

Teaching In Nursing A For Faculty 4th Edition

A must read for nursing students, this book deals with essentials of nursing education, communication and educational technology. Considering the transnational acceptance of our profession, each chapter is written with an international perspective. It is earnestly hoped that the simple yet authentic explanations followed throughout this book with the help of suitable examples will make the subject of nursing education more palatable and interesting to the nursing community.

Salient Features, First of its Kind, Meeting international standards, Simple yet authentic explanations, Enriched with suitable examples, Prepared as your lifelong companion, Well accepted by the nursing community. Book jacket.

Teaching and Learning in a Concept-Based Curriculum: A How-To Best Practice Approach provides specific, practical tools and strategies for teaching and evaluating students in the conceptbased curriculum model. Building on the theoretical underpinnings of concept-based curricula, this text expands into its application and practice. The text includes sample lesson plans and study guides to show how a concept is taught in the classroom, clinical teaching activities that connect classroom and clinical learning, and clinical evaluation tools to assess student competence in a concept-based curriculum.

This engaging book is written for Practice Teachers who need to educate and assess students at advanced level in the practice setting. Including contributions from a range of healthcare workers it provides: ■ guidance on how to create a dynamic and effective experience for the learner ■ support for the teacher, including how to deal with failure and cope with challenging students ■ advice to help readers build their self-awareness and reflect on their role. With references to the latest professional guidelines as well as practical exercises, resources and support material, **Developing Advanced Skills in Practice Teaching** draws together disparate information into one comprehensive resource. It explores the core issues surrounding education in health and social care practice settings and is essential reading for all those who want to operate in this arena at an advanced level.

Be more creative in any setting. Here are nearly 200 practical, relevant, and easy-to-implement teaching strategies that will help engage your students in any classroom setting. Dr. Judith Herrman offers techniques gathered over many years from her own teaching experiences that are adaptable to personal teaching content, meet the needs of a variety of learning styles, and demonstrate innovation in nursing education.

Creative Clinical Teaching in the Health Professions

The Complete Guide to Best Practice in Teaching, Evaluation, and Curriculum Development

Transformative Learning in Nursing

Nurse Educator's Guide to Best Teaching Practice

Third Edition

Handbook of Clinical Teaching in Nursing and Health Sciences

Examines the complexities of teaching and learning nursing, explains the theoretical foundations of student-centered learning, describes various methods and models for student-centered learning in nursing, and explores the issues and challenges of constructing nursing curricula and implementing student-centered pedagogies.

This textbook explores the role nurses can play in educating patients about healthcare. The 15 chapters consider the basic foundations of the education process, the needs and characteristics of the learner, and the appropriate instructional techniques and strategies for teaching and learning. The second edition adds a chapter on technology in education. Annotation copyrighted by Book News, Inc., Portland, OR

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. This innovative text delivers more than 40 evidence-based teaching strategies that educators can use to engage nursing students and enhance their learning in a variety of teaching environments. It provides a wealth of new teaching designs both novice and experienced faculty can use to inspire and motivate learners in the classroom through simulation, online, and in community or hospital settings. Strategies developed by leading clinical nursing and health educators characterize nursing education as a dynamic and highly specialized field that stems from meaningful interactions between learners and educators. For ease of comparison, each practical teaching strategy is organized in a consistent format to include student-centered competencies and nursing education accreditation standards. The text also provides a template and a step-by-step guide on how to customize the strategies to fit the needs of learners and educators. The designs include an emphasis on applications of technologically enhanced innovations in nursing education, interdisciplinary collaboration, and the use of the humanities and art. This text answers the ongoing call for interprofessional education necessary to prepare the next generation of expert nurses in the rapidly changing environment of healthcare. Key Features: Evidence-based research used in the development of each teaching strategy Groundbreaking practices in a variety of environments will challenge the discipline and spark additional innovations throughout nursing Each chapter provides optimal learning outcomes and teaching objectives, preparation resources, modules of implementation, methods to evaluate the effectiveness of each strategy, outlined limitations, and accreditation standards Instructor's Manual included Due to the growing nursing faculty shortage, clinicians are being recruited directly from the practice setting for clinical teaching without formal training in educational strategies. Handbook of Clinical Teaching in Nursing and Health Care serves as a quick-reference for support of clinical teaching for nurses. It allows a clinical instructor to identify a question about clinical teaching and quickly get ideas about how to effectively handle a situation or create the best learning environment within the clinical context.

