The features and floor space arrangements, including the configuration of suites, must also be factored in. NFPA 101 recognizes two types of patient-care suites in health care occupancies: sleeping suites and non-sleeping suites. The Code also has permissions for non-patient care suites, but those suites do not have suite-specific means of egress requirements and are not addressed in this blog.

#101Wednesdays: Means of Egress in Health Care ... | NFPA ...

Egress exit enclosures and exit passageways are required to be protected by fire resistance-rated assemblies to ensure the pathway is usable and not compromised by the failure of building systems. NFPA 101 Section 7.1.3 defines limitations to building systems that can be installed in or routed through exit passageways and exit stairways.
