When it receives a converter request from SharePoint Foundation, the document conversion load balancer service must return a URI to the appropriate document conversion ...

### Document Converter Services Overview | Microsoft Docs

When a user initiates a document conversion, either through the user interface or object model, SharePoint Server 2010 passes the document conversion request to these two services. It is the DocConvLaunch service that actually calls the document converter. When called, the document converter takes the original file and generates a converted copy. SharePoint Server 2010 then takes the converted copy and performs certain post-processing actions on it. These actions include:

### Document Converters in SharePoint Server 2010 (ECM)...

SharePoint Server 2010 connects to the specified launcher via .NET Remoting and requests that it convert the specified document. DocConvLauncher service Schedules and initiates the document conversions. When SharePoint Server 2010 passes it a document conversion request, the DocConvLauncher service persists the original file stream and conversion settings information to disk, and then calls the appropriate document converter using a command-line command.

### Services Necessary for Document Conversion in SharePoint...

Word Automation Services is a new service application in SharePoint Server 2010. Word Automation Services provides unattended, server-side conversion of documents into formats that are supported by the Microsoft Word client application. In simplest terms, Word Automation Services takes the "Save As..." functionality of the Word client application and replicates it for the server. Specifically, Word Automation Services provides the following capabilities:

### Word Automation Services Overview | Microsoft Docs

" Document Conversion Launcher Service This service schedules and initiates the document conversions. When SharePoint Foundation passes a document conversion request to the document conversion launcher service, the service must call the appropriate document converter."
