broken. A protective cover will also prevent any damage to floor.

### How to remove an old door - Wonkee Donkee Doors

You should first remove the door. Remember, door frames have variations in their design – if you have any doubts about removing any parts you should consult the manufacturer or professional builder. For more information see: How to remove an old door : Step 1 - Cut seal : It's best to remove architrave or any decorative trim first.

### How to remove an old door frame and architrave

BS8214: 2008 recommends a 4mm maximum gap at the top and at the long edges as good practice but the guidance of door manufacturer should be followed. The gap at the threshold should be no more than 6mm. It is important that door gaps are as even as possible around the periphery of door.

### ASDMA Knowledge Centre | Timber Fire Door Guidance | ASDMA

Remove the old door knob by gently turning its face plate (sometimes called the rosette) to remove and expose the mechanism. Remove any screws and pull off the door handle on both sides. Remove the pawl (this is a kind of "tongue" makes the door click). Remove the screws in the strike plate (the metal plate on the door frame, not the door) and pry gently away from the door.

2. A "Factory Glazed" label - where the door has been  
apertured and glazed by the original door manufacturer. Look  
for the Label(s) The label on the door leaf demonstrates that  
the door has been certificated under the Scheme. Provided the  
label is intact, the door's certification, and any modifications  
made to it, can be traced.

How to ensure 'Certifire' Fire Door Certification is ...

Hi, I have ordered a new internal door which hasn't yet  
arrived as I wanted to have a glass door to let lots of light  
into the room, however I have now taken off the old door whilst  
awaiting the new one, and the room looks bigger without it.  
I'm now thinking of removing the door frame and having it  
replaced with a glass door.

Removing a car door Use a felt-tip pen to mark around the hinge plate where it rests on the pillar or door frame. If a check strap is fitted remove it by either unbolting or releasing the split pin and clevis pin. Lubricate the securing bolts or screws with penetrating oil then remove all but one from the hinge.