Evidence-Based Teaching in Nursing

Simulation Scenarios for Nursing Educators, Second Edition

Distance Education in Nursing

Teaching and Learning in Nursing

Connecting to Feelings, Values, and Inner Awareness

Exemplars of Optimal Learning Outcomes

Praise for Educating Nurses "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, *From Detached Concern to Empathy: Humanizing Medical Practice* "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, *Journal of Nursing Education* "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York University

2007 AJN Book of the Year Award Winner Nursing Education in the Clinical Setting provides a practical approach to clinical nursing instruction. Although grounded in adult learning theory, this unique resource provides practical suggestions and addresses common questions and issues. The text incorporates illustrative scenarios, discussion questions, and reflection exercises designed to facilitate thoughtful application of the content. Addresses the role transition for a nurse with clinical expertise to that of clinical nursing instructor. Provides important tips for effectively appraising student performance such as student involvement in self-evaluation and goal setting, and suggestions for how evaluation and appraisal are shared with the student. Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning, including "cognitive" (e.g., critical thinking), "affective" (e.g., caring), and "psychomotor" (e.g., technical skills). Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that contains a variety of supplemental resources, including sample approaches for teaching and evaluation, suggestions for preparing anecdotal notes, and relevant reference material. Incorporates issues related to computer access of patient data banks for students, and the federal regulations mandated by HIPAA and their clinical education implications.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This student-friendly, easy-to-read text is the best resource for the nurse educator. *Teaching Strategies for Nurse Educators, 3e*, prepares graduate nursing students to be nurse educators in settings of staff development, patient education, or academia—covering commonalities of teaching that pertain to all three. Based on a strong foundation in educational theory and practical teaching strategies, constructive information and cutting-edge content emphasize the theories and strategies most likely to be used in the field of nursing and health education. References to the most current evidence-based research on effective teaching practices are imbedded throughout the text. This book guides the nurse educator through the entire teaching process, from planning learning to conducting classes, applying traditional teaching methods and innovative technology, both in the classroom and within the context of distance learning platforms. After studying this text, the new (or renewed) nurse educator will be able to teach with a sound understanding of basic learning theory and an excitement about the many approaches she or he can use to achieve desired learning outcomes. *Teaching and Learning Experience* This book offers a current look at teaching strategies for educators in the nursing and health fields. It provides: Overview of teaching and learning processes: Focuses on understanding the learning process and the many variables that affect learning Teaching strategies: Covers advantages and disadvantages, purposes and uses of the methods, and research on the strategies that are discussed Superior pedagogical features: Gives students the tools to master key concepts faster and more effectively

Teaching nursing students in a clinical setting with patients differs greatly from teaching in a classroom. It can be a daunting task if one is not prepared and mentored. This book provides a concise and accessible guide for nursing instructors leading students in the healthcare agency for the first time, as well as experienced educators who are interested in exploring new teaching strategies. It covers many aspects of the clinical instructor role including: meeting the nurse manager organizing and documenting your clinical day creating clinical student assignments objectively evaluating student's individual performance acknowledging diversity and inclusiveness tracking progress and handling student errors In addition, the book discusses some of the more complex issues surrounding the role of the clinical instructor such as accountability for nursing care, documentation and medication administration carried out by students. The book features numerous forms and charts to assist in organizing and managing the teaching

experience, as well as situational scenarios to help prepare instructors for unique situations that arise during the clinical experience. Written by authors with extensive experience in clinical care and teaching, this book will be an invaluable guide for all clinical nursing instructors, both novice and experienced. Examples of tools in the book and online downloadable forms to support an organized clinical experience for a new instructor accompany this publication.

