The issue of universal and free access to treatment is now a fundamental goal of the international community. Based on original data and field studies from Brazil, Thailand, India and Sub-Saharan Africa under the aegis of ANRS (the French national agency for research on Aids and viral hepatitis, this timely and significant book both assesses the progress made in achieving this objective and presents a rigorous diagnosis of the obstacles that remain. Placing particular emphasis on the constraints imposed by TRIPS as well as the poor state of most public health systems in Southern countries, the contributing authors provide a comprehensive analysis of the huge barriers that have yet to be overcome in order to attain free access to care and offer innovative suggestions of how they might be confronted. In doing this, the book renews our understanding of the political economy of HIV/AIDS in these vast regions, where the disease continues to spread with devastating social and economic consequences. This volume will be a valuable addition to the current literature on HIV/AIDS in developing countries and will find widespread appeal amongst students and academics studying economics, sociology and public health. It will also be of interest to international organizations and professional associations involved in the fight against pandemics.

Mastering Real Estate Principles

Property Management Kaplan Publishing

The seventh edition of this pragmatic guide to determining right and wrong in the workplace is updated with new case studies, exercises, and ancillary materials. Joseph Weiss's *Business Ethics* is a pragmatic, hands-on guide for determining right and wrong in the business world. To be socially responsible and ethical, Weiss maintains, businesses must acknowledge the impact their decisions can have on the world beyond their walls. An advantage of the book is the integration of a stakeholder perspective with an issues and crisis management approach so students can look at how a business's actions affect not just share price and profit but the well-being of employees, customers, suppliers, the local community, the larger society, other nations, and the environment. Weiss includes twenty-three cases that immerse students directly in contemporary ethical dilemmas. Eight new cases in this edition include Facebook's (mis)use of customer data, the impact of COVID-19 on higher education, the opioid epidemic, the rise of Uber, the rapid growth of AI, safety concerns over the Boeing 737, the Wells Fargo false saving accounts scandal, and plastics being dumped into the ocean. Several chapters feature a unique point/counterpoint exercise that challenges students to argue both sides of a heated ethical issue. This edition has eleven new point/counterpoint exercises, addressing questions like, Should tech giants be broken apart? What is the line between free speech and dangerous disinformation? Has the Me Too movement gone too far? As with previous editions, the seventh edition features a complete set of ancillary materials for instructors: teaching guides, test banks, and PowerPoint presentations.

Services Marketing: People, Technology, Strategy is the ninth edition of the globally leading textbook for Services Marketing by Jochen Wirtz and Christopher Lovelock, extensively updated to feature the latest academic research, industry trends, and technology, social media, and case examples. This book takes on a strong managerial approach presented through a coherent and progressive pedagogical framework rooted in solid academic research. It features cases and examples from all over the world and is suitable for students who want to gain a wider managerial view. **Supplementary Material Resources:** Resources are available to instructors who adopt this textbook for their courses. These include: (1) Instructor's Manual, (2) Case Teaching Notes, (3) PowerPoint deck, and (4) Test Bank. Please contact sales@wspc.com. **Key Features:**

Intangible assets such as knowledge or brands are increasingly important to companies. Such assets are essentially needed to develop new innovative products and to introduce them to the market. Philipp Sandner is one of the first researchers to approach the valuation of both technology- and market-based intangibles simultaneously by relying on portfolios of intellectual property (IP) derived from patents and trademarks.
