Postpartum depression could start 3 years after birth, new research shows The findings can help both women and doctors better understand how pregnancy impacts mood disorders in the long run. Nov ...

Postpartum depression might start later, last up to 3 years

You can get pregnant from 3 weeks (21 days) after giving birth. This can happen before you have a period, even if you're breastfeeding. You need to start using contraception from 21 days after the birth every time you have sex if you don't want to get pregnant again.

You and your baby in the postnatal period - NHS

Childbirth, also known as labour and delivery, is the ending of pregnancy where one or more babies leaves the uterus by passing through the vagina or by Caesarean section. In 2015, there were about 135 million births globally. About 15 million were born before 37 weeks of gestation, while between 3 and 12 percent were born after 42 weeks. In the developed world most deliveries occur in ...

Women are dying in pregnancy, childbirth and postpartum at alarming numbers and black women are over 3 times more likely to die than white women. Mari talks with Sam Griffin of DC Metro Maternity to not only educate listeners on the topic but find ways to combat the alarming numbers.

?Arrow's Angle | Real Talk for Pregnancy, Childbirth ...

The postpartum period begins immediately after childbirth as the mother's body, including hormone levels and uterus size, returns to a non-pregnant state. The terms puerperium, puerperal period, or immediate postpartum period are commonly used to refer to the first six weeks following childbirth. The World Health Organization describes the postnatal period as the most critical and yet the most neglected phase in the lives of mothers and babies; most maternal and newborn deaths occur during this
