An illuminating collection of work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Master IT hardware and software installation, configuration, repair, maintenance, and troubleshooting and fully prepare for the CompTIA® A+ Core 1 (220-1001) and Core 2 (220-1002) exams. This is your all-in-one, real-world, full-color guide to connecting, managing, and troubleshooting modern devices and systems in authentic IT scenarios. Its thorough instruction built on the CompTIA A+ Core 1 (220-1001) and Core 2 (220-1002) exam objectives includes coverage of Windows 10, Mac, Linux, Chrome OS, Android, iOS, cloud-based software, mobile and IoT devices, security, Active Directory, scripting, and other modern techniques and best practices for IT management. Award-winning instructor Cheryl Schmidt also addresses widely-used legacy technologies—making this the definitive resource for mastering the tools and technologies you'll encounter in real IT and business environments. Schmidt's emphasis on both technical and soft skills will help you rapidly become a well-qualified, professional, and customer-friendly technician. "Education is often seen as a fundamental means to improve economic prospects for individuals from low income settings. However, even with increased emphasis on basic education for all, many individuals fail to achieve basic skills to succeed in life. The book presents evidence that one core reason is that by the time a child is old enough to attend school, there is already a wide disparity in cognitive skills and in emotional and behavioral development among children from households of different socioeconomic backgrounds. Low levels of cognitive development in early childhood strongly correlate with low socio-economic status (as measured by wealth and parental education) as well as malnutrition. These disadvantages are often exacerbated by economic crises. Fortunately, however, as documented in this volume, there are programs that have proven effective in promoting a child's development through caregiver-child interaction and stimulation, and with well designed preschool programs. While preschool programs currently cover a modest share of low income children, expansion of such services to at risk populations is a cost-effective means of improving overall educational achievement. Thus, focused preschool programs can serve as a key investment in a strategy to reduce the transmission of poverty from poor parents to their children."

The Rough Guide to Bali and Lombok is the perfect companion for exploring the cultural and natural richness of these beautiful places, with clear maps and up-to-date coverage of the best attractions. Discover Bali and Lombok's highlights with the guides' full colour introduction, showing everything from dramatic cliff-top temples to sparkling white-sand beaches. Find detailed practical advice on what to see and do, with great coverage of family-friendly destinations and activities, the unique volcanic landscapes and Balinese pop music. Whether you're looking for bargain hostels and beach shacks or chic spas and boutique hotels, this guide has the information. There's advice on where to dive in Bali and Lombok, how to arrange treks to the island's volcanoes and the top surf breaks. With detailed maps, The Rough Guide to Bali and Lombok gives you all the practical advice you'll need for a great adventure. Originally published in print in 2011. Make the most of your holiday with The Rough Guide to Bali and Lombok. Now available in ePub format.

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend.Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives.This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

The Apple-Certified Way to Learn macOS Support Essentials 11 , the official book for macOS support, is a top-notch primer for anyone who needs to support, troubleshoot, or optimize macOS Big Sur, such as IT professionals, technicians, help desk specialists, and ardent Mac users. Apple Pro Training Series book that covers Big Sur. You'll find in-depth, step-by-step instructions on everything from upgrading, updating, reinstalling and configuring macOS Big Sur to setting-up network services like the Content Caching service. This book covers updated system features in macOS Big Sur, including security and privacy enhancements, Control Center and Notification Center, Safari, system extensions, macOS Recovery, Startup Security Utility, and the Signed System Volume (SSV). This book includes the following content: Authoritative explanations of underlying technologies, troubleshooting, system administration, and much more Focused lessons that take you step by step through practical, real-world tasks A Web Edition that provides the full text of the book online The Apple Pro Training Series is Apples official self-paced learning program. Books in this series offer downloadable lesson files and an online version of the book. Additional information on this and other books in this series can be found at www.peachpit.com/apple . For more on certification, visit training.apple.com .

