All precast box culverts are manufactured to order, to the specific design required for a project. The loadings from outside the concrete culvert will dictate the thicknesses of the walls and the amount of reinforcement required. The concrete culverts are manufactured with a smooth mould finish, which allows water to flow freely through the channel.

~~Precast Concrete Box Culverts - JP Concrete~~
The proven strength and performance characteristics of precast concrete box culverts, together with their excellent service life, make them ideal for a wide variety of civil engineering and construction applications. Concrete culvert sections are manufactured in a variety of internal profiles and sizes and offer exceptional versatility in the uses to which they can be applied.
