

Soap Note Nursing Documentation

*In the United States and throughout the industrialized world, just as the population of older and sicker patients is about to explode, we have a major shortage of nurses. Why are so many RNs dropping out of health care's largest profession? How will the lack of skilled, experienced caregivers affect patients? These are some of the questions addressed by Suzanne Gordon's definitive account of the world's nursing crisis. In *Nursing against the Odds*, one of North America's leading health care journalists draws on in-depth interviews, research studies, and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis. Gordon examines how health care cost cutting and hospital restructuring undermine the working conditions necessary for quality care. She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals. In Gordon's view, the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from shoddy press coverage of the important role RNs play in the delivery of health care. Gordon also identifies the class and status divisions within the profession that hinder a much-needed defense of bedside nursing. She explains why some policy panaceas—hiring more temporary workers, importing RNs from less-developed countries—fail to address the forces that drive nurses out of their workplaces. To promote better care, Gordon calls for a broad agenda that includes safer staffing, improved scheduling, and other policy changes that would give nurses a greater voice at work. She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation. Finally, Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care.*

How Health Care Cost Cutting, Media Stereotypes, and Medical Hubris Undermine Nurses and Patient Care

With the recent new and radical developments in the health care field that have been introduced at a breathless pace, nurse administrators must work to stay informed of the developments that affect their nursing departments both directly and indirectly. The Nursing Administration Handbook has a long track record, both as a textbook and as a hands-on tool for nurse executives seeking insight and step-by-step guidance in all aspects of administration. The fourth edition of this text surveys the entire field of nursing administration and incorporates the most significant new developments and current practices.

Manual focusing on documenting the occupational therapy process. Each skill is broken down into small steps and taught individually. Includes a template for writing problems, goals, and each section of the SOAP note. Also includes practice worksheets and detachable checklist and summary.

Part of the Springhouse Incredibly Easy! Series(TM), this Second Edition provides current information about charting in a comprehensible, clear, fun and concise manner. Three sections cover Charting Basics, Charting in Contemporary Health Care, and Special Topics. New features include expanded coverage of computerized documentation and charting specific patient care procedures, plus current JCAHO standards both in the text and appendix, chapter summaries, and a new section with case study questions and answers. Amusing graphics and cartoon characters call special attention to important information. Entertaining logos throughout the text alert the reader to critical information, Thought Pillows identify key features of documentation forms, and the glossary defines difficult or often-misunderstood terms.

Because communication among health care professionals can mean the difference between patient life and death, clear and effective patient care documentation is as important as the delivery of care itself. The rehabilitation professional faces formidable documentation responsibilities. Patient care documentation created by the rehabilitation professional must be accurate, comprehensive, concise, objective, and timely. In an interdisciplinary health care environment, documentation must also be expeditiously communicated to other professionals on the health care team.
