10+ Osteotomies Around The Knee Indications Planning ...

towards osteotomy around the knee. This paper discusses the current views on high tibial osteotomy (HTO). Indication, patient selection and prognosis The main indication for HTO is the correction of varus malalignment in medial unicompartment-mental osteoarthritis of the knee. The aim is to unload the medial compartment by slightly

Osteotomies around the knee

The most frequent type of osteotomies around the knee is the medial open wedge high tibia osteotomy (MOWHTO). But still also closed wedge high tibia osteotomies (CWHTO) have their relevance in many cases. Distal femur osteotomies (DFO) are used more and more frequently in most cases as closed wedge, the open wedge DFO shows more problems in bone healing.

[Osteotomies around the Knee].

Osteotomies around the knee are a well-recognized treatment for symptomatic unicompartmental knee arthritis associated to lower limb malalignment in young and active patients, with the attempt to preserve the native knee joint and delay knee arthroplasty (2,3). Genu varum is the most common knee malalignment,

Femoral osteotomies for the valgus knee

BACKGROUND: Corrective osteotomies around the knee are a cost-efficient and joint-preserving treatment option for primary leg deformities. Incorrect indications, technical errors, and insufficient postoperative management may lead to severe complications.

[Complications of corrective osteotomies around the knee].

Osteotomies Around the Knee: Indications - Planning - Surgical Techniques Using Plate Fixators: Lobenhoffer, Philipp, Van Heerwaarden, Ronald J, Staubli, Alex E ...

Osteotomies Around the Knee: Indications - Planning ...

Written by leading surgeons with expertise in performing osteotomies around the knee, this book is an essential reference for the current techniques in joint-preserving knee surgery. The book opens with a thorough discussion of physiology, pathophysiology, clinical evaluation, and imaging. It then describes the indications and basic principles of treatment and provides a detailed planning algorithm for high-tibial osteotomy.

Osteotomies around the Knee: Indikations - Planning ...

Osteotomies around the knee have recently become more popular again. New techniques and implants have improved the results and have decreased the complication ratio. Axial corrections of the leg, however, require exact indication placement, planning and execution.
