~~List of plants used in herbalism - Wikipedia~~

This is a list of plants organized by their common names. However, the common names of plants often vary from region to region, which is why most plant encyclopedias refer to plants using their scientific names , in other words using binomials or "Latin" names.

~~List of plants by common name - Wikipedia~~

This big list of uses indicates the importance of plants. So we need to take efforts to prevent them from eradication in the name of development. Conservation of medicinal plants is very important for future use. Due to heavy use, large plants and those plants which take a long time for germination and growth are chopped off.

~~List of Medicinal Plants | Their Uses in Different Diseases~~

Sage plants encompass a plethora of plants that can be woody shrubs or tender herbs. Many are perennial in warm climates, but they are also popularly cultivated as annuals in cooler regions. Some sage plants are edible and commonly used for culinary purposes, while other sage plants are purely ornamental. Learn about the different types of sage plants here.
