Johannes is an aesthete, dedicated to creating the possibility of seduction through the careful manipulation of young women. He stealthily pursues the innocent Cordelia until she becomes increasingly drawn to him. But when she is ready to give herself completely, she realizes she may have got everything wrong. United by the theme of love, the writings in the Great Loves series span over two thousand years and vastly different worlds. Readers will be introduced to love's endlessly fascinating possibilities and extremities: romantic love, platonic love, erotic love, gay love, virginal love, adulterous love, parental love, filial love, nostalgic love, unrequited love, illicit love, not to mention lost love, twisted and obsessional love....

Sociology is concerned with modern society, but has never come to terms with one of the most distinctive and horrific aspects of modernity - the Holocaust. The book examines what sociology can teach us about the Holocaust, but more particularly concentrates upon the lessons which the Holocaust has for sociology. Bauman's work demonstrates that the Holocaust has to be understood as nothing comparable to this work available in the sociological literature.

This revised edition of Bookmarks reflects the end of the coordination of the youth campaign by the Council Europe. The campaign may be officially over, but the education and awareness-raising to counter hate speech and promote human rights values remain an urgent task for young people of all ages. The work of the Council of Europe for democracy is strongly based on education: education as a process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the

ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights. Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks was originally published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to

The past five years have witnessed dramatic advances in research on pathological gambling -- a diagnosis often overlooked by clinicians who are unaware not only of the personal and social consequences of pathological gambling, but also of the possible treatment options. Today, clinicians can choose from an array of treatment options to substantially improve the lives of patients with this disorder. progress, this remarkable clinician's guide comprises the most extensive coverage on public health, clinical characteristics and treatment, psychotherapy and psychopharmacology, and interventions for adolescents, adults, and older adults. Written by the world's leading researchers on psychiatric aspects of gambling, this truly comprehensive volume discusses how to diagnose pathological gambling, detail the clinical phenomenology, etiology, and treatment of pathological gambling, highlighting the current clinical approaches most likely to lead to early identification, symptom remission, and improvement maintenance. Useful appendices provide specific tests, scales, and diagnostic criteria following four major sections of the book: Public Health and Epidemiology discusses prevalence and defin

gambing; the relationship between the different levels of gambling severity; and gambling's effects on societal, familial, and individual health and well-being. Clinical Characteristics covers the symptoms and sequelae of pathological gambling and the differences among adolescents, older adults, and men and women, and shows that pathological gambling -- rather than being categorized as a single

Mental Disorders in the Classical World seeks to show through interdisciplinary work how the first medical scientists and their lay contemporaries conceptualized mental disorders and attempted to diagnose, understand and treat them.

Transurethral resection (TUR) is today 'the gold standard' against which new methods must be compared in the treatment of BPH and other bladder malignancies. Covering the entire subject of transurethral resection, this fourth edition now includes chapters on the use of lasers as well as the medical-legal aspects associated with TUR. Blandy and Notley, with the help of John Reynard for this new edition, are recognized and respected authorities in the field, and have provided detailed descriptions of all the key processes involved in TUR, as well as the instruments and methods used and the basic skills that must be mastered. Filled with practical hints that support or refute popularly held views, Blandy, Notley and Reynard present rationales based on their own experiences, and describe every stage of each process in jargon-free text, illustrated with photographs and diagrams drawn by the senior author himself. A well-established work that presents valuable information in simple, straightforward terms, this is an essential text for all urologists, whether in training or in practice.

The Third Edition of this popular text focuses on clinical-practice research methods. It is written by clinicians with experience in generating and answering researchable questions about real-world clinical practice and health care/ite prevention, treatment, diagnosis, prognosis, and causes of diseases, the measurement of quality of life, and the effects of innovations in health services. The book has a problem-oriented and protocol-based approach and is written at an introductory level, emphasizing key principles and their applications. A bound-in CD-ROM contains the full text of the book to help the reader locate needed information.

This book discusses the role of nutrients and vitamins in cancer prevention and treatment. Basic and clinical scientists from different regions of the world have contributed to this volume. The incidence of cancer is on the rise internationally and many of these cancers appear to be attributable to diet, lifestyle, and environmentally related factors. In recent years, many cancer causing substances and cancer protective agents which are associated with these factors have been identified and extensively tested in experimental models. This work also focuses on newer conceptual ideas that have emerged regarding the functions of nutrients on cellular and molecular levels.

