The relationship between nation and queer sexuality has long been a fraught one, for the sustaining myths of the former are often at odds with the needs of the latter. This collection of essays introduces readers to important

historical and cultural figures and moments in queer life, and it addresses some of the urgent questions of queer belonging that face Wales today.

The Responsive Universe is a handbook to enlightenment. Within these pages are refreshing and insightful

The migration of computing from

File Type PDF Living Breathing Thinking Responsive Buildings

dedicated appliances to physical environments, thanks to increasingly proliferating microchips and ever-expanding information networks directly implicates and empowers architecture as a transformative agent and medium. The fact that objects can

File Type PDF Living Breathing Thinking Responsive Buildings

now sense, think, act, and communicate with the help of embedded technology is opening up the potential for an architecture that is more closely aligned with the networked dynamics of living systems a sentient architecture. The technological enhancement of physical

File Type PDF Living Breathing Thinking Responsive Buildings

matter charts a movement away from a mechanical paradigm towards a biological model. The shift manifests itself on several levels, from the micro scale in the form of new composite or smart materials capable of registering and responding to external stimuli, to

File Type PDF Living Breathing Thinking Responsive Buildings

larger network formations between people, objects, spaces, and landscapes. Radical artifice here serves to imitate nature, enmeshing built environments in a complex web of interactions whose emergent properties approximate the resiliency of natural ecologies. It is

File Type PDF Living Breathing Thinking Responsive Buildings

precisely this fine attunement to life that has made these emerging technologies pertinent in dealing with a wide range of issues from the therapeutic benefits to the body, to the mediation of global and climatic energy systems. The projects featured in this

Beings, Maneesha Deckha critically examines how Canadian law and, by extension, other legal orders around the world, participate in the social construction of the human-

File Type PDF Living Breathing Thinking Responsive Buildings

animal divide and the
abject rendering of
animals as property.
Through a rigorous but
cogent analysis, Deckha
calls for replacing the
exploitative property

File Type PDF Living Breathing Thinking Responsive Buildings

with a new transformative
legal status or
subjectivity called
"beingness." In developing
a new legal subjectivity
for animals, one oriented

law closer together.

Throughout, Deckha draws
upon the feminist animal
care tradition, as well as
feminist theories of
embodiment and

File Type PDF Living Breathing Thinking Responsive Buildings

relationality,
postcolonial theory, and
critical animal studies.
Her argument is critical
of the liberal legal view
of animals and directed at
a legal subjectivity for

File Type PDF Living Breathing Thinking Responsive Buildings

animals attentive to their embodied vulnerability, and desirous of an animal-friendly cultural shift in the core foundations of anthropocentric legal systems. Theoretically

emphasizing the need for
educators to develop a
rigorous practice of self-

in particular, demonstrate
the intersectional and

individual traumatic
experience. People who
rediscover themselves as
learners while in

File Type PDF Living Breathing Thinking Responsive Buildings

have a unique and powerful perspective to bring to the work of ending mass incarceration, and the role of education and learning in that ending. The concepts and framework

File Type PDF Living Breathing Thinking Responsive Buildings

presented in the text aim
to expand how we define
"working with trauma."

Through this redefinition,
we better align teaching

Architecture . . .

**Lessons from a Corrections

Throughout the ages architects
have attempted to capture the

File Type PDF Living Breathing Thinking Responsive Buildings

essence of living systems as design inspiration. However, practitioners of the built environment have had to deal with a fundamental split between the artificial urban landscape and nature owing to

File Type PDF Living Breathing Thinking Responsive Buildings

a technological 'gap' that means architects have been unable to make effective use of biological systems in urban environments. Protocell Architecture is an edition of AD that shows for the first time

File Type PDF Living Breathing Thinking Responsive Buildings

that contemporary architects can create and construct architectures that are bottom up, synthetically biological, green and have no recourse to shallow bio-mimicry. In the next few decades, synthetic biology

File Type PDF Living Breathing Thinking Responsive Buildings

is set to have as much, if not more, impact on architecture as cyberspace and the digital. The key to these amazing architectural innovations is the Protocell.

Articulating Dinosaurs

In this remarkable
interdisciplinary study,

File Type PDF Living Breathing Thinking Responsive Buildings

anthropologist Brian Noble traces how dinosaurs and their natural worlds are articulated into being by the action of specimens and humans together. Following the complex exchanges of palaeontologists, museums

File Type PDF Living Breathing Thinking Responsive Buildings

specialists, film- and media-makers, science fiction writers, and their diverse publics, he witnesses how fossil remains are taken from their partial state and re-composed into astonishingly precise,

File Type PDF Living Breathing Thinking Responsive Buildings

animated presences within the modern world, with profound political consequences. Articulating Dinosaurs examines the resurrecting of two of the most iconic and gendered of dinosaurs. First Noble

File Type PDF Living Breathing Thinking Responsive Buildings

traces the emergence of
Tyrannosaurus rex (the "king
of the tyrant lizards") in
the early twentieth-century
scientific, literary, and
filmic cross-currents
associated with the American
Museum of Natural History

File Type PDF Living Breathing Thinking Responsive Buildings

under the direction of palaeontologist and eugenicist Henry Fairfield Osborn. Then he offers his detailed ethnographic study of the multi-media, model-making, curatorial, and laboratory preparation work

File Type PDF Living Breathing Thinking Responsive Buildings

behind the Royal Ontario Museum's ground-breaking 1990s exhibit of *Maiasaura* (the "good mother lizard"). Setting the exhibits at the AMNH and the ROM against each other, Noble is able to place the political natures

File Type PDF Living Breathing Thinking Responsive Buildings

of T. rex and Maiasaura into high relief and to raise vital questions about how our choices make a difference in what comes to count as "nature." An original and illuminating study of science, culture,

File Type PDF Living Breathing Thinking Responsive Buildings

and museums, Articulating
Dinosaurs is a remarkable
look at not just how we
visualize the prehistoric
past, but how we make it
palpable in our everyday
lives.