Clinical Teaching Strategies in Nursing, Fifth Edition

Teaching in Nursing and Role of the Educator, Third Edition

Developing Advanced Skills in Practice Teaching

A Case-Based Approach

A Guide for New Nursing Clinical Instructors

Teaching Strategies for Nurse Educators

This book presents essential teaching skills and tools for nurse educators. It begins with a discussion of the trends in nursing education and the principles of teaching and learning. The book then explores topics such as classroom teaching, clinical experiences, teaching in the simulation laboratory, and online learning. Each chapter discusses the basics of teaching and learning in the specific environment, followed by scenarios that focus on the issues encountered by nursing faculty in these settings. The scenarios present the key issues under consideration, recommend actions that faculty members can institute to address the issues, and describe rationales and solutions based on best evidence. The book also includes specific tools designed to assist nurse educators in preparation for the teaching role, such as examples of course syllabi, program outcomes, clinical contracts, and action plans. *Nurse Educator's Guide to Best Teaching Practice* is a valuable resource for novice and experienced educators in managing the challenges inherent in nursing education.

The fourth edition of this highly acclaimed text continues to provide a comprehensive framework for planning, guiding, and evaluating learning activities for graduate and undergraduate nursing students in numerous clinical settings. A respected resource for clinical faculty, it addresses the distinct requirements of clinical learning as opposed to classroom learning and provides proven strategies to maximize clinical education. The revision features expanded content on teaching graduate students, regulatory issues affecting distance education, and the use of social media. It covers establishing and using dedicated education units (DEUs), the challenges of student access to electronic health records and documentation of care, and reducing the demands of clinical staff members when multiple students rotate through a particular setting.

This book aims to assist clinical teachers in the practice of clinical teaching. It assumes that clinical teachers will bring to their task a background knowledge of educational principles, experience in a clinical nursing field, knowledge of substantive nursing content, a love of teaching and a desire to share with their students the joys, tears, challenge and wonder of learning in the clinical setting. The format is designed around a set of commonly encountered problems and encourages readers, whether on the threshold of a career as a clinical teacher or those who are experienced, to think through their responses to the problem situation before reading on to a disclosure of possible courses of action. In brief, the book is a companion to *Teaching Nursing: A Self Instructional Handbook* (Ewan and White, 1984). The authors' interest in clinical teaching can be traced through a number of years in a variety of teaching careers with multidisciplinary health professional groups, of whom nurses comprise the majority of practitioners. As senior lecturers in the School of Medical Education, the authors were involved in developing and teaching a Master of Health Personnel Education Degree course; the students (or Fellows) in that programme were all graduates from a broad range of health care disciplines - nursing, medicine, physiotherapy, occupational therapy, nutrition, dentistry, health education, health resources management, radiography, social work, community development, occupational safety and health. All the information you need in one textbook! This all-inclusive text for Nurse Educators delivers comprehensive, evidence-based guidance on the essential components of teaching, including learning theories, teaching methods, new technologies for teaching, curriculum development, evaluation and testing, and accreditation. The text delivers the full scope of knowledge necessary for novice and experienced faculty to become competent teachers in nursing. This third edition features new content on the transition from clinician to educator. There is also a new chapter on nursing professional development and teaching in clinical settings and updated teaching strategies for active learning, clinical judgment, and online teaching. The text is designed to help educators prepare for the certification exams. The text also addresses varied learning styles and how to accommodate them, new developments in simulation, standardized patients, OSCEs, clinical teaching, interprofessional education, and evidence-based teaching. New to the Third Edition: Chapter on the transition from clinician to educator, plus expanded content throughout on becoming a nurse educator Addresses inclusivity and developing an inclusive learning environment for people with different learning styles Strategies to promote active learning, clinical judgment, and higher level learning, and teaching online Updated content on simulations, the use of standardized patients, OSCEs, clinical teaching, and clinical evaluation Chapter on accreditation of nursing programs and developing a systematic program evaluation plan Chapter on nursing professional development and teaching in a clinical setting Key Features: Written by experts who seamlessly integrate evidence-based research and practical strategies Serves as a thorough study guide for nurse educator certification exams Covers practical teaching strategies, simulation, online education, technology, interprofessional education, clinical teaching and evaluation, and test construction Includes case examples and other examples to support content and "how-to" tips Includes a high quality online course ready for an instructor's use: sample syllabus, PowerPoints, and a complete 20-module online course

So You Want to Teach Clinical?

