In the fall of 2009, with the publication of her #1 national bestselling memoir, Sarah Palin had the privilege of meeting thousands of everyday Americans on her extraordinary 35-city book tour. Inspired by these encounters, her new book, *America By Heart: Reflections on Family, Faith, and Flag*, celebrates the enduring strengths and virtues that have made this country great. Framed by her strong belief in the importance of family, faith, and patriotism, the book ranges widely over American history, culture, and current affairs, and reflects on the key values-both national and spiritual-that have been such a profound part of Governor Palin's life and continue to inform her vision of America's future. Written in her own refreshingly candid voice, *America By Heart* will include selections from classic and contemporary readings that have moved her-from the nation's founding documents to great speeches, sermons, letters, literature and poetry, biography, and even some of her favorite songs and movies. Here, too, are portraits of some of the extraordinary men and women she admires and who embody her deep love of country, her strong rootedness in faith, and her profound love and appreciation of family. She will also draw from personal experience to amplify these timely (and timeless) themes-themes that are sure to inspire her numerous fans and readers all across the country.

In the interwar years, émigré scholars in Czechoslovakia provided continuity and a bridge for Ukrainian scholarship from its inception at the end of the nineteenth century to the development of Ukrainian studies in the twenty-first century. These scholars forged a legacy that spread beyond Czechoslovakia. Without their work in the postwar era, the development of Ukrainian émigré scholarship would not have flourished. Narrated from a Ukrainian perspective, *Scholars in Exile* concentrates on the astounding efforts by Ukrainians to establish institutions of higher learning in the unique democratic spirit of Tomáš Garrigue Masaryk. The book also explores Ukrainian scholarly and professional societies, museum and archival collections, scholarly publishing, and little-known intellectual connections between Ukrainian émigré scholars and their colleagues in Czechoslovakia and various other European countries. *Scholars in Exile* brings to light an interesting facet of modern Ukrainian history, allowing for a better understanding of the general intellectual and institutional history of Ukraine.

**Health systems and assets are a large part of the critical infrastructure of any community and are vital not only for the safety and well-being of its citizens, but also for the economic vitality, quality of life, and livelihood of the entire community. As part of its ongoing mission to foster dialogue among stakeholders and to confront the challenges inherent in ensuring the nation's health security, the Institute of Medicine (IOM) Forum on Medical and Public Health Preparedness for Catastrophic Events sponsored a town hall session at the 2012 Public Health Preparedness Summit. This event took place February 21-24 in Anaheim, California. In this session sponsored by the IOM, the focus of discussion was sustaining health care delivery beyond the initial response to a disaster and facilitating the full long-term recovery of the local health care delivery systems. Many elements required for recovery are also fundamental to the day-to-day operations of these systems. Investing in improved health care delivery systems, both financially and through collaborative capacity building, can enhance economic development and growth before a disaster, and also prove instrumental in sustaining services and recovering after a disaster. Post-Incident Recovery Considerations of the Health Care Service Delivery Infrastructure serves as a summary of the session and explains the value of regional capacity building; the importance of interagency, intergovernmental, and public-private collaboration; and the significant role that health care coalitions can play in ensuring resilient communities and national health security.**
