

Salik Road Toll Dubai

Der Reiseführer im Taschenbuchformat Wenn in Europa die kalten Wintermonate Einzug halten, lockt Dubai mit der Sehnsuchtsformel »Sun, Sand and Sea«. In diese verlockende S-Kette ließen sich noch mühelos die Stichworte Shopping und Safety einfügen. » Ahlan wa sahan« - herzlich willkommen in Dubai! Dubai, das bedeutet ca. 340 Tage Sonne im Jahr, karibische Temperaturen, Meer und viele Wassersportmöglichkeiten, Luxus und Wüste, aufregende Hotels und futuristische Bauwerke, unerschöpfliche Einkaufsmöglichkeiten, arabisches Ambiente, tolerante Atmosphäre, Freundlichkeit und sehr hohe Sicherheit. Und das alles nur wenige Flugstunden von zu Hause entfernt. Was Dubai darüber hinaus so außergewöhnlich macht, sind die Gegensätze, in der arabische Tradition und westliche Moderne friedlich nebeneinander existieren: Schleier und Bikini, Bauchtanz und Moschee, Gewürz-Souq und Haute Couture, Schlittschuhbahnen und Skipisten in der Wüste. Das DuMont Reise-Taschenbuch Dubai stellt die modernste Metropole am Golf von Arabien mit all ihren Attraktionen sowie das gleichnamige Emirat anschaulich vor. Der Autor Gerhard Heck kennt Dubai seit fast drei Jahrzehnten und hat die rasante Entwicklung des Emirats in den letzten zehn Jahren hautnah mitverfolgt. Kompetent führt er seine Leser nicht nur durch die vielen Museen, sondern auch zu den schönsten Stränden, den besten Restaurants, den attraktivsten Shopping-Adressen und den spannendsten Sportveranstaltungen. Man kann sich also von ihm an die Hand nehmen lassen, um gezielt zu den Highlights von Dubai geführt zu werden. Und zu seinen ganz persönlichen Lieblingsorten! Auf 10 Entdeckungstouren können Sie aktiv Neues entdecken, hinter die Kulissen schauen, eine ganz persönliche Beziehung zu Dubai entwickeln. Ausgewählte Adressen, jeweils mit einem aussagekräftigen Schlagwort bewertet, und zahlreiche Infos für alle, die Wert auf eine aktive und kreative Reisegestaltung

legen, bieten das Rüstzeug für jeden, der individuell unterwegs sein möchte. Der Magazinteil beleuchtet mit frischer journalistischer Kompetenz die für das Reiseziel relevanten Themen und vermittelt ein lebendiges, aber auch kritisches Porträt von Dubai. 10 x Auf Entdeckungstour ! Die Windtürme von Bastakiya - im ältesten Stadtviertel Dubais Dubai, der Creek und die Abras - Sightseeing per Wassertaxi Pferderennen in Nad Al Sheba Kardamom und Gold - die Souqs von Deira Die Dhaus von Dubai - an den Ufern des Creek Eis und Schnee in Dubai - Wintersport unter Wüstensonne In der schönsten Moschee Dubais - die Jumeirah Mosque Im Burj Al Arab - das prominenteste Hotel Dubais Falken als VIP-Patienten - in einem ungewöhnlichen Krankenhaus Kamele zum Anfassen - auf dem Kamelmarkt von Al Ain Die Karten Satellitenaufnahme von Dubai Übersichtskarte mit den Highlights der Stadt und des Emirats 11 Stadtviertelkarten, Grundrisse und Detailpläne: sämtliche Adressen sind anhand eines farbigen Nummernsystems verortet Übersichtskarte: Emirat Dubai Plus: Extra-Reisekarte zum Herausnehmen

Lonely Planet covers must-see spots but also enables curious travellers to get off beaten paths to understand more of the culture of the places in which they find themselves.

Dubai has continued to meet its targets in becoming the global capital of Islamic finance, nearly doubling the number of sukuk (Islamic bonds) listings on its exchanges since 2017. Furthermore, eased policy restrictions to encourage foreign investment and the

2019 budget's continued commitment to infrastructure development ahead of Expo 2020 are expected to continue driving economic activity. As one of the most diversified economies in the region, Dubai continues to present growth opportunities in various sectors including tourism, logistics, manufacturing and education. Although the emirate has benefitted from its proximity to oil and gas fields, Dubai is right at the forefront of the emerging cleaner energy world, and developing and promoting renewable technologies, including solar energy and electric vehicles.