The Conscious CookDelicious Meatless Recipes That Will Change the Way You EatHarperCollins

"General Chemistry: Atoms First." Second Edition starts from the building blocks of chemistry, the atom, allowing the authors to tell a cohesive story that progresses logically through molecules and compounds to help students intuitively follow complex concepts more logically. The book's ideas helps students build a better foundation and ultimately gain a deeper understanding of chemical concepts. Students can more easily understand the microscopic-to-macroscopic connections between unobservable atoms and the observable behavior of matter in daily life, and immediately into real chemistryinstead of being forced to memorize facts. Reflecting a true atoms first perspective, the Second Edition features experienced atoms-first authors, incorporates recommendations from a panel of atoms-first experts, and follows historical beliefs in chemistry: concepts based and real experimental data first. This approach distinguishes this text in the market based whereby other authors teach theory first, followed by experimental data.

Multi-Domain Master Data Management delivers practical guidance and specific instruction to help guide planners and practitioners through the challenges of a multi-domain master data management (MDM) implementation. Authors Mark Allen and Dalton Cervo bring their experience and reference you need to help your organization take master data management to the next level by incorporating it across multiple domains. Written in a business friendly style with sufficient program planning guidance, this book covers a comprehensive set of topics and advanced topics in the key MDM disciplines of Data Governance, Data Stewardship, Data Quality Management, Metadata Management, and Data Integration. Provides a logical order toward planning, implementation, and ongoing management of multi-domain MDM from a program manager and data analyst perspective. Provides detailed guidance, examples and illustrations for MDM practitioners to apply these insights to their strategies, plans, and processes. Covers advanced MDM strategy and instruction aimed at improving data quality management, lowering data maintenance costs, and corporate risks by applying consistent enterprise-wide practices for the management and control of master data.

A former steak-lover himself, Chef Tal struggled for years on a vegan diet that left him filled with cravings for meat and dairy. Frustrated by the limited options available and unwilling to sacrifice the delicious flavors he associated with eating meat, he decided to create vegan meals that could hold their own at the center of the plate. Chef Tal found that by applying traditional French culinary techniques to meatless cuisine, he was able to create delicious meals full of rich flavor and healthy fat-meals that any food-lover, even devoted meat-eaters, would find completely satisfying. Seventy groundbreaking recipes later, Chef Tal is ready to share his magic. The Conscious Cook features vegan versions of tried-and-true dishes such as Oysters Rockefeller, Caesar Salad, Corn Chowder, and Paella, as well as adventurous new cuisine like Lemongrass Consommé with Pea Shoot and Mushroom Dumplings and Peppercorn-Encrusted Portobello Fillets. A full-color photo accompanies each of the recipes. Also included are engaging stories from influential people in the vegan world; a peek into Chef Tal's pantry and kitchen; a guide to eating seasonally; and a selection of dinner party menus. Above all, The Conscious Cook shows readers that avoiding the health risks and ethical dilemmas of eating meat and dairy does not mean sacrificing taste or satisfaction. The starters, soups, sandwiches, entrées, and desserts here offer culinary adventure that will truly revolutionize the way the world experiences meatless food.

This book constitutes the refereed proceedings of the Second International Conference on Intelligent Technologies and Applications, INTAP 2019, held in Bahawalpur, Pakistan, in November 2019. The 60 revised full papers and 6 revised short papers presented were carefully reviewed and selected from 224 submissions. Additionally, the volume presents 1 invited paper. The papers of this volume are organized in topical sections on AI and health; sentiment analysis; intelligent applications; social media analytics; business intelligence;Natural Language Processing; information extraction; machine learning; smart systems; semantic web; decision support systems; image analysis; automated software engineering.

