Where To Download Neuro Exam Documentation

Documentation of a basic, normal neuro exam should look something along the lines of the following: The patient is alert and oriented to person, place, and time with normal speech. No motor deficits are noted, with muscle strength 5/5 bilaterally. Sensation is intact bilaterally.

Documenting a Neuro Exam, Decoded | ThriveAP

NEURO: Mental status: The patient is alert, attentive, and oriented. Speech: clear and fluent with good repetition, comprehension, and naming. She recalls 3/3 objects at 5 minutes. Cranial nerves: CN II: Visual fields are full to confrontation. Fundoscopic exam is normal with sharp discs. Pupils are 4 mm and briskly reactive to light.

Neurological Examination Templates - NeurologyResidents

The neurologic history and physical examination are the most important tools in neurologic diagnosis. Although confirmatory laboratory data, including modern imaging techniques such as CT scanning and magnetic resonance imaging, have provided further accuracy in neurologic diagnosis, the history and physical examination remain the mainstays.

The Five-Minute Neurological Examination

Neurologic examination: Mental status: The patient is alert, attentive, and oriented. Speech is clear and fluent with good repetition, comprehension, and naming. She recalls 3/3 objects at 5 minutes. Cranial nerves: CN II: Visual fields are full to confrontation. Fundoscopic exam is normal with sharp discs and no vascular changes.