CultureShock! Dubai is an indispensable guide for anyone planning a stay in the Las Vegas of the Middle East. Within a single generation, Dubai has blossomed from a quiet port city to major business hub with a lion's share of the global gold trade. The emirate will host the World Expo 2020. Leena Asher draws on her insider knowledge to take visitors through the process of settling in, whether for short or longer stays. From getting an Emirates ID, navigating banking practices and exchanging Islamic greetings to sipping Arabic coffee and camel milk, shopping at the gold, textile and spice souqs and visiting a ski resort in the desert, the book provides complete information on what's unique about life in Dubai. How do you greet a lady in Dubai? How does one survive the 50 degree celcius desert climate? Did you know that there are gold dispensing ATMs in Dubai? Get the most of out of your stay with this essential and fun-to-read guide! About the Series

CultureShock! is a dynamic, comprehensive series of guides for travellers seeking to understand the countries they are visiting, working in or moving to. Each title explains the country's customs, traditions and social and business etiquette in a lively, informative style. CultureShock! authors have experienced the joys and pitfalls of cultural adaptation and provide warm and helpful advice to those who seek to intergrate into diverse cultures. Since the late eighteenth century, academic engagement with political, economic, social, cultural and spatial changes in our cities has been dominated by theoretical frameworks crafted with reference to just a small number of cities. This book offers an important antidote to the continuing focus of urban studies on cities in 'the Global North'. Urban Theory Beyond the West contains twenty chapters from leading scholars, raising important theoretical issues about cities throughout the world. Past and current conceptual developments are reviewed and organized into four parts: 'De-centring the City' offers critical perspectives on re-imagining urban theoretical debates through consideration of the diversity and heterogeneity of city life; 'Order/Disorder' focuses on the political, physical and everyday ways in which cities are regulated and used in ways that confound this ordering; 'Mobilities' explores the movements of people, ideas and policy in cities and between them and 'Imaginarities' investigates how urbanity is differently perceived and experienced. There are three kinds of chapters published in this volume: theories generated about urbanity 'beyond the West'; critiques, reworking or refining of 'Western' urban theory based upon

conceptual reflection about cities from around the world and hybrid approaches that develop both of these perspectives. *Urban Theory Beyond the West* offers a critical and accessible review of theoretical developments, providing an original and groundbreaking contribution to urban theory. It is essential reading for students and practitioners interested in urban studies, development studies and geography.

Ideal itineraries and top travel tips in a pocket-sized package. -Brand new edition of Insight Guides Pocket Dubai -Innovative extra = incredible value, and unique in the market. -High production values - fresh colour-coded design, full-colour throughout, and includes a pull-out map Content overview: -Compact, concise, and packed with essential information about Where to Go and What Do, this is a practical on-the-move travel companion - Includes Top Ten Attractions, Perfect Day itinerary suggestions and an insightful overview of landscape, history and culture This handbook of urban transportation planning presents case studies detailing 40 best practices from 33 states in the U.S. and 19 countries on six continents. Cities around the world have improved transportation options for their citizens. Roadways have seen the addition of walkways and bicycle lanes, and light-rail transit systems have reduced street traffic. These cities have decreased reliance on personal cars and enhanced their urban environments by reducing congestion, pollution, and the number and width of roadways. This volume discusses the dynamic field of urban transportation planning and provides resources for planning professionals and public officials interested in

obtaining additional information on the latest trends.

This book presents the latest advances in computational intelligence and data analytics for sustainable future smart cities. It focuses on computational intelligence and data analytics to bring together the smart city and sustainable city endeavors. It also discusses new models, practical solutions and technological advances related to the development and the transformation of cities through machine intelligence and big data models and techniques. This book is helpful for students and researchers as well as practitioners.

Dubai and the rest of the United Arab Emirates is an extraordinary mixture of ancient Arabic culture and modern Western capitalism. The most opulent hotels in the world fight for attention with open tracts of desert that stretch, uninhabited, to the horizon. Hundreds of kilometres of sandy beaches, which run into the warm and clear waters of the Arabian Gulf, are only interrupted by desalination plants that create enough fresh water to keep

acres of Dubai public gardens in luscious bloom. No expense has been spared to make Dubai a five-star paradise for up-market tourists looking for great food and drink, extraordinary duty free shopping, and all-year round sunshine. Discover sunken wrecks that attract divers from around the world; nightclubs hosting Europe and Asia's hottest DJs; desert driving in death defying conditions; restaurants run by globally renowned chefs; and shopping trips that mix bazaars full of ancient Iranian spices with tax free-priced suits from Armani and Versace.

