That first step is often referred to as the survey introduction and it's your best shot at persuading a potential respondent to set a few minutes aside for completing your survey. Unlike online quizzes, where a compelling quiz title is your best chance of getting the potential takers to pay attention, with surveys it all depends on your survey introduction.

NOAA provides technical assistance to coastal management professionals addressing complex human-based problems. This publication, “Introduction to Survey Design and Delivery,” is the first in a series of guides developed to bring information to this audience about the use of social science tools in their field of work.

~~Introduction to Survey Design & Delivery~~

Survey sampling is the process of selecting a probability-based sample from a finite population according to a sample design. You then collect data from these selected units and use them to estimate characteristics of the entire population.
