As the wife of a pioneer in the field of biotechnology, Katherine Stallworth had an up-close view of the ugly underbelly of corporate espionage and the cutthroat nature of competition. When her husband is murdered and her life threatened, she turns to Raheem Miller, the one man she can trust—despite their sordid past. Years ago, Raheem fell in love with Katherine—older, sophisticated, and way out of his league. And nothing has changed. While he'd rather avoid this assignment, he'll never forgive himself if

The growth and development witnessed today in modern science, engineering, and technology owes a heavy debt to the rare, refractory, and reactive metals group, of which niobium is a member. Extractive Metallurgy of Niobium presents a vivid account of the metal through its comprehensive discussions of properties and applications, resources and resource processing, chemical

processing and compound preparation, metal extraction, and refining and consolidation. Typical flow sheets adopted in some leading niobium-producing countries for the beneficiation of various niobium sources are presented, and various chemical processes for producing pure forms of niobium intermediates such as chloride, fluoride, and oxide are discussed. The book also explains how to liberate the metal from its intermediates and describes the physico-chemical principles involved. It is an excellent reference for chemical metallurgists, hydrometallurgists,

most of the twentieth century, under welfare states and state socialism, these services were viewed from a local and national perspective as embodying a mix of economic, social and cultural dimensions and were managed by the state through strong regulation and direct ownership and delivery. That socially based and state-centred approach has been progressively displaced since the 1980s through neoliberal policies of privatisation, deregulation and liberalisation, the transnationalisation of finance and production, and new technologies. The internationalisation of

services markets has thus become a driver of contemporary capitalism. The explicit aim of 'trade in services' agreements is to lock in national regulations and policies that enhance the profitability of international services markets. They are exclusively the tools of contemporary global capitalism, yet are represented as the new pathway for development. It is argued here, however, that there is a fundamental contradiction between the global market model and the intrinsically social nature of services, whether they are social services like education, media and midwifery, or

inputs to capitalist production such as finance, transport, energy, and telecommunications. This book examines and draws out these tensions and contradictions through a combination of theoretical analysis and a series of truly global case studies that include the market in internet gambling, education, pensions, electricity privatisation, supermarkets, tourism, oil, culture, temporary migrants, private finance initiatives and call centres. The product of extensive research by an internationally renowned expert in the area, yet written in an accessible manner,

Dynamic Asia has overtaken the European Union as Latin America and the Caribbean's second largest export market, after the United States. However, the region's exports to Asia remain concentrated in few commodities involved a small number of large firms. This book explores the present and future scope for the participation of small and medium-sized enterprises (SMEs) in biregional trade and value chains and the measures that can be taken to make those chains more inclusive and sustainable. It encourages governments in Latin America to improve the business environment in order to encourage multinational

Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived

we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind

us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

In the medieval and early modern periods, Spain shaped a global empire from scattered territories spanning Europe, Africa, and the Americas. Historians either have studied this empire piecemeal—one territory at a time—or have focused

Where To Download Seat Cordoba 1996 Service

on monarchs endeavoring to mandate the allegiance of far-flung territories to the crown. For Yuen-Gen Liang, these approaches do not adequately explain the forces that connected the territories that the Spanish empire comprised. In Family and Empire, Liang investigates the horizontal ties created by noble family networks whose members fanned out to conquer and subsequently administer key territories in Spain's Mediterranean realm. Liang focuses on the Fernández de Córdoba family, a clan based in Andalusia that set out on mobile careers in the Spanish empire at the end of the fifteenth century. Members of the family served as military officers, viceroys, royal councilors, and clerics in Algeria, Navarre, Toledo, Granada, and at the

royal court. Liang shows how, over the course of four generations, their service vitally transformed the empire as well as the family. The Fernández de Córdoba established networks of kin and clients that horizontally connected disparate imperial territories, binding together religious communities—Christians, Muslims, and Jews—and political factions—Comunero rebels and French and Ottoman sympathizers—into an incorporated imperial polity. Liang explores how at the same time dedication to service shaped the personal lives of family members as they uprooted households, realigned patronage ties, and altered identities that for centuries had been deeply rooted in local communities in order to embark on imperial careers.

And they will shape the prospects of people that may live to see the 22nd century. The 2019 Report explores inequalities in human development by going beyond income, beyond averages and beyond today. It asks what forms of inequality matter and what drives them, recognizing that pernicious inequalities are generally better thought of as a symptom of broader problems in a society and economy. It also asks what policies can tackle those drivers—policies that can simultaneously help nations to grow their economies, improve human development and reduce

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations,

Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.
