*\*\*A SUNDAY TIMES BESTSELLER\*\* Mark Renton from Trainspotting is back – and he's finally a success An international jet-setter, he now makes significant money managing DJs, but the constant travel, airport lounges, soulless hotel rooms and broken relationships have left him dissatisfied with his life. He's then rocked by a chance encounter with Frank Begbie, from whom he'd been hiding for years after a terrible betrayal and the resulting debt. But the psychotic Begbie appears to have reinvented himself as a celebrated artist and – much to Mark's astonishment – doesn't seem interested in revenge. Sick Boy and Spud, who have agendas of their own, are intrigued to learn that their old friends are back in town, but when they enter the bleak world of organ-harvesting, things start to go so badly wrong. Lurching from crisis to crisis, the four men circle each other, driven by their personal histories and addictions, confused, angry – so desperate that even Hibs winning the Scottish Cup doesn't really help. One of these four will not survive to the end of this book. Which one of them is wearing Dead Men's Trousers? But that's what this is, isn't it? The ultimate bitch fight. When John takes a break from his boyfriend, he accidentally meets the girl of his dreams. Filled with guilt and indecision, he decides there is only one way to straighten this out . . . Mike Bartlett's metrosexual play about love and longing provides us with questions of who we are and who we want to be. John's refusal to fix his identity disturbs and disrupts the lives of those around him in this contemporary tale of sex without nudity and struggle without violence. Mike Bartlett's punchy story takes a playful, candid look at one man's sexuality and the difficulties that arise when you realise you have a choice. *Cock* premiered at the Royal Court Theatre, London, on 13 November 2009. It is published here in the Modern Classics series, featuring an introduction by Mark O'Thomas.

From the critically acclaimed author of *Allegedly*, Tiffany D. Jackson, comes a gripping new novel perfect for fans of E. Lockhart and Gillian Flynn about the mystery of one teenage girl's disappearance and the traumatic effects of the truth. Monday Charles is missing, and only Claudia seems to notice. Claudia and Monday have always been inseparable—more sisters than friends. So when Monday doesn't turn up for the first day of school, Claudia's worried. When she doesn't show for the second day, or second week, Claudia knows that something is wrong. Monday wouldn't just leave her to endure tests and bullies alone. Not after last year's rumors and not with her grades on the line. Now Claudia needs her best—and only—friend more than ever. But Monday's mother refuses to give Claudia a straight answer, and Monday's sister April is even less help. As Claudia digs deeper into her friend's disappearance, she discovers that no one seems to remember the last time they saw Monday. How can a teenage girl just vanish without anyone noticing that she's gone? This engaging book explains Rivas's scientifically validated secret: It's not whether you cheat on your diet--because you will--but how and when you do it. Regular weekend cheating tricks your body into permanent weight loss because your metabolism doesn't get used to a certain low-calorie set point.

This new edition of the successful calendars book is being published at the turn of the millennium and expands the treatment of the previous edition to new calendars and variants. As interest grows in the impact of seemingly arbitrary calendrical systems upon our daily lives, this book frames the world in a completely algorithmic form. The book gives a description of twenty-five calendars and how they relate to one another: the Gregorian (current civil), ISO (International Organization for Standardization), Egyptian (and nearly identical Armenian), Julian (old civil), Coptic, Ethiopic, Islamic (Moslem), modern Persian (both astronomical and arithmetic forms), Baha'i (both present and future forms), Hebrew (Jewish), Mayan (long count, haab, and tzolkin), Balinese Pawukon, French Revolutionary (both astronomical and arithmetic forms), Chinese (and nearly identical Japanese), old Hindu (solar and lunisolar), and modern Hindu (solar and lunisolar). Easy conversion among these calendars is a by-product of the approach, as is the determination of secular and religious holidays. Calendrical Calculations makes accurate calendrical algorithms readily available for computer use with LISP, Mathematica, and Java code for all the algorithms included on the CD, and updates are available on the Web. This book will be a valuable resource for working programmers as well as a fount of useful algorithmic tools for computer scientists. In addition, the lay reader will find the historical setting and general calendar descriptions of great interest.

**An investigation into the evolution of the seven-day week and how our attachment to its rhythms influences how we live We take the seven-day week for granted, rarely asking what anchors it or what it does to us. Yet weeks are not dictated by the natural order. They are, in fact, an artificial construction of the modern world. With meticulous archival research that draws on a wide array**

of sources--including newspapers, restaurant menus, theater schedules, marriage records, school curricula, folklore, housekeeping guides, courtroom testimony, and diaries--David Henkin reveals how our current devotion to weekly rhythms emerged in the United States during the first half of the nineteenth century. Reconstructing how weekly patterns insinuated themselves into the social practices and mental habits of Americans, Henkin argues that the week is more than just a regimen of rest days or breaks from work, but a dominant organizational principle of modern society. Ultimately, the seven-day week shapes our understanding and experience of time. This paperback volume contains all the contemporary language Collects and the prayers to be said after Communion, for every Sunday and every major and lesser festival in the year. *INSTANT NATIONAL BESTSELLER NEW YORK TIMES BESTSELLER WINNER of the 2021 Banff Mountain Book Prize in Mountain Environment and Natural History WINNER of the National Outdoor Book Award for Natural History Literature A world-leading expert shares her amazing story of discovering the communication that exists between trees, and shares her own story of family and grief. Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; she's been compared to Rachel Carson, hailed as a scientist who conveys complex, technical ideas in a way that is dazzling and profound. Her work has influenced filmmakers (the Tree of Souls in James Cameron's Avatar), and her TED talks have been viewed by more than 10 million people worldwide. Now, in her first book, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths--that trees are not simply the source of timber or pulp but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard describes up close--in revealing and accessible ways--how trees, living side by side for hundreds of years, have evolved; how they perceive one another, learn and adapt their behaviors, recognize neighbors, and remember the past; how they have agency about their future; how they elicit warnings and mount defenses, compete and cooperate with one another with sophistication: characteristics*

previously ascribed to human intelligence, traits that are the essence of civil societies. And, at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. Simard, born and raised in the rain forests of British Columbia, spent her days as a child cataloging the trees from the forest; she came to love and respect them and embarked on a journey of discovery and struggle. Her powerful story is one of love and loss, of observation and change, of risk and reward. And it is a testament to how deeply human scientific inquiry exists beyond data and technology: it's about understanding who we are and our place in the world. In her book, as in her groundbreaking research, Simard proves the true connectedness of the Mother Tree to the forest, nurturing it in the profound ways that families and humansocieties nurture one another, and how these inseparable bonds enable all our survival.
