Get uncompromised image quality and clinical capabilities through the convergence of coverage, spatial resolution, temporal resolution and spectral imaging.~~

~~Revolution CT | GE Healthcare~~

~~It's time for a Revolution. Revolution CT delivers uncompromised image quality and clinical capabilities through the convergence of coverage, spatial resolution, temporal resolution and spectral imaging - all in one. It is the CT designed to help you deliver revolutionary and differentiated capabilities across all of your clinical areas.~~

~~Revolution CT — Computed Tomography — Categories — GE —~~

~~Revolution Apex™ is a new ultra-premium CT system designed and engineered to provide you with a new way to your best image for every patient. Because of the inherently complex technological make-up of CT, every provider has their own “take” on how to get the best image quality. This fragmentation across the industry can sometimes be confusing for those who want the best CT.~~

~~Revolution Apex CT System | GE Healthcare UK~~

~~Versatile and exceptional CT imaging. (866) 281-7545. Contact Us. Your goals include increasing patient access, improving quality, enabling clinical and operational outcomes, and reducing costs. The Revolution CT ES combines innovative technologies and features to overcome challenging patients and conditions.~~

~~Revolution CT ES | GE Healthcare~~

~~Revolution™ EVO Gen 3 defies time by helping you surpass your day-to-day challenges at every step of the care cycle. Home; Back to Revolution Family - Computed Tomography - Categories ... And after nearly half a century at the forefront of computed tomography, GE Healthcare is uniquely positioned to ensure this latest advance keeps its promise.~~

~~Revolution EVO Gen 3 | GE Healthcare UK | GE Healthcare~~

~~Revolution CT User Manual Direction 5480385-1EN, Revision 1 2 Product Description 2.1 Intended Use of the System The system is intended for head, whole body, cardiac, and vascular X-ray Computed Tomography applications. 2.2 Indications for Use of the System The system is intended to produce cross-sectional images of the body by computer reconstruction of X-ray transmission projection data from the same axial plane taken at different angles.~~
