Glaucoma is a group of eye disorders that damage the optic nerve, which sends messages from your eye to your brain so you can see. Damage to the optic nerve can cause vision loss and blindness. Glaucoma is the second most common cause of blindness in the United States. It usually affects people later in life.

Retinal disorders that affect aging eyes include: Age-related macular degeneration (AMD). AMD can harm the sharp, central vision needed to see objects clearly and to do common things like driving and reading. During a dilated eye exam, your eye care professional will look for signs of AMD. There are treatments for AMD.

~~Ageing and Your Eyes | National Institute on Aging~~

If these added years are dominated by declines in physical and mental capacity, the implications for older people and for society are more negative. Ageing explained. At the biological level, ageing results from the impact of the accumulation of a wide variety of molecular and cellular damage over time.