The Future of Nursing

**Leading Change, Advancing Health
Educating Nurses
Teaching Nursing
Mastering Academe**

Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

2011 AJN Book of the Year Winner in Nursing Education! Updated, revised, and expanded, this fourth edition of a "survival manual" for new teachers offers the most current thinking in nursing education, from practical nursing, to baccalaureate and master's programs. It also serves as a comprehensive guide for novice educators in classroom and clinical teaching settings. Chapters offer helpful strategies for making clinical assignments, preparing lectures and seminars, all aspects of testing and grading, supervision, facilitating group study, selecting textbooks, guiding independent study, and helping students improve their writing skills. This fourth edition also features best practices and lessons learned from partnerships between university and clinical settings, and contains new strategies for conducting online teaching, including the use of technology. Specific indicators help educators identify appropriate lessons for different course levels. The guide additionally provides links to online resources in each chapter, including some with revised templates for checklists and rubrics. Key Features Distills best practices and lessons learned from academic and clinical world partnerships Serves as a quick refresher for the experienced educator reentering a classroom or clinical teaching assignment Addresses new cross-disciplinary "team" approach to assessment and intervention Features links to online resources in each chapter, including revised templates for checklist and rubrics along with a digital adjunct for educator use Authored by noted national and international experts in nursing education

Prepare for success as a nurse educator. Recommended by the National League for Nursing for comprehensive Certified Nurse Educator preparation, this resource is the only book of its kind to cover all three components of teaching: instruction, curriculum, and evaluation. As it walks you through the day-to-day challenges of teaching, it provides guidance on such topics curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advancements in technology and information. This new edition adds updated information reflecting the latest trends and advances in both education and nursing.--Adapted from back cover.

Awarded second place in the 2013 AJN Book of the Year Awards in the Nursing Education/Continuing Education category This AJN award-winning text is the only book to teach evidence-based practice (EBP) content grounded in a tested philosophy of teaching and learning. It provides the tools, perspective and context for health educators and practitioners to implement evidence-based care practices and evaluate their efficacy. Reflecting four years of successful experiences in helping academic agencies understand and implement EBP, this new edition has been reorganized to include updated information and five new chapters. It stresses the importance of mentorship in creating EBP and illustrates how mentorship can be designed and implemented to promote EBP. The text clarifies three principal values: How to integrate EBP into academic curricula How to implement an EBP model in clinical settings (for graduate, second career, and CE students) How to address teaching and learning strategies for specific user groups Teaching Evidence-Based Practice in Nursing will be of value to clinical and academic educators, educational and clinical administrators, unit managers, students attending CE programs, and students in nursing education graduate programs. Key Features: Revises and expands upon AJN Book of the Year Award first edition Reflects knowledge gained from four years of successful experiences in teaching and learning EBP since publication of first edition Provides comprehensive and innovative strategies for mentoring and teaching EBP in education and practice scenarios Describes how to implement EBP at undergraduate levels, for second career students, and in continuing education

Nurse Educator Core Competencies

Principles of Teaching and Learning

Clinical Teaching in Nursing

The Principles and Practice of Nurse Education

Innovative Strategies in Teaching Nursing

The New Nurse Educator

Written by luminaries in the field of nursing education, this is the only current and comprehensive compendium of important topics in nursing education. It contains more than 175 detailed entries, and will be a valuable reference text for doctoral- and master ' s-level nursing students, nursing faculty, university and hospital libraries worldwide, and hospital nursing departments and schools. The listing of entries has been carefully culled from recent nursing literature and six volumes of the Annual Review of Nursing Education. Each entry follows a standard template that includes definition, application in nursing education, a synopsis including a brief summary of what is in the literature on the topic, and a concluding summary discussing future development in nursing education. Listings are alphabetized for easy access, and are accompanied by a comprehensive reference list. KEY FEATURES: The only current compendium of important topics in nursing education Includes all topics relevant to nursing education based on a review of the literature Alphabetized and consistently formatted for easy access to information Includes comprehensive reference lists per topic Written by expert nurse educators A listing of teaching topics compiled by the editors is available to instructors

