The Third Edition of MICROPROCESSOR SYSTEMS DESIGN covers the design of systems that use Motorola's 68000 family of microprocessors (including the latest generation of 68000 chips), and addresses both hardware and software considerations.

Microprocessor Systems Design: 68000 Family Hardware ...

This book makes all things clear about designing systems controlled by microprocessors and uses the Motorola 68000 family of microprocessors as an example. It is full of clear examples and many exercises for the student, and shows details of both the hardware and programming aspects of microprocessor system design, making it ideal for engineers who are interested in the subject.

Microprocessor Systems Design: 68000 Family Hardware ...

The Motorola 68000 is a 16/32-bit complex instruction set computer microprocessor, introduced in 1979 by Motorola Semiconductor Products Sector. The design implements a 32-bit instruction set, with 32-bit registers and a 32-bit internal data bus. The address bus is 24-bits and does not use memory segmentation, which made it popular with programmers. Internally, it uses a 16-bit data arithmetic logic unit and two more 16-bit ALUs used mostly for addresses, and has a 16-bit external data bus. For

The Motorola 68000 series is a family of 32-bit complex instruction set computer microprocessors. During the 1980s and early 1990s, they were popular in personal computers and workstations and were the primary competitors of Intel's x86 microprocessors. They were most well known as the processors used in the early Apple Macintosh, the Sharp X68000, the Commodore Amiga, the Sinclair QL, the Atari ST, the Sega Genesis, the AT&T UnixPC, the Tandy Model 16/16B/6000, the Sun Microsystems Sun-1, Sun-2

The design was complete by 1970, and used a MOS-based chipset as the core CPU. The design was significantly (approximately 20 times) smaller and much more reliable than the mechanical systems it competed against, and was used in all of the early Tomcat models. This system contained "a 20-bit, pipelined, parallel multi-microprocessor". The Navy ...
