Sociable Robots and the Future of Social Relations-J. Seibt 2014-12-18 The robotics industry is growing rapidly, and to a large extent the development of this market sector is due to the area of social robotics – the production of robots that are designed to enter the space of human social interaction, both physically and semantically.

~~Sociable Robots And The Future Of Social Relations ...~~

"Robots that engage with people are absolutely the future. There's no question that's where robotics is moving," says Brian Scassellati, PhD, a professor of computer science, cognitive science and mechanical engineering and director of the Social Robotics Lab at Yale University.

~~The dawn of social robots~~

AI robots are still not sophisticated enough to understand humans or the complexity of social situations, says UNSW's Dr Masimiliano Cappuccio. "So we need to think about how we interact with social and companion robots to instead help us become more aware of our own behaviour, limitations, vices or bad habits," says Dr Cappuccio, the Deputy Director of Values in Defense and Security ...

~~To future: finding common moral ground in human-robot ...~~

This has been made possible by advances in artificial intelligence. There are suggestions the emotional intelligence possessed by social robots in the future will enable them to make a real difference to the lives of vulnerable people in society. Robotics expert Carlos Rioja del Rio, Professor of Engineering at Spain's University of Cadiz, believes there is a growing public interest in social robots.

~~What are social robots—and how can they be used to help ...~~

The group of people that will experience the biggest social impact of robots are children. Robots will enter schools and assist children in learning. But robots can also take over tasks. Children will quickly find out that robots are very good at making homework.

~~Impact of Robots on Society—Positive and Negative ...~~

Due to the boom in the robotics market, there are undoubtedly many more social companion robots to come. The most personalized cognitive assistant's, Olly 's manufacturing is scheduled for 2018. Aido, the promised next-generation family robot will be shipped in the second quarter of 2019.

~~The Top 12 Social Companion Robots—The Medical Futurist~~

The 49 papers and abstracts presented here are from the proceedings of the conference Robo-Philosophy 2014--Sociable Robots and the Future of Social Relations, held in Aarhus, Denmark, in August 2014. Technology, philosophy, psychology, communication, and other researchers from Europe, North America, and Japan consider issues related to social ...

~~Sociable Robots and the Future of Social Relations ...~~

As robotics and autonomous systems flourish, human-robot relationships are becoming increasingly important. They're how we interact and control the technology, from self-driving cars to sex robots....

~~Relationships with Robots: Good or Bad for Humans?~~

Since social robots present a new type of social agent, they have been aptly classified as a disruptive technology, i.e. the sort of technology which affects the core of our current social practices and might lead to profound cultural and social change. Due to its disruptive and innovative potential, social robotics

raises not only.

~~Sociable robots and the future of social relations ...~~

The future of robots and artificial intelligence. Robots and artificial intelligence (AI) bring exciting opportunities to industries, promising to make our future more automated and efficient. A guest piece by Richard van Hooijdonk. With advances in robotics and artificial intelligence continuing to surprise us, there probably is not a single industry being left untouched by these technologies.