Around the world, mass transit is struggling to compete with the private automobile. Yet a number of metropolitan areas have in recent decades managed to mount cost-effective and resource-conserving transit services that provide alternatives to car travel. What sets these places apart? Noted transportation expert Robert Cervero provides an on-the-ground look at more than a dozen mass

transit success stories, introducing the concept of the "transit metropolis"--a region where a workable fit exists between transit services and urban form.

Essential Dubai Guide

Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield. The field of e-Government has emerged alongside the developments in information technology in recent

decades, and has become an increasingly important factor in all our lives. It has faced a wide range of challenges from the changing technologies of the internet/digital economy, such as IOT, big data, cloud and 4G mobile, as well as the rapid growth of ICT innovations and applications. The Institute of e-Government at Waseda University, Japan, was established in 2001, and this book is the latest in the series of e-Government ranking surveys published by the Institute since 2005. The book is divided into three parts, the first of which is an overview of the e-Government ranking survey including a section on historical trends, the 2015 ranking and e-Government ranking by indicators. The second part covers findings and trends, and includes analysis in the fields of digital/internet economy, IOT, cloud, open/big data, cyber security, smart cities, social media and e-aging. The last section presents 63 country reports. The lessons learnt from the best practices explode in this book will contribute greatly to the work of all those involved in setting up, developing and improving e-Government worldwide.

Indonesia is the largest country in the Association of Southeast Asian Nations (ASEAN), accounting for around two fifths of the region's energy consumption. Energy demand across the country's more than 17,000 islands could increase by four fifths and electricity demand could triple between 2015 and 2030. While reliance on domestic coal and imported petroleum products has grown, Indonesia has started adding more renewables to its energy mix. The country has set out to achieve 23% renewable energy use by 2025, and 31% by 2050. REmap - the global roadmap from the International Renewable Energy Agency (IRENA) - addresses this

challenge, presenting a range of technology and resource options, along with key insights on the opportunities and challenges ahead. As this REmap country report shows, Indonesia could feasibly exceed its current goals and deploy even more renewables. In fact, the country could reach its 2050 target two decades sooner - by 2030.

Berlitz: Dubai Pocket Guide

Dubai: Behind an Urban Spectacle

Dubai Travel Guide 2017

India: A land of 1.2 billion consumers and mammoth potential. Ranks in the world's top 10 countries in terms of GDP. How do some companies win big in this market? Why do many companies fail to go after the big opportunities? What are the new growth strategies that can triumph in this diverse market? Leading companies have succeeded in India not necessarily by unleashing unique technology or better products, but by their ability to competently consummate the last mile as an inevitable ingredient, even an architect, of their success. This book provides a disruptive approach to successfully create and capture "undiminished" potential of a billion-consumer market.

This book draws upon the expertise of academic researchers, urban planners and architects to explore the

challenge of building the sustainable cities of the future. It addresses this challenge by considering current cities and those of the near future, and creates a picture of the sustainable city from the bottom up. Individual chapters cover topics such as transport, energy supply, sustainable urbanism and promoting social equality in large infrastructure projects. Real-world examples are presented to illustrate how systems thinking is used to integrate different components of a city so as to ensure that the whole is more sustainable than its parts. Written in an accessible style, this book is intended for general readers as much as it is for students and researchers interested in sustainable cities and related topics. It is also ideal for urban planners seeking best-practice guidelines for sustainable urban development.

This volume sets out to investigate the linguistic ecologies of Singapore, Hong Kong, and Dubai, with chapters that combine empirical and theoretical approaches to the sociolinguistics of multilingualism. One important feature of this publication is that the five parts of the collection deal with such key issues as the historical dimension, language policies and language planning, contemporary societal multilingualism, multilingual language acquisition, and the localized Englishes of global cities. The first four sections of the volume provide a multi-levelled and finely-detailed description of multilingual diversity of three global cities, while the final section discusses postcolonial Englishes in the context of multilingual language acquisition and language contact.

