The System 5000 is an expandable multi-zone Fire Alarm Control Panel designed with maximum flexibility and modularity as a basic requirement. The heart of the system is the Central Processor Unit (CPU-5000) module which monitors and directs the actions of all other modules in the system.

The S 5000 INSTALLATION MANUAL
The DCM-4 gives the System 5000 the capability of delivering different messages, to different areas, at the same time. For example, the System 5000 can deliver an evacuation message to the fire area and a warning message to the non-fire areas at the same time.

Fire Alarm System Limitations While a fire alarm system may lower insurance rates, it is not a substitute for fire insurance! An automatic fire alarm system—typically made up of smoke detectors, heat detectors, manual pull stations, audible warning devices, and a fire alarm control with remote notification capability—can provide early warning of a developing fire. Such a system, however ...
