

Union rules on nutrition and health claims have been established by Regulation (EC) No 1924/2006. The Regulation started to apply on 1 July 2007. This regulation is the legal framework used by food business operators when they want to highlight the particular beneficial effects of their products, in relation to health and nutrition, on the product label or in its advertising.

### **Nutrition and Health Claims | Food Safety**

Safe and nutritious food is a fundamental requirement for human life. Food safety is compromised by microbiological and chemical contamination, which can cause food poisoning and/or chronic disease. Food supply can be affected by climate, poverty and conflict. In addition to this, accidental or deliberate contamination of food can pose known or potential risk to health, such as melamine tainted milk in China or the recent finding of the banned insecticide fipronil in eggs across the EU.

Safety, Nutrition and Health in Early Education

**(PDF) Safety, Nutrition and Health in Early Education ...**

Food safety and Nutrition are inextricably linked, particularly in places where food supplies are insecure. When food becomes scarce, hygiene, safety and nutrition are often ignored as people shift to less nutritious diets and consume more 'unsafe foods' — in which chemical, microbiological, zoonotic and other hazards pose a health risk. WHO works to promote the availability of safe, healthy and wholesome food for everyone to improve food and nutrition security.

13 June, 2017. Children, like adults, need to practice good habits for optimum health. Proper nutrition, safety in and out of the home, and healthy practices such as exercise and wearing sunscreen will decrease your child's chances of health problems in the present and future. Teaching and modeling such behaviors can help your child embrace them for life.
