Relative velocity is  
the velocity of an  
object as observed  
from a particular  
reference frame,  
and it varies with  
the choice of  
reference frame. If  
two reference

to be specified.

Relative velocity is the velocity of an object as observed from a particular reference frame, and it varies with the choice of reference frame. If two reference frames are moving relative to each other at a constant velocity, then the
