304/304L STAINLESS STEEL

Product Description Type

304 is a variation of the base AK Steel 18-8, with a higher chromium and lower carbon content. The lower carbon content minimizes

Online Library Stainless Steel 304 Ak Steel Holding

chromium carbide
precipitation due to
welding and its
susceptibility to
intergranular corrosion.
In some instances Type 304
can be used in the "as-

Online Library Stainless Steel 304 Ak Steel Holding

welded" condition.

304/304L Stainless Steel |
AK Steel

Type 304 is the most
widely used austenitic
stainless steel. It is

Online Library Stainless Steel 304 Ak Steel Holding

also known as "18/8" stainless steel because of its composition, which includes 18% chromium and 8% nickel. Type 304 stainless steel has good forming and welding

Online Library Stainless Steel 304 Ak Steel Holding

properties as well as strong corrosion resistance and strength. This kind of stainless steel also has good drawability. It can be formed into a variety of

Online Library Stainless Steel 304 Ak Steel Holding

shapes and, in contrast to type 302 stainless, can be used without annealing, the heat treatment that softens ...

Type 304 and 304L

Online Library Stainless Steel 304 Ak Steel Holding

Stainless Steel Explained
Aluminized stainless steel
has been used in
automotive exhaust systems
since the 1990s. The
durability, appearance and
overall performance of the

Online Library Stainless Steel 304 Ak Steel Holding

product makes it ideal for roofing and architectural construction panel applications in industrial or corrosive environments.