Practical Stress Analysis with Finite Elements is an ideal introductory text for newcomers to finite element analysis who wish to learn how to use FEA. Unlike many other books which claim to be at an introductory level, this book does not weigh the reader down with theory but rather provides the minimum amount of theory needed to understand how to practically perform an analysis using a finite element analysis software package. Newcomers to FEA generally want to learn how to apply FEA to their particular problem and consequently the emphasis of this book is on practical FE procedures. The information in this book is an invaluable guide and reference for both undergraduate and postgraduate engineering students and for practising engineers. * Emphasises practical finite element analysis with commercially available finite element software packages. * Presented in a generic format that is not specific to any particular finite element software but clearly shows the methodology required for successful FEA. * Focused entirely on structural stress analysis. * Offers specific advice on the type of element to use, the best material model to use, the type of analysis to use and which type of results to look for. * Provides specific, no nonsense advice on how to fix problems in the analysis. * Contains over 300 illustrations * Provides 9 detailed case studies which specifically show you how to perform various types of analyses. Are you tired of picking up a book that claims to be on "practical" finite element analysis only to find that it is full of the same old theory rehashed and contains no advice to help you plan your analysis? If so then this book is for you! The emphasis of this book is on doing FEA, not writing a FE code. A method is provided to help you plan your analysis, a chapter is devoted to each choice you have to make when building your model giving you clear and specific advice. Finally nine case studies are provided which illustrate the points made in the main text and take you slowly through your first finite element analyses. The book is written in such a way that it is not specific to any particular FE software so it doesn't matter which FE software you use, this book can help you!

An estimated 400 million units of obsolete electronics are scrapped annually in the U.S. Virtualization can save an organization \$560 annually in electricity costs per server; this books covers virtualization and other energy-saving techniques A green IT organization can reduce operation costs, increase employee retention, and improve brand image in the market place

The Rough Guide to Southeast Asia on a Budget is the ultimate guide to exploring this fascinating region on a shoestring, with coverage of all the top sights, the clearest mapping of any guide and handy hints on how to save money. Discover all of the most popular Southeast Asian destinations, alongside lesser-known places, with information on getting off the beaten track – whether you want to hike through the rainforest, visit remote hill tribes or just find a quiet stretch of white sand. The Rough Guide to Southeast Asia on a Budget has detailed practical information that will help you make the most of your time and money, whether taking a slow boat down the Mekong or catching the 'Jungle Railway' through Malaysia's interior. And you'll discover the things to see and do in each country, plus all the best hostels and budget hotels, bars, cafés and cheap restaurants. This guide is the budget-conscious traveller's must have item for Southeast Asian trips. Make the most of your time on earth with The Rough Guide to Southeast Asia on a Budget.

If you've never experienced this unique, cute sci-fi romance about what it means to be human, now's your chance! One of the biggest hits from CLAMP, creators of xxxHOLiC and Magic Knight Rayearth, returns in a definitive, hardcover premium collector's edition, featuring a large size, premium paper, color pages, and more. After moving from the countryside into the big city, poor college student Hideki Motosuwa finds himself down on his luck. All he wants is a good job, a girlfriend, and his very own "persocom" - the latest and greatest in humanoid computer technology. Hideki's luck changes one night when he finds Chi - an adorable, but seemingly broken, persocom thrown out in a pile of trash. After taking her home, Hideki discovers that Chi is more responsibility than he expected - and that there's much more to his cute new persocom than meets the eye.

Most of the people in low and middle-income countries covered by social protection receive assistance in the form of in-kind food. The origin of such support is rooted in countries' historical pursuit of three interconnected objectives, namely attaining self-sufficiency in food, managing domestic food prices, and providing income support to the poor. This volume sheds light on the complex, bumpy and non-linear process of how some flagship food-based social protection programs have evolved over time, and how they currently work. In particular, it lays out the broad trends in reforms, including a growing move from in-kind modalities to cash transfers, from universality to targeting, and from agriculture to social protection. Case studies from Egypt, India, Indonesia, Mexico, Sri Lanka, and United States document the specific experiences of managing the process of reform and implementation, including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities.

The leading guide to the professional kitchen's cold food station, now fully revised and updated Garde Manger: The Art and Craft of the Cold Kitchen has been the market's leading textbook for culinary students and a key reference for professional chefs since its original publication in 1999. This new edition improves on the last with the most up-to-date recipes, plating techniques, and flavor profiles being used in the field today.

