Oracle Bpel Documentation

BPEL is the standard for assembling a set of discrete services into an end-to-end process flow, radically reducing the cost and complexity of process integration initiatives. Oracle BPEL Process Manager offers a comprehensive and easy-to-use infrastructure for creating, deploying and managing BPEL business processes.

Oracle BPEL Process Manager

This section provides a brief overview of BPEL activities and provides references to other documentation that describes how to use these activities. Oracle BPEL Designer includes BPEL 1.1 and BPEL 2.0 activities that can be added to a BPEL process. These activities enable you to perform specific tasks within a process.

BPEL Process Activities and Services - Oracle Help Center

Oracle Bpel Documentation Oracle BPEL Process Manager provides a framework for easily designing, deploying, monitoring, and administering processes based on BPEL standards. Oracle BPEL Process Manager provides support for the following features: Web service standards such as XML, SOAP, and WSDL Introduction to Oracle BPEL Process Manager The Oracle process descriptor is an XML file specifying ...

Oracle Bpel Documentation - orrisrestaurant.com

Oracle BPEL PM utilizes a database to store metadata and instance data during runtime. This data is stored in what is known as the dehydration store, which is simply a database schema. Throughout this document the terms dehydration store, BPEL schema, BPEL tables, etc are all equivalent.
