recent citable items published. You can either refer to the Journal Citation Reports (JCR) or the Scopus® database to find the impact factor of the journal.

Find Impact Factor of Journal Online | Impact Factor ...

Impact factors of course increase considerably, if in a given scientific field many journals are listed. Furthermore reviews are more often cited than original articles. This can be seen in the list of the top 20 journals (out of 35) in the field of Parasitology (obtained in 2013):
