This book explores influential designers' sketchbooks as a truer reflection of a designer's thought processes, preoccupations, and problem-solving strategies than can be had by simply viewing finished projects. Highly personal and idiosyncratic, sketchbooks offer an arena for unstructured exploration, a space free from all budgetary and client constraints. Visually arresting objects in their own right, this book aims to elevate sketches from mere ephemera to important documents where the reader can glean valuable insight into the creative process, and apply it to their own practices. Featured designers include Ralph Caplan, Nigel Holmes, Chris Bigg, Eva Jiricna, Jason Munn, Gary Baseman, Marian Bantjes, and many others.

Grammar and Meaning is an introduction to the study of grammar of contemporary English. It provides an impressive survey of all the main areas of English grammar, from words through to sentences and texts. It introduces and explains the linguistic terms needed to talk about the ways in which language works, from simple terms like adjective to more complex terms like non-finite clause. To meet the needs of both students and scholars, Howard Jackson has produced an innovative approach to the study of English grammar. Instead of concentrating on the formal and theoretical discussion of grammar, as many introductions do, this original analysis examines the 'meanings' we want to express when we use language. Beginning with the question, "What do we talk about?", it goes on to investigate how these meanings are structured in the grammar of English. These notions are closer to our ordinary understanding of what language is doing, and therefore the forms and structures of grammar are more easily grasped. The book is extensively illustrated with examples from real English. With analytical exercises in each chapter and a comprehensive glossary of terms, the book will prove an invaluable aid to students of English language, linguistics and English as a Foreign Language, whilst also being accessible to anyone who studies English grammar as part of their course.

Seminar paper from the year 2003 in the subject English Language and Literature Studies - Linguistics, grade: 2+, University of Rostock (Institut für Sprachwissenschaft), course: Hauptseminar: Corpus dictionaries and lexical structure, 10 Literaturquellen entries in the bibliography, language: English, abstract: The first dictionary was published in 1984. At that time the focus lay on lexicography especially on English as an international language. Nowadays nearly every three month new dictionaries appear. They are mainly published from publishing houses in Great Britain. This is due to the dominance which British lexicography won in the 1960s. When the first Longman Dictionary of Contemporary English appeared in 1978 British lexicography had finally won dominance to American lexicography. In 1987 the second edition of the Longman Dictionary of Contemporary English and the Collins COBUILD Dictionary of the English language appeared. These works were completely different to the ones before. According to Sidney I. Landau these works were "in many respects a daring departure from the customary practices of lexicography, and particularly of ESL lexicography". They offered a new look at what the user needed. The aim of this paper is to take a closer look on these dictionaries to check whether they are working with authentic language material to explain words and how easy or difficult it is for a user to understand the explained issues. In grammars the different features of a language are considered systematically. Spoken and written language material is described. Nowadays the grammarians are working together with Universities or at least base their entries on large databases that include millions of texts taken out of various forms of writing and communication situations. This system is meant to help

to provide the use of authentic language material that is familiar to the grammar user. In the analysed grammars invented examples are avoided with the aim to offer the user a better access to the explained issue. The aim of this paper is to analyse the used example solutions by keeping an eye on whether they are really authentic and easy to understand or not better than the invented ones that were often used in former times.