New information on topics like artisanal cheeses, contemporary styles of pickles and vinegars, and contemporary cooking methods has been added to reflect the most current industry trends. And the fourth edition includes hundreds of all-new photographs by award-winning photographer Ben Fink, as well as approximately 450 recipes, more than 100 of which are all-new to this edition. Knowledge of garde manger is an essential part of every culinary student's training, and many of the world's most celebrated chefs started in garde manger as apprentices or cooks. The art of garde manger includes a broad base of culinary skills, from basic cold food preparations to roasting, poaching, simmering, and sautéing meats, fish, poultry, vegetables, and legumes. This comprehensive guide includes detailed information on cold sauces and soups; salads; sandwiches; cured and smoked foods; sausages; terrines, pâtes, galantines, and roulades; cheese; appetizers and hors d'oeuvre; condiments, crackers, and pickles; and buffet development and presentation.

800+ WORDS TO HELP YOU EXCEL ON THE TEST OF ENGLISH AS A FOREIGN LANGUAGE! • Boost your knowledge for the Reading and Listening sections • Master pronunciation and be ready for the Speaking section • Test yourself with 70+ quizzes throughout the book Improving your vocabulary is one of the most important steps you can take to feel more confident about the Test of English as a Foreign Language. The Princeton Review's TOEFL Power Vocabulary has the words, tools, and strategies you need to help boost your comprehension levels and improve your score, including: • 800+ frequently-appearing TOEFL exam words • In-context examples and secondary definitions that help focus your study sessions • Mnemonic devices and root guidelines that expand your vocabulary • Brief vocab sections that break down content and let you work at your own pace • Quick quizzes with varied drills (definitions, word pairs, synonyms, antonyms, and more) to help cement your knowledge • Final drill section at the end of the book so you can assess your progress

The 16 chapters in this book discuss new architectures, networking paradigms, trustworthiness structures, and platforms for the integration of applications across various business and industrial domains which are needed for the emergence of 'intelligent things' (static or mobile) apps speed up the progress of paradigms of autonomous system design and the proliferation of the Internet of Robotic Things (IoRT). Collaborative robotic things can communicate with other things in IoRT, learn independently, interact securely with the world, people and other things.

Due to their ubiquitous nature, the "Internet of Robotic Things" which binds together the sensors and the objects of robotic things is gaining popularity.

This collective work identifies the latest developments in the field of the automatic processing and analysis of digital color images. For researchers and students, it represents a critical state of the art on the scientific issues raised by the various steps constituting the chain of color image processing. It covers a wide range of topics related to computational color imaging, including color filtering and segmentation, color texture characterization, color invariant for object recognition, color and motion analysis, as well as color image and video indexing and retrieval. Contents 1. Color Representation and Processing in Polar Color Spaces. Jesús Angulo, Sébastien Lefèvre and Olivier Lezoray. 2. Adaptive Median Color Filtering. Frédérique Robert-Inacio and Eric Dinet. 3. Anisotropic Diffusion PDEs for Regularization of Multichannel Images: Formalisms and Applications. David Tschumperlé. 4. Linear Prediction in Spaces with Separate Achromatic and Chromatic Information. Olivier Alata, Imtihan Qazi, Jean-Christophe Burie and Christine Fernandez-Maloigne. 5. Region Segmentation. Alain Clément, Laurent Busin, Olivier Lezoray and Ludovic Macaire. 6. Color Texture Attributes. Nicolas Vandenbroucke, Olivier Alata, Christèle Lecomte, Alice Porebski and Imtihan Qazi. 7. Photometric Color Invariants for Object Recognition. Damien Muselet. 8. Color Key Point Detectors and Local Color Descriptors. Damien Muselet and Xiaohu Song. 9. Motion Estimation in Color Image Sequences. Bertrand Augereau and Jenny Benois-Pineau.