Since the 1970s, Indian workers have flooded into Dubai, enabling its construction boom. Barred from becoming citizens, they comprise the emirate's largest noncitizen population. Neha Vora examines their existence in a state

of permanent temporariness.

Yasser Elsheshtawy explores Dubai's history from its beginnings as a small fishing village to its place on the world stage today, using historical narratives, travel descriptions, novels and fictional accounts by local writers to bring colour to his history of the city's urban development. With the help of case studies and surveys this book explores the economic and political forces driving Dubai's urban growth, its changing urbanity and its place within the global city network. Uniquely, it looks beyond the glamour of Dubai's mega-projects, and provides an in-depth exploration of a select set of spaces which reveal the city's 'inner life'.

Written by S K S Singarum & Vinod Kumar, this book is nothing less than an essential guide for all those who are coming to Dubai

for the first time. If you are from the Indian subcontinent, it is a little easier for you to understand and appreciate the local dress and other cultural traditions. But you need not worry if you are from a western country as this ultimate guide on Dubai will make you feel at home with all the information provided in this book. The book contains lots of illustrations to make it easier for the readers. This book highlights the electronic governance in a smart city through case studies of cities located in many countries. "E-Government" refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-

Governance Domains Studies • E-Governance Tools and Issues

The downhill slide in the global price of crude oil, which started mid-2014, had major repercussions across the Middle East for net oil exporters, as well as importers closely connected to the oil-producing countries from the Gulf. Following the Arab uprisings of 2010 and 2011, the oil price decline represented a second major shock for the region in the early twenty-first century – one that has continued to impose constraints, but also provided opportunities. Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline, this book connects oil market dynamics with an understanding of socio-political changes. Inspired by rentierism, the contributors present original studies on Bahrain, Egypt, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. The studies reveal a large diversity of country-specific policy adjustment strategies: from the migrant workers in the Arab Gulf, who lost out in the post-2014 period but were incapable of repelling burdensome adjustment policies, to Egypt, Jordan, and Lebanon, who have never been able to fulfil the expectation that they could

benefit from the 2014 oil price decline. With timely contributions on the COVID-19-induced oil price crash in 2020, this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy.

Berlitz Pocket Guide Dubai is a concise, full-colour travel guide that combines lively text with vivid photography to highlight the very best that this ever-changing city has to offer.

The Where To Go chapter details all the key sights, from modern icons such as the seven-

star Burj Al Arab and the world's tallest

building, the Burj Khalifa, to the more

traditional attractions such as the Gold Souk and historic Bastakiya. There are also

excursions into the desert, Al Ain and even

nearby Abu Dhabi. Handy maps on the cover

help you get around with ease. To inspire you, the book offers a rundown of the Top 10

Attractions in the city, followed by an

itinerary for a Perfect Day in Dubai. The What

to Do chapter is a snapshot of ways to spend your spare time, including shopping in the city's opulent malls and atmospheric souks, taking in the horse racing and hitting Dubai's famous clubs and bars. You'll also be armed with background information, including a brief history of the city and an Eating Out chapter covering its cosmopolitan cuisine. There are carefully chosen listings of the best hotels and restaurants, and an A-Z to equip you with all the practical information you will need.

This volume presents innovative work on innovative methods, tools and practices aimed at supporting the transition of Asian and Middle Eastern cities and regions towards a more smart and sustainable dimension. The role of the built and urban environment are becoming more pronounced in Asia and Middle East as the regions continues to experience rapid increase in population and urbanisation, which have only led to an increase in environmental degradation but also rise in energy consumption and emissions. Individual chapters covers timely topics such as sustainable infrastructure, transportation, renewable energy, water and methods supporting an innovative and sustainable development of urban areas. Real-

world examples are presented to highlight recent developments and advancements in design, construction and transportation infrastructures. The volume is based on the best contributions to the 2nd GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures, Egypt 2018 - The official international congress of the Soil-Structure Interaction Group in Egypt (SSIGE).

This book is unique in concisely addressing the impact of new and enhanced approaches to library service, encompassing topics such as Information Literacy skills acquisition, inclusive of non-Western environments, artificial intelligence in academic libraries, research data management, and confronting the concept of VUCA (Volatility, Uncertainty, Complexity, and Ambiguity) as mentioned by the Research Planning and Review Committee of ACRL (2020).
