The material presented
in this book corresponds
to a semester-long
course, "Linear Algebra
and Differential
Equations", taught to
sophomore students at
UC Berkeley. In
contrast with typical

Read Free
Midterm Exam 2
Part A University

undergraduate texts, the book offers a unifying point of view on the subject, namely that linear algebra solves several clearly-posed classification problems about such geometric objects as quadratic forms and linear transformations. This attractive viewpoint on the classical theory agrees well with modern

Read Free Midterm Exam 2 Part A University

tendencies in advanced mathematics and is shared by many research mathematicians.

However, the idea of classification seldom finds its way to basic programs in mathematics, and is usually unfamiliar to undergraduates. To meet the challenge, the book first guides the reader through the entire