Built environment surrounds

File Type PDF Living Breathing Thinking Responsive Buildings

us for 90% of our lives but only now are we realising its influence on the environment, our health, and how we think, feel and behave both individually and socially. Spirit & Place shows how to work towards a

File Type PDF Living Breathing Thinking Responsive Buildings

sustainable environment through socially inclusive processes of placemaking, and how to create places that are nourishing psychologically and physically, to soul and spirit as well as body. This

File Type PDF Living Breathing Thinking Responsive Buildings

book's unique arguments identify important, but often unrecognised, principles and illustrate their applicability in a wide range of situations, price-ranges and climates. It shows how to reconcile

File Type PDF Living Breathing Thinking Responsive Buildings

the apparently incompatible demands of environmental, economic and social sustainability; how to moderate climate to make places of delight, and realign social pressures so places both support society

File Type PDF Living Breathing Thinking Responsive Buildings

and maximise economic viability. Thought provoking and easy to understand, Christopher Day uses everyday examples to relate his theories to practice and our experience.

What are some lessons
learned from the pandemic?

We learned that, in times of
crises, the humanitarian
needs of students, families,
and ourselves must be a top
priority. We learned that

File Type PDF Living Breathing Thinking Responsive Buildings

forming effective partnerships with families and communities is essential to the health and well-being of our children. We were offered a blunt reminder that a system designed to serve the interests of a

File Type PDF Living Breathing Thinking Responsive Buildings

privileged few was destined to fail our historically underserved students, especially our millions of multilingual learners. Above all, we learned that the "normal" many of us have yearned for was never good

File Type PDF Living Breathing Thinking Responsive Buildings

enough—that we must envision a "better world," where we build on our multilingual students' unique assets and cultivate their inner brilliance. Only then will we deliver on their promise. It's this "better world," a

File Type PDF Living Breathing Thinking Responsive Buildings

world in which communities, schools, and classrooms work together as a "whole-child ecosystem," Beyond Crises: Overcoming Linguistic and Cultural Inequities in Communities, Schools, and Classrooms sets out to

File Type PDF Living Breathing Thinking Responsive Buildings

create. Taking a look from the outside in, Debbie Zacarian, Margarita Calderón, and Margo Gottlieb address three critical arenas: 1. Imagining Communities describes how to design and enact strengths-

File Type PDF Living Breathing Thinking Responsive Buildings

based family and community partnerships, including the critical importance of identifying, valuing, and acknowledging each member's assets and competencies, and the ways recent crises have amplified their struggles.

File Type PDF Living Breathing Thinking Responsive Buildings

2. Imagining Schools takes an up-close look at policies, structures, and now irrelevant ways of schooling that call for change and how we might reconfigure professional development to ensure every

File Type PDF Living Breathing Thinking Responsive Buildings

teacher and administrator is dedicated to the well-being and success of our multilingual learners. 3.

Imagining Classrooms demonstrates how to optimize learning opportunities—both virtual and face-to-face—so

File Type PDF Living Breathing Thinking Responsive Buildings

our diverse students grow cognitively, linguistically, and social-emotionally, and accentuate their talents in knowing and using multiple languages in linguistically and culturally sustainable environments. "Student and

File Type PDF Living Breathing Thinking Responsive Buildings

family, classroom, school, and local community are not silos unto themselves," Debbie, Margarita, and Margo insist. "They are part of a larger whole that is interrelated and interconnected and, even,

File Type PDF Living Breathing Thinking Responsive Buildings

interdependent on each other. By forming stronger alliances, we can realize the power of truly working, socializing, and flourishing together." Beyond Crises is the first critical step forward.

Thinking Responsive Buildings

*and its nexus with computation,
biology, and complexity.*

*Starting from the assertion that
we should take generative
architects' rhetoric of biology
and sustainability seriously,
Christina Cogdell examines*

their claims from the standpoints of the sciences they draw on—complex systems theory, evolutionary theory, genetics and epigenetics, and synthetic biology. She reveals significant disconnects while

also pointing to approaches and projects with significant potential for further development. Arguing that architectural design today often only masquerades as sustainable, Cogdell

demonstrates how the language of some cutting-edge practitioners and educators can mislead students and clients into thinking they are getting something biological when they are not. In a narrative that

moves from the computational toward the biological and from current practice to visionary futures, Cogdell uses life-cycle analysis as a baseline for parsing the material, energetic, and pollution differences

between different digital and biological design and construction approaches. Contrary to green-tech sustainability advocates, she questions whether quartzite-based silicon technologies and

File Type PDF Living Breathing Thinking Responsive Buildings

their reliance on rare earth metals as currently designed are sustainable for much longer, challenging common projections of a computationally designed and manufactured future. Moreover, in critiquing

contemporary architecture and science from a historical vantage point, she reveals the similarities between eugenic design of the 1930s and the aims of some generative architects and engineering

synthetic biologists today. Each chapter addresses a current architectural school or program while also exploring a distinct aspect of the corresponding scientific language, theory, or practice. No other book
