An autobiography of an Indian police officer and former director of Central Bureau of Investigation.

Although relatively young in terms of its lifespan as a regulator, the Competition Commission of India (established by the Competition Act of 2002 but came into existence in 2009) has been extremely assertive in its enforcement outlook, and competition law in India continues to grow in importance as inward investment increases. This comprehensive, practical guide outlines the highly distinctive manner in which competition law is interpreted in this major global market. Highlighting differences from EU practice, the author – a leading Indian competition law practitioner – describes elements of practice and procedures in Indian competition law encompassing the following: • the dual regulatory-judicial nature of the Competition Commission; • investigatory powers of the Commission’s Director General; • mandated business conduct policies (e.g. active risk management procedures); • availability of sanctions, remedies, and private actions; • cartels and leniency programmes; • extraterritorial application of the Competition Commission; • merger review. • pricing and non-pricing abuse; • international coordination; • appeal process; • fines – companies, directors and officers; • fines for non-cooperation or furnishing false information; and • liability of state-owned enterprises. Analysis of numerous leading cases decided by the Indian competition authorities enhances the book’s practical value. This comprehensive guide provides an incomparable overview of practice in a key jurisdiction that is poised to become increasingly important in the international recognition and enforcement of competition law. As a guide to the ‘landscape’ of competition law in India, it has no peers. The book will be of inestimable value to professionals in this area of legal practice, whether in law firms, corporations, academia, government or the judiciary, as well as to investors, economists and business executives.

"Man versus Society in Medieval Islam" brings together all the monographs and articles by Franz Rosenthal (1914-2003) in which he investigates the tensions and conflicts that existed between individuals and society as the focus of his study of Muslim social history.

Sixteen thousand people gather in the shadows of Battersea Power Station for the Shine Walk, a marathon trek around London in aid of Cancer Research. Among them is Ben, taking the place of his free-spirited girlfriend, Summer, who has recently lost her battle with cancer.

Haunted by guilt, the Shine Walk is one last thing he must do for her. But what starts out as a wretched evening for Ben develops into a journey of redemption after he meets the seemingly unremarkable Annie. When Ben first met Summer, she inspired him to start his scrapbook of tales from London’s past. Now, as he walks, Ben recounts extracts from his scrapbook and, encouraged by Annie, slowly finds the courage to tell the story of his relationship with Summer – a relationship inextricably linked to locations they pass, including Battersea Park and its little, brown dog statue, and the Natural History Museum, home of the cursed Deadly Purple Sapphire. But it is only when they reach Tower Bridge that Ben finally reveals Summer’s deepest secrets – secrets that drove Ben and Summer apart. A Scrapbook for Summer is a beautifully told tale of love and loss interwoven with wonderful stories from London’s rich history – a truly original book that will capture both your head and your heart in equal measure. Inspired by novels such as One Day by David Nichols and The Time Traveler’s Wife by Audrey Niffenegger, A Scrapbook for Summer will appeal to fans of romance and historical fiction alike.

An English/Irish language booklet, teaching beginners how to speak Irish Gaelic using only 35 words. Created by Peter and Helena Roberts, this booklet explains the same 35 keywords needed to get by for the absolute beginner in any language, including: ÓI want somethingÓ, ÓI want to buy somethingÓ, ÓI need to find somewhereÓ, or just, ÓThank youÓ. This book not only teaches this core vocabulary but shows how it fits together to create useful grammatical phrases. Despite the apparent simplicity of the concept, the authors spent time in many countries, travelling through the cities and countryside, ensuring that these simple phrases were all that was needed for people to learn, use, and have a great holiday.

