SaaS-based infrastructure and application performance monitoring, tracing, and custom metrics for hybrid and cloud-custom applications. Server & Application Monitor Infrastructure and application performance monitoring for commercial off-the-shelf and SaaS applications; built on the SolarWinds@ Orion@ platform.

IT Service Management Software | SolarWinds  
Recent as of December 17, 2020, 12:00pm CST. SolarWinds was the victim of a cyberattack to our systems that inserted a vulnerability (SUNBURST) within our Orion @ Platform software builds for versions 2019.4 HF 5, 2020.2 with no hotfix installed, and 2020.2 HF 1, which, if present and activated, could potentially allow an attacker to compromise the server on which the Orion products run.

Security Advisory | SolarWinds  
SolarWinds recommends that Orion administrators have local administrator privileges on the Orion server to ensure full functionality of local Orion Platform tools. Orion user accounts limited to the Orion Web Console do not require local administrator privileges.

SAM 2020.2 System Requirements – SolarWinds  
SolarWinds Server & Application Monitor is an intuitive, all-encompassing, yet cost effective, enterprise-level network monitoring service. A concise and practical, hands-on guide that will teach you how utilize SolarWinds SAM.