"Providing a critical discussion of issues faced by educators when ideas from outside of nursing conflict with normatively inspired outcomes that students are required to accept, this book explores the interplay of complexity and values in nurse education from a variety of vantages. Thought-provoking, challenging, and occasionally rumbustious in tone, this volume has something to say to both nurse educators (who may find cherished practices questioned) and students. Moreover, given the breadth and nature of subjects covered the book will also appeal to anyone concerned about and interested in nursing's professional development/trajjectory"--

This work covers selected contemporary issues in nursing education and deals with the role of the nurse educator and that of the student, as well as with aspects of a dynamic teaching process. It is a source of principles and practical skills required by the nurse educator.

Although nursing education today offers copious amounts of information geared to test preparation, it does not adequately harness the emotional intelligence of individual studentsó a quality that can greatly enrich the nursing profession. This expert resource for understanding the importance of affective teachingó what it is and how to incorporate it into the classroomó provides a plentiful array of affective teaching pedagogy and references. Drawing from the emotional and social intelligence movement, the text offers both new and traditional insights into the importance of linking intellectual and emotional intelligence in knowledge acquisition. It provides helpful strategies for nurse educators to enrich their teaching with affective teaching strategies, methods, and skills in the classroom, and describes successful

models for creating an affective teaching infrastructure that will endure. Designed for use in masterís and doctoral programs in nursing and health care education, the book espouses a paradigm that is embraced by leaders in education and major institutions. It discusses the major themes of entrenched, traditional teaching methods, and contrasts them with the theory, research, and practice underlying affective teaching in nursing. The book follows the history of affective teaching from its inception in Bloomís Taxonomy to the present day. It addresses teaching infrastructure needs, affective teaching models, tools for measuring the results of affective teaching, the use of affective teaching in distance learning and at conferences, and international perspectives. The text also identifies the risks and advantages of affective teaching, and how they have been addressed by a variety of nursing educators and encourages reflective practices that help students gain inner awareness. It will be a valuable addition to the teaching arsenal of nurse educators who wish to go beyond the objective domain of teaching to explore the enriching possibilities of subjective knowing. **Key Features:** Provides the most authoritative information available on affective teaching in nursing Supports NLNís and AACNís nurse educator competencies to achieve desired outcomes in the cognitive, affective, and psychomotor areas of learning Clarifies affective pedagogy, how to discuss it, and what it implies for teaching success Addresses philosophy, taxonomy, teaching infrastructure needs, affective teaching models, and assessment tools Covers the use of affective pedagogy with distance learning and at conferences

Teaching Evidence-Based Practice in Nursing
Dialogues on Professional Education

Teaching in Nursing

Developing a Student-centered Learning Environment

Making It Real

Print+CourseSmart

Evidence-Based Teaching in Nursing: A Foundation for Educators, Second Edition focuses on providing potential and current nursing faculty with the tools and knowledge they need to achieve highly successful outcomes for teaching nursing students and staff. The Second Edition also concentrates on the full role of nursing faculty and not just the educational process. This robust text provides concrete examples of best practices within nursing education and has been crafted in a manner to excite faculty members to create a learning environment grounded in best practices and evidence. Today's healthcare environment demands that practice be based on evidence, so the educational process should also be based on best practice and evidence.

A significant body of knowledge is the basis for a holistic, caring and scientific evidence-based nursing education in practice for professional development. Quality teaching leads to good learning and both aspects are two of the main issues of quality assurance in nursing education today. To begin with, not all nursing students have the same levels of motivation or learning abilities. It is with cognisance of providing quality care for patients that the role of the nurse educator has to be to enhance nursing students' learning using scientific evidence based teaching. Research around teaching and learning processes is an important part of the delivery of quality education, which in turn impacts on students' learning results and experiences, thereby, ensuring holistic biopsychosocial care to patients. The main aim of teaching and learning in nursing, at all levels, is to enhance the nurses' contribution to assist the individuals, families and communities in promoting and preserving health, well-being and to efficiently respond to illnesses. We hope that this book can be used as a resource to increase the body of knowledge in teaching and learning in nursing, thereby enhancing the role and contribution of health care professionals to clinical practice.

