Electrical Machines Microcontroller Based Protection for Low Voltage Motors using Zigbee Technology: The main aim of this project is to protect and control low voltage motors from low voltage, ground fault, thermal overload and unbalance conditions. Various sensors employed in this design continuously monitors the parameters of the motor.

100+ Electrical Projects for Engineering Students

Here is a list of top electrical mini projects: Power grid control through PC SCADA : This project shows the controlling of appliances connected to the power grid using a PC remotely. It consists of RF transmitter and receiver, microcontroller.

Top 65 Electrical Mini Projects - Electronics Hub

The Elec Group is a leading supplier of electrical testing and compliance services. Our business is big enough to deliver services nationwide using our team of engineers based throughout the UK and small enough to provide a personal touch to every customer.. The Elec Group was founded in March 2019 and has since taken over the staff, customer base and other assets of a well-established business.

Whether youre a parent of a teacher, you'll enjoy this collection of awesome electricity science projects and experiments that introduce kids to the power of electricity! Kids will learn about how static electricity works, how current electricity flows, and what is actually happening when they flip a switch. Science is so cool!

10 Awesome Electricity Science Experiments for Kids ...

PAT Testing encompasses the testing and inspection of portable electrical equipment including heavy plant and fixed appliances up to 400v. The Elec Group will work with duty holders to ensure that your appliances are in line with the IET 'Code of Practice for In-Service Inspection and Testing of Electrical Equipment' and will provide a digital asset register of your appliances.

Portable Appliance Testing (PAT) - ELEC GROUP

At Project Electrical, we are a Napit and Trust mark accredited company. We have built our company on customer recommendations and reputation, we have a highly motivated workforce and pride ourselves on our passion to maintain these standards. We specialise in the design and installation of electrical installations in all sectors of the industry.

Home - Project Electrical

Electrical Power Research Group We are the UK's largest academic research group in Electrical Power, involved in activities from Nano Watts to Giga Watts. Through our state-of-the-art research laboratory facilities, our activities are highly cross-disciplinary and multi-disciplinary. We are well known for our high level of industrial engagement.
