Risk Management and Financial Institutions. Edition No. 5 ...

Financial institutions can manage the risk exposures arising from lending and deposit-taking activities using financial derivatives; indeed, financial institutions are the largest users of derivatives, measured in notional exposures.

Risk Management in Financial Institutions

According to this theory, financial institutions should completely hedge the tradable risks they face. Moreover, since risk management should not be a concern for unconstrained institutions, the unconstrained institutions should hedge more or, in other words, that hedging should be decreasing with measures of net worth.
