

Instructions For Completing The Certificate Of Surrender

This first major review of the industry's standard contract for 18 years has left its basic principles unaltered but extra clarity has been introduced throughout by careful consideration of current practice and judicious rewording.

Conditions of Contract and Forms of Tender, Agreement and Bond for Use in Connection with Works of Civil Engineering Construction

The ICE Design and Construct Conditions of Contract were originally published 10 years ago, this new edition updates the original contract with changes necessitated by new or amended legislation. As well as several substantial changes and numerous minor ones the contract has been carefully edited to improve its clarity and usability. ICE Design and Construct Conditions of Contract: 2nd edition is not a variant of the Measurement Version but an entirely separate set of conditions based on very different premises. ICE Design and Construct Conditions of Contract: 2nd edition radically departs from the normal ICE Conditions of Contract concept by making the Contractor responsible for all aspects of design and construction, including any design originally provided by or on behalf of the Employer. The Form of Tender provides for payment on a lump sum basis but other forms of payment may be used. This new edition of the Contract has been updated to include the benefits of team working and current procurement initiatives. If the procedures are followed, the parties to the Contract will be provided with an 'early warning' of circumstances that may give rise to additional costs or delay in completion of the Contract. The Contract has been revised and updated to deal with the following legislation: The Construction (Design and Management) Regulations 1994 The Housing Grants, Construction and Regeneration Act 1996 The Finance Act 1996 and the Landfill Tax Regulations 1996 The Contracts (Rights of third parties) Act 1999 The New Roads and Street Works Act 1991

We are pleased to provide you with this Missouri Notary Public Handbook. We appreciate the responsibility that comes with being a notary in the State of Missouri, and know the work you do as a notary instills additional confidence in the documents that are vital to our state and economy. This handbook is provided in print and online to more than 60,000 notaries across the state, each of whom takes acknowledgements, administers oaths and affirmations, and certifies that copies of documents are true copies. The powers and responsibilities of a notary are described in the Missouri Revised Statutes Chapter 486. The provisions of this statute are included in this handbook for your convenience. In addition to the statutes, this resource provides general information related to your role as a notary, a glossary of important terms and copies of key application forms to assist you in the administration of your notary duties.

Issues in Testing Business English

This book provides a comprehensive commentary and guidance to readers on the current edition (1999 Edition) of General Conditions of Contract for Civil Engineering Works (the

"General Conditions"), which the Hong Kong Government uses for all its civil engineering contracts. The book describes 46 out of 90 clauses in the General Conditions and their practical application, with explanations in plain and simple language under such headings as Commentary, Analysis and Application. The listing of equivalent clauses of the more user-friendly English ICE Conditions and the international FIDIC Conditions together enables the readers to understand the meaning of the General Conditions from a different context. For those readers who find it easier to read in Chinese, the translation will help them to compare with and understand the original English text. The book is therefore useful to students, consulting engineers, surveyors and lawyers who want to understand more about the Hong Kong construction practice.

Demand is steadily growing for language tests with a specialized focus which will suit the needs of key professional domains as diverse as business, law, the airline industry, and teacher education. This book explores the testing of language for sepcific purposes (LSP) from a theoretical and a practical perspective, with a particular focus on the testing of English for business purposes. A range of tests - both past and present - is reviewed, and the development of business English testing at Cambridge ESOL is discussed. The description of the revision of the Business English Certificates (BEC) forms a major part of the book and offers a unique insight into an approach to large-scale ESP test development and revision.