The Structured Clinical Interview for DSM-IV-Axis II Personality Disorders (SCID-II) is an efficient, user-friendly instrument that will help researchers and clinicians make standardized, reliable, and accurate diagnoses of the 10 DSM-IV-Axis II personality disorders as well as depressive personality disorder, passive-aggressive personality disorder, and personality disorder not otherwise specified. Now compatible with DSM-IV, the interview questions have been redesigned to reflect the subject's inner experience. This instrument begins with a brief overview that characterizes the subject's typical behavior and relationships and elicits information about the subject's capacity for self-reflection. It then considers each of the personality disorders in detail. The Questionnaire is a single-use personality questionnaire to be completed by the patient that can be used as a screening tool to shorten the interview. Bound separately, it is sold only with the Interview booklet. The Interview is a single-use booklet that is bound separately but used in conjunction with the Questionnaire. It contains the interview questions and provides space to record responses. At the conclusion of the Interview, the clinician completes the Summary Score Sheet and computes a dimensional score for each personality disorder.

This comprehensive review of scientific research supporting evidence of the relationship between cardiac disease and psychological condition offers practical suggestions for developing a clinical practice, and proposes directions for future research in the new field of "cardiac psychology". Every chapter is written by world-renowned researchers in the field. A theoretical and practical guide, it will interest physicians, clinical and health psychologists, and all professionals who seek to understand the mind-health link.

One of the seminal works of fiction of the 20th century, *The Metamorphosis* finds traveling salesman, Gregor Samsa, inexplicably transformed into a large, monstrous insect-like creature.

*The Diary of a Young Girl*, also known as *The Diary of Anne Frank*, is a book of the writings from the Dutch language diary kept by Anne Frank while in 1942, with zis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding.The family was apprehended in 1944, and Anne Frank died of typhus in the Bergen-Belsen concentration camp in 1945. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short. The diary was retrieved by Miep Gies, who gave it to Anne's father, Otto Frank, the family's only known survivor, just after the war was over. The diary has since been published in more than 60 languages.

Basic epidemiology provides an introduction to the core principles and methods of epidemiology, with a special emphasis on public health applications in developing countries. This edition includes chapters on the nature and uses of epidemiology; the epidemiological approach to defining and measuring the occurrence of health-related states in populations; the strengths and limitations of epidemiological study designs; and the role of epidemiology in evaluating the effectiveness and efficiency of health care. The book has a particular emphasis on modifiable environmental factors and encourages the application of epidemiology to the prevention of disease and the promotion of health, including environmental and occupational health.

A panel of recognized authorities comprehensively review the medical, surgical, and pathophysiologic issues relevant to lung volume reduction surgery for emphysema. Topics range from the open technique and video-assisted thoracoscopic approaches to LVRS, to anesthetic management, to perioperative and nursing care of the patient. The experts also detail the selection of candidates for LVRS, the clinical results and clinical trials in LVRS, and the effects of LVRS on survival rates.

For a brief explosive period in the mid-1970s, the young and the unemployed of Italy's cities joined the workers in an unexpectedly militant movement known simply as *Autonomy* (*Autonomia*). Its "politics of refusal" united its opponents behind draconian measures more severe than any seen since the war. Nanni Balestrini, the poet of youth rebellion, himself a victim of that repression, has invented a remarkable fictional form to express the hopes and conflicts of the movement. In spare but vivid prose, *The Unseen* follows *Autonomy's* trajectory through the eyes of a single working-class protagonist—from high-school rebellion, squatting and attempts to set up a free radio station to arrest and the brutalities of imprisonment. This is a powerful and gripping novel; a rare evocation of the intensity of commitment, the passion of politics.

This is a collection of papers presented at the B Lymphocytes and Autoimmunity conference held on May 21-25, 1996 in Prague. The information presented includes data on B cell subset identification and development, antibody repertoire selection, tolerance induction, and antigen presentation. Each of these has a significant impact on the generation of autoantibodies and the development of autoimmune disease. A multidisciplinary discussion of the basic and clinical aspects of B cell function and autoimmunity is provided.

**Socio-economic inequalities in health are present to a greater or lesser extent in all European countries and the available data suggests that the health gap is increasing. Many studies have been conducted to explain inequalities in health and from them much has been learnt about the different contributory factors. However, in practice it seems hard to translate the knowledge of causes into effective interventions and policies. Reducing Inequalities in Health: a European Perspective. ' brings together an unrivalled collection of contemporary data on successful policies and interventions ' compares differences in approach in several European countries ' includes recent evaluation studies ' discusses conceptual issues for research ' provides examples of good and bad practice in Europe ' draws out the policy and research implications for the future With contributions from leading researchers in 14 different European countries, this book provides a comprehensive source of reference for the reader interested in what really works in the field of health promotion and what sort of policies reduce the health gap.**
