## *Play Activities to Encourage Motor Development in Child ...*

Movement activities are games, actions or activities of any kind that engage the large muscles of the body, thereby building gross motor coordination.

Movement is a natural state for a child and as long as he has enough freedom to play and be, he will seek out regular movement through his play activities.

While free play is essential, there are many kinds of movement and gross motor activities you can initiate with your child that will get the large muscles working together.
