In *Lightning*, bestselling novelist Danielle Steel tells the story of a woman whose life is changed by one swift, unexpected stroke of fate. As a partner in one of New York's most prestigious law firms, Alexandra Parker barely manages to juggle husband, career, and the three-year-old child she gave birth to at forty. Then lightning strikes - a routine medical check-up turns her world upside down when tests reveal shattering news. Her husband Sam, a Wall Street whiz-kid, is as proud of his long-time marriage to Alex as he is of his successful career - until he is caught off guard by Alex's illness. Terrified of losing his wife and family, Sam fails to provide any kind of emotional support. Almost overnight, Sam takes his distance from Alex, and they become strangers. As lightning strikes them yet again, Sam's promising career suddenly explodes into disaster, and his very life and identity are challenged. With his future hanging in the balance, Alex must decide what she feels for Sam, if life will ever be the same for them again, or if she must move on without him.

Malaria in Modern East Asian History

This classic work presents a stimulating survey of the most exciting and innovative period in the history

of architecture. Lotz also goes beyond the more familiar locations, architects and buildings to conquer less well-known territories, exploring Piedmont and Vitozzi and ending with a study of bizzarrie. There was nothing simple about what Brody Carter needed to do... With any other woman, it would be. But not with Michaela Doucet. He barely knew the provocative beauty and already her face haunted his dreams. Yet he could not let that affect him.

A critical study of the attempted assassination of the Medici brothers in the Duomo of Florence by members of the Pazzi family draws on a Renaissance letter and family archives to reveal that Montefeltro, Duke of Urbino, and Pope Sixtus IV were the true conspirators behind the crime, examining the plot, the Machiavellian politics involved, and the Medicis' revenge. 30,000 first printing.

Studying malaria in modern East Asia in the context of the global history of the disease, this book fills an important gap in our understanding of the cultural, social, economic, and political dimensions of the relationship between malaria and human society in a region which has often been neglected by historians of the disease. The authors examine the development and consequences of various anti-malaria strategies in Hong Kong, Okinawa, Taiwan, mainland China, and East Asia as a whole. The British and Japanese colonial models of disease control are explored, as is the later American technological model of DDT residue spraying, promoted by the Rockefeller Foundation which played a significant role in the global anti-malaria campaign and the development of public health in Asia. In the post- World War II period, the use of DDT and international political and economic interests helped to shape anti-malaria policies of the Nationalist government in Taiwan. In mainland China, the Beijing government's mass mobilization and primary health care model of anti-malaria control has given way to new strategies as recent changes in the health care system have affected anti-malaria efforts and public health developments. This book illuminates an important and largely unexplored dimension of the history of malaria: the interplay of the state (colonial or sovereign), international interests, new medical knowledge and technology, changing concepts of health and disease, as well as local society in the formulation and implementation of anti-malaria policies. It will be of interest to historians of colonialism, medicine and public health, Asia, as well as health and social policy planners.

These days, it's often easier to avoid face-to-face contact in favor of technological shortcuts. But as Michael Gelb argues in this compelling, entertaining book, the meaningful relationships that come from real interaction are the key to creating innovative ideas and solving our most intractable problems. In *The Art of Connection*, Gelb offers readers seven methods of developing this essential rapport in their professional and personal lives. Each chapter covers specific techniques and illustrates them with memorable stories, relevant scientific research, and hands-on exercises that allow readers to apply their new skills. Most important, Gelb reminds us that developing rapport with others is not just a business tool to enhance productivity but a valuable end in itself. He guides us to cultivate the skills we all need to deepen our relationships, broaden our humanity, and transform our lives.

Squamous cell cancers of the head and neck (SCCHN), also known as head and neck cancers (HNC) encompass malignancies of the oral cavity, larynx, nasopharynx and pharynx, and are diagnosed in over 500,000 patients

worldwide each year, accounting for 5% of all malignancies. In the past several years, there have been significant developments in understanding of HNC. It is now recognized that although alcohol and tobacco use has represented the likely predominant cause of SCCHN, the incidence of a second class of SCCHN related to oncogenic human papillomavirus (HPV) infection is increasing, with a four-fold increase in the past 2 decades, and now thought to represent up to 30% of cases. The first effective target for SCCHN, the EGFR-targeting antibody cetuximab, was approved as recently as in 2006; since then, a growing body of research has identified additional signaling pathways as important in disease pathogenesis, and in resistance to treatment. Proteins such as c-Met, Src, and HER2 are emerging as new therapeutic targets, with a considerable ferment in the clinical trial community. As a capstone of research progress, 2011 marked the first reports of high throughput sequencing of SCCHN tumors, with these efforts identifying unexpected players such as Notch as frequent subject of mutation, spawning new hypotheses for future research. This book will be of interest to researchers who are interested in better understanding the biology of head and neck cancers, with the goals of better designing therapies, identifying risk factors, or investigating the molecular basis of the disease.

In recent decades, there has been a growing recognition of the significance of the supernatural in a Victorian context. Studies of nineteenth-century spiritualism, occultism, magic, and folklore have highlighted that Victorian England was ridden with spectres and learned magicians. Despite this growing body of scholarship, little historiographical work has addressed the Devil. This book demonstrates the significance of the Devil in a Victorian context, emphasising his pervasiveness and diversity. Drawing on a rich array of primary material, including theological and folkloric works, fiction, newspapers and periodicals, and broadsides and other ephemera, it uses the diabolic to explore the Victorians' complex and ambivalent relationship with the supernatural. Both the Devil and hell were theologically contested during the nineteenth century, with an increasing number of both clergymen and laypeople being discomfited by the thought of eternal hellfire.

Nevertheless, the Devil continued to play a role in the majority of English denominations, as well as in folklore, spiritualism, occultism, popular culture, literature, and theatre. The Devil and the Victorians will appeal to readers interested in nineteenth-century English cultural and religious history, as well as the darker side of the supernatural.

The Art of Connection

Doug Fanning lives an apparently gilded existence. A Gulf war veteran turned banker at the vast investment bank Union Atlantic, he is wealthy, handsome and powerful - the epitome of Wall Street success. Charlotte Graves lives in self-imposed exile deep in the forests of rural Massachusetts, stubbornly refusing to engage with a country she feels to be in morally bankrupt. When Fanning decides to build himself a sprawling mansion adjacent to her home, her isolation is threatened and she determines to evict him from his land and, if she can, his kind from her country. Union Atlantic is a deeply involving novel of the modern world - a world in crisis, where individual humanity is pitted against the global marketplace, and we must decide what, in the end, we value most highly.
