*Integrated Management Systems: QMS, EMS, OHSMS, FSMS –*

*An integrated management system is a single system designed to manage multiple aspects of an organization’s operations in line with multiple standards, such as those for quality, environmental and health and safety management. The common structure has been introduced in the latest ISO 9001, ISO 14001 and ISO 45001 standards.*

*Integrated Management System (IMS) for QMS, EMS and OHSAS –*

*Many standards are becoming a requirement for doing business. For example, ISO 9001 is a quality management system (QMS) standard with industry-specific versions such as IATF 16949 for automotive, ISO 13485 for medical devices, and AS9100 for the aerospace industry. ISO 14001 is an environmental management system (EMS) standard, and ISO 45001, an occupational health and safety management system (OHSMS) standard.*

*Integrating and Standardizing QMS, EMS, and OHSMS –*

*You have your ISO 9001 QMS and ISO 14001 EMS in place and now have the objective of integrating the ISO 45001 OHS&S in one integrated management system. The good news is that since you are familiar with formal management systems, this initiative will be relatively straightforward.*

*ISO 45001:2018 After ISO 9001:2015 QMS + ISO 14001:2015 EMS*

*A quality management system (QMS) is a set of policies, processes and procedures required for planning and execution (production, development, service) in the core business area of an organization, (i.e. areas that can impact the organization’s ability to meet customer requirements). ISO 9001:2015 is an example of a Quality Management System.*

*What is an Integrated Management System? | Integrated –*

*Integrate a common set of procedures using an IMS Understand the requirements of a quality management system (QMS), environmental management system (EMS) and occupational health and safety (OH&S) management system using the ISO framework and plan-do-check-act (PDCA) cycle Incorporate the standards into your organization*

*ISO 9001, ISO 14001 and ISO 45001 Integrated Management –*

*The best solution for this is to take them both on in one fell swoop, in the form of an integrated management system. This checklist is designed to help you integrate your existing EMS and QMS policies and procedures, and consolidate two separate manuals into one.*

*ISO 9001 and ISO 14001 Integrated Management System (IMS) –*

*An integrated management system (IMS) combines all related components of a business into one system for easier management and operations. Quality (QMS), Environmental (EMS), Energy (EnMS) and Safety (OHSMS) management systems are often combined and managed as an IMS. Examples of existing processes can include: Quality Management Systems (QMS) ISO 9001*

*Combine Existing Quality, Health – Integrated Standards*

*Environmental and Quality Manual Integrated Management System . ISO 9001:2015 . ISO 14001:2015. Electro Industries/Gauge Tech . 1800 Shames Drive, Westbury, NY 11590*

*Environmental and Quality Manual*

*Organizations today are implementing stand-alone systems for their Quality Management Systems (ISO 9001, ISO/TS 16949, or AS9100), Environmental Management System (ISO 14001), Occupational Health & Safety (ISO 18001), and Food Safety Management Systems (FSSC 22000). Stand-alone systems refer to the use of isolated document management structures resulting in the duplication of processes within one site for each of the management standards—QMS, EMS, OHSAS, and FSMS.*

*Integrated Management Systems | ASQ*

*Those organizations with a QMS, EMS, and HSMS could triple the auditing resources – including time, utilized over that of a single system. For the commonly used 2-3 auditors per system, 6-9 auditors may be necessary for those with a QMS, EMS, and HSMS.*

*Auditing Multiple and Integrated Management Systems: Part –*

*Environmental management systems are designed to comply with Danish environmental regulations and ISO 14001, and safety management systems are designed to comply with Arbejdstilsynets bekendtgørelse Nr. 87 (Danish Working Environment Authority, Executive Order AT-bek. 1191:2013) and OHSAS 18001 / ISO 45001.
