This is an anthology of 20 papers that were presented at the 10th Cooperstown Symposium on Baseball and American Culture, held in June 1998, and co-sponsored by the State University of New York at Oneonta and the National Baseball Hall of Fame and Museum. Commencing with a perceptive speech by keynote speaker G. Edward White, this Symposium examined such topics as whether a city can support two—not just one—major league team, how television broadcasters and their ball clubs interrelate and how masculine dominance in baseball mainly curtailed female advancement in the game and business. These essays, divided into sections titled "Baseball as a Business," "Baseball and Communication," "Baseball and Racial and Ethnic Perspectives," "Baseball and Gender Matters," "Baseball and Images" and "The "Other" Leagues of Baseball," cut through the cliché and easy judgments of the media and offer instead the longer, more informed view of scholars and researchers.

Beyond Pedagogy: Reconsidering the public purpose of museums explores issues standing at the intersection of public pedagogy, memory, and critical theory, focusing on the explicit and implicit educational imperative of art, natural history, and indigenous museums, cultural centers, memorial sites, heritage houses, and other cultural heritage sites that comprise the milieu of educating, learning, and knowing. Taken together, the various essays comprising this book demonstrate that a more nuanced examination of the role of cultural heritage institutions as pedagogical sites requires a critical gaze to understand the function of the authority and ways through which such institutions educate. Beyond Pedagogy also makes a vital point about the complexity of such institutions and the need to comprehend how pedagogy emerges not only as an end result of the museum' s educational purpose but also in relation to the historically defined mandates that increasingly come to question the distinction between the knowledge we know and how we come to know it. As such, this volume expands our understandings of the ways in which pedagogy operates in the contexts of museums and heritage sites and the forms of knowledge, knowing, and being it conjures, celebrates, obscures, and/or silences in the process of producing among museum visitors particular notions of identity, subjectivity and voice, ones that, more often than not, rely rather than challenge traditional conceptualizations of the nation and its past, present, and future.

The volume consists of twenty-five chapters selected from among peer-reviewed papers presented at the CELDA (Cognition and Exploratory Learning in the Digital Age) 2013 Conference held in Fort Worth, Texas, USA, in October 2013 and also from world class scholars in e-learning systems, environments and approaches. The following sub-topics are included: Exploratory Learning Technologies (Part I), e-Learning social web design (Part II), Learner communities through e-Learning implementations (Part III), Collaborative and student-centered e-Learning design (Part IV), E-Learning has been, since its initial stages, a synonym for flexibility. While this dynamic nature has mainly been associated with time and space it is safe to argue that currently it embraces other aspects such as the learners' profile, the scope of subjects that can be taught electronically and the technology it employs. New technologies also widen the range of activities and skills developed in e-Learning. Electronic learning environments have evolved past the exclusive delivery of knowledge. Technology has endowed e-Learning with the possibility of removing problem-solving skills, critical thinking and team work, by investing in information exchange, collaboration, personalisation and community building.

The goal of this book is to present and evaluate the concept of dynamic testing. Unlike "static" tests such as the SAT or IQ tests, dynamic testing emphasizes learning potential rather than past learning accomplishments. The book opens with a theoretical framework of abilities as forms of developing expertise. It then continues with an introduction to dynamic testing and then a capsule history of dynamic testing. The book also reviews the approaches of Feuerstein and Budoff and other diverse approaches to dynamic testing. The Drs Sternberg and Griegorenko discuss their own three-prong approach to dynamic testing along with two case studies using dynamic testing in their own research. The authors conclude that dynamic testing has enormous potential which has not yet been tapped.

Offering a practical, case-based approach, Spanish and the Medical Interview: Clinical Cases and Exam Review is a unique, immersive study and review resource for medical Spanish. It provides extensive training and review in two formats: the print book contains numerous cases spanning a wide variety of clinical settings, formatted as a patient would present for medical attention, while the audio cases provide multiple opportunities to hone your listening comprehension skills. Together, these learning components test your knowledge and skills in caring for Spanish-speaking patients and prepare you for case-based examinations that test clinical Spanish. This first-of-its-kind title is ideal as a stand-alone resource or as a companion to Dr. Ortega's Spanish and the Medical Interview: A Textbook for Clinically Relevant Medical Spanish. Helps you improve your interviewing skills, your understanding of patient responses, and your ability to explain a diagnosis and plan of care to Spanish-speaking patients, so you can provide a higher quality of patient care and safety in your practice. Covers multiple presentations of cases in main organ system areas, including musculoskeletal, cardiovascular, pulmonary, gastrointestinal, endocrine, genitourinary, neurologic, psychiatric, eye/ear/nose/throat, and pediatric, in multiple patient care settings such as urgent care, emergency department, outpatient clinic, and inpatient wards. - Focuses on topics that are particularly common in Hispanic/Latino patients and includes cultural health issues that may impact the patient's understanding of medical information, belief system, decision-making preferences, or access to care—all of which have a significant impact on your medical decision making and interviewing styles and effectiveness. Leads you through key information for each case, prompting you to use your medical Spanish clinical skills in a series of prompts and questions as the case unfolds. Assessment questions follow each case to test your comprehension. Provides more than two dozen audio cases to improve your listening comprehension of different nationalities and accents of Spanish-speaking patients. Provides real-world content from Drs. Pilar Ortega and Marco Alemán, who serve on the steering committee for the National Medical Spanish Taskforce that aims to standardize the educational approach to a national assessment examination for Medical Spanish. Expands your global skills set: in your home country, when caring for patients who speak Spanish, or when caring for patients in other countries through global medicine programs.
