Thankfully, Linux does have a search option. In order to search for files and folders, all you do is type: \$ sudo find -iname <file/folder name> That is sudo, a space, followed by the word find, another space, the argument iname, another space, and then finally the name of the file or folder that you are looking for.

---

Linux For Beginners: The Ultimate Guide To The Linux ...  
Just like Windows XP, Windows 7, Windows 8, and Mac OS X, Linux is an operating system. An operating system is software that manages all of the hardware resources associated with your desktop or laptop. To put it simply - the operating system manages the communication between your software and your hardware.
