Modernism is both a philosophical movement and an art movement that arose from broad transformations in Western society during the late 19th and early 20th centuries. The movement reflected a desire for the creation of new forms of organization which reflected the newly emerging industrial world, including features such as urbanization, new technologies, and war.

[Modernism - Wikipedia](#)

Modernism was based on industrial materials that made new forms of architecture possible. Arguably, the earliest example of this was The Crystal Palace in London's Hyde Park build to house the Great Exhibition of 1851. This structure was made of glass and iron such that its walls appeared to be large crystals.

[19 Characteristics of Modern Architecture - Simpllicable](#)

Modernist architecture, or modernism, is a style that emerged in the early-20th century in response to large- scale changes in both technology and society. It is associated with the function of buildings, approached from an analytical view of materials, the elimination of ornament and decoration, and openness to structural innovation .