Kleever Kaff, Cath la fut ée, c’est le surnom donn é depuis son enfance à la cantatrice anglaise Kathleen Ferrier, qui connut une carri ère fulgurante et un destin tragique. N é e en 1912 dans une famille modeste du nord de l’Angleterre, elle quitte t ôt l’é cole, travaille au service t é lé phonique de Blackburn, se marie. Le dimanche, elle chante à l’ église, mais elle ne prendra aucune le çon de musique avant 1939. Tout bascule avec la guerre son mari mobilis é. Kathleen Ferrier est libre de se produire sur de petites sc ènes. Elle est tr ès vite remarqu ée et commence à encha îner les tourn ées, en Angleterre d’abord, puis dans le monde entier. Les plus grands chefs, Karajan, Bruno Walter sont s éduits par l’ é motion unique qui se d égage de son chant, le public est en pleurs chaque fois qu’elle interpr ète Le Chant de la terre de Malher. Sa popularit é touche toutes les couches de la soci é t é gr à ce à ses enregistrements de chansons traditionnelles anglaises. Au fa îte de sa gloire, elle est atteinte d’un cancer pr é matur é ment. Si sa vie r éunit tous les é l éments d’un parfait m élodrame, sa personnalit é é tait aux antipodes. Gaie, blagueuse, d’une simplicit é d é sarmante, volontiers grivoise (" J’aimerais être une garçe fascinante, je ne serais jamais pauvre, toujours riche ", écrivit-elle un jour), elle n’a rien de la diva traditionnelle. Dans ce petit livre inspir é par l’admiration, Ian Jack fait revivre cette figure hors du commun, s’appuyant sur des t émoignages, des anecdotes et sur de nombreuses lettres intimes où s’exprime toute sa fantaisie.

This book covers mathematical foundations and methods for the computerized analysis of shapes, providing the requisite background in geometry and functional analysis and introducing various algorithms and approaches to shape modeling, with a special focus on the interesting connections between shapes and their transformations by diffeomorphisms. A direct application is to computational anatomy, for which techniques such as large deformation diffeomorphic metric mapping and metamorphosis, among others, are presented. The appendices detail a series of classical topics (Hilbert spaces, differential equations, Riemannian manifolds, optimal control). The intended audience is applied mathematicians and mathematically inclined engineers interested in the topic of shape analysis and its possible applications in computer vision or medical imaging. The first part can be used for an advanced undergraduate course on differential geometry with a focus on applications while the later chapters are suitable for a graduate course on shape analysis through the action of diffeomorphisms. Several significant additions appear in the 2nd edition, most notably a new chapter on shape datasets, and a discussion of optimal control theory in an infinite-dimensional framework, which is then used to enrich the presentation of

diffeomorphic matching.

A brand-new kung-fu epic from James Stokoe, the creator behind Orc Stain and Aliens: Dead Orbit! Spurred on by her master’s dying words, the adopted warrior “Orphan Mo” seeks to find and kill five former disciples who now threaten the land with corruption from their demonic powers. Part Five Deadly Venoms and part

surreal grindhouse, James Stokoe brings his knack for ultra-detailed fantasy imagery and over-the-top violence to this classic tale of revenge. “His artwork is astonishingly detailed, with an infectious, monstrous energy and dynamism that needs to be experienced by every fan of comic books.”–Syfy Wire

This compendium provides a self-contained introduction to mathematical analysis in the field of machine learning and data mining. The mathematical analysis component of the typical mathematical curriculum for computer science students omits these very important ideas and techniques which are indispensable for approaching specialized area of machine learning centered around optimization such as support vector machines, neural networks, various types of regression, feature selection, and clustering. The book is of special interest to researchers and graduate students who will benefit from these application areas discussed

in the book

Motive and Meaning in Medieval Sunn? Fiqh

This volume presents twenty-six uncollected philosophical essays by Jonathan Barnes, one of the most admired and influential philosophers of his generation. Newly revised, augmented, and improved, the essays span four decades of his career and include many rare and relatively unknown works on ancient philosophical topics. Several essays are now translated from the original French and made available in English for the first time. Barnes explores a range of topicsincluding the interpretation of ancient philosophy, the methods of the ancient philosophers, the Stoic notion of eternal recurrence, and Platonic ontology. This invigorating body of scholarship will bevalued by all students and scholars of ancient philosophy.

Music and Traditions of the Arabian Peninsula provides a pioneering overview of folk and traditional urban music, along with dance and rituals, of Saudi Arabia and the Upper Gulf States of Kuwait, Bahrain, and Qatar. The nineteen chapters introduce variegated regions and subcultures and their rich and dynamic musical arts, many of which heretofore have been unknown beyond local communities. The book contains insightful descriptions of genres, instruments, poetry, and performance practices of the desert heartland (Najd), the Arabian/Persian Gulf shores, the great western cities including Makkah and Medinah, the southwestern mountains, and the hot Red Sea coast. Musical customs of distinctive groups such as Bedouin, seafarers, and regional women are explored. The book is packaged with an audio CD and almost 200 images including a full color photo essay, numerous music transcriptions, a glossary with over 400 specialized terms, and original Arabic script alongside key words to assist with further research. This book provides a much-needed introduction and

organizational structure for the diverse and complex musical arts of the region.
