Lanxess Heat Transfer Fluids Diphyl

10 LANXESS Heat Transfer Fluids, Leverkusen 2017 LANXESS Heat Transfer Fluids Experience & Knowledge Bayer patented Diphyl (DP / DPO eutectic) in 1929 German

technology & production facilities Comprehensive knowledge on the technical design of such installations Worldwide network of customers and research companies (> 200 plants)

LANXESS Heat Transfer Fluids Diphyl

Category: Heat Transfer Fluids Lanxess Diphyl® is a high temperature HTF for the application in liquid and vapour phase. High-boiling, low to medium viscous heat carrier with high thermal stability for heating and cooling as a liquid or in vapour phase in an inert gas atmosphere.

DIPHYL - Heat Transfer Fluid | MABAYCO

LANXESS' organic heat transfer fluids are characterized by their high thermal stability. They can be used across a broad spectrum of temperatures. Diphyl®* +13°C to +400°C
Diphyl® KT -45°C to +350°C Diphyl® THT 0°C to +345°C Diphyl® DT -30°C to +330°C

DIPHYL - Heat Transfer Fluid | MABAYCO LANXESS' organic heat transfer fluids are characterized by their high thermal stability. They can be used across a broad spectrum of temperatures. Diphyl®* +13°C to +400°C. Diphyl® KT -45°C to +350°C. Diphyl® THT 0°C to +345°C. Diphyl® DT -30°C to +330°C.

Lanxess Heat Transfer Fluids Diphyl Aii Home

Under these conditions, the LANXESS Diphyl range proves its worth - more than 85 years after being first put on the market. Thanks to its unique thermal stability and longevity, the heat transfer fluid Diphyl is also known as the Grande Dame of heat transfer fluids.

Consistent performance over thousands of hours of operation

When it gets hot, it's time for Diphyl - LANXESS Webmagazine

The heat transfer fluid Diphyl can be heated up to 400°C retaining its properties over thousands of hours. Read more about this in this press release on our corporate website Do you know that LANXESS also plays an important role in these areas?

Diphyl - LANXESS Webmagazine

Diphyl® Heat Transfer Fluids from LANXESS and their application ranges Diphyl THT (0 -

345°C) Diphyl KT (-45 - 345°C) Diphyl DT (-30 - 330°C) Diphyl (13 - 400°C) Liquid phase, pressureless Liquid phase, pressurised Vapour phase Partially hydrogenated terphenyls for pressureless applications Benzyl toluenes for combined

QUALITY HEATS.

LANXESS' core business comprises the development, manufacture and sale of plastics, specialty chemicals and intermediates. On the following pages you can find a lot of information about the LANXESS product range.

DIPHYL® - Lanxess

5 LANXESS Heat Transfer Fluids, Leverkusen 2017 LANXESS Heat Transfer Fluids DPO/DP (Diphyl ®) - Preferred for Parabolic Trough CSP Salt melts Aromatics HTF components Potassium/sodium nitrate Chemical structure / basic products Modified polydimethylsiloxane Application Range +12 to +400°C approved standard for PT Diphenyl oxide (DPO) Diphenyl (DP)

LANXESS Heat Transfer Fluids for Concentrated Solar Power ...

Under these conditions, the LANXESS Diphyl products prove their worth, as they have been doing since 1929. At temperatures exceeding 340° Celsius, the product is even

unique. Thanks to its outstanding thermal stability and longevity, Diphyl is known as the “Grande Dame” of heat transfer fluids.

Stability and tradition in heat transfer - LANXESS Webmagazine

DIPHYL® - LANXESS

LANXESS Distribution GmbH, sales and distribution partner of the LANXESS Group for chemical intermediate products and specialties, presents itself to the process industry with its organic heat transfer fluids from the proven Diphyl brand. They offer unique thermostability and durability and can be used in a broad temperature range:

Modular technology and proven products from LANXESS for ...

Heat transfer medium Diphyl used in the new Arenales solar thermal power plant in Spain
LANXESS picks up steam With its tried-and-tested heat transfer fluid Diphyl, specialty chemicals company LANXESS is contributing to the cost-effective and environmentally friendly conversion of sunlight into electrical energy.