Designated a 2013 "Core Title" and "Essential Purchase" by Doody's! This highly acclaimed text provides a comprehensive framework for planning, guiding, and evaluating learning activities for undergraduate and graduate nursing students in a wide variety of clinical settings. The fifth edition updates this unequalled source of essential information for all faculty members—full time, part time, adjunct, and preceptors—responsible for clinical teaching. It encompasses current trends in health care and nursing education with expanded content on ways to maximize the clinical learning experiences of nursing students, use new technologies in clinical teaching, teach and evaluate student performance, and address ethical and legal issues in clinical teaching. Included is new content on establishing and using dedicated education units, integrating simulation with clinical education, using new technologies for clinical learning, teaching and evaluating performance in distance education, promoting interprofessional education in clinical settings, integrating Quality and Safety Education for Nurses (QSEN) in clinical courses, using standardized patients, and developing partnerships with clinical sites. Special features include guidelines for developing clinical sites, planning learning activities and assignments, observing and evaluating students in clinical practice, and using preceptors. With an arsenal of practical and creative tools to help both experienced and novice nurse educators, the text is also a valuable resource for individuals preparing to take the clinical nurse educator (CNE) exam. **New to the Fifth Edition:** Updated with current trends in health care and nursing education New chapter on interprofessional education and clinical teaching from a noted expert Expanded content on maximizing the clinical learning experiences of nursing students Clinical teaching and evaluating students at a distance Use of social media and new technologies for clinical teaching Ethical and legal issues in clinical teaching New content on using dedicated education units Developing partnerships with clinical staff and sites Challenges of student access to electronic health records and electronic documentation of care Strategies to promote student learning about QSEN Use of simulations and integration of simulation with clinical education Latest revisions of the CNE test plan Recommendations for service learning and international clinical learning sites **Key Features:** Delivers a scholarly, in-depth examination of current trends and issues in clinical education Provides evidence-based methods for clinical teaching in nursing education Includes practical exhibits illustrating best practices in clinical teaching and evaluation Highlights content in each chapter related to CNE

exam blueprint Offers a vast toolkit for teaching and learning including Instructor's Manual and PowerPoint presentation

Planning and Delivering the Curriculum

Encyclopedia of Nursing Education

Routledge International Handbook of Nurse Education

A Guide for Faculty

Complexity and Values in Nurse Education

Affective Teaching in Nursing

While vast numbers of nurses across the globe contribute in all areas of healthcare delivery from primary care to acute and long-term care in community settings, there are significant differences in how they are educated, as well as the precise nature of their practice. This comprehensive handbook provides a research-informed and international perspective on the critical issues in contemporary nurse education. As an applied discipline, nursing is implemented differently depending on the social, political and cultural climate in any given context. These factors impact on education, as much as on practice, and are reflected in debates around the value of accredited programmes, and on-the-job training, apprenticeship, undergraduate and postgraduate pathways into nursing. Engaging with these debates amongst others, the authors collected here discuss how, through careful design and delivery of nursing curricula, nurses can be prepared to understand complex care processes, complex healthcare technologies, complex patient needs and responses to therapeutic interventions, and complex organizations. The book discusses historical perspectives on how nurses should be educated; contemporary issues facing educators; teaching and learning strategies; the politics of nurse education; education for advanced nursing practice; global approaches; and educating for the future. Bringing together leading authorities from across the world to reflect on past, present and future approaches to nurse education and nursing pedagogy, this handbook provides a cutting-edge overview for all educators, researchers and policy-makers concerned with nurse education. Winner of the prestigious AJN Book of the Year award, Teaching in Nursing is a key resource in the dynamic structure and function of preparing the nurses of the future for teaching careers. Faculty must be conditioned to look forward and teach in new ways; diversity of students, curriculum development, redesigning of health care systems, and information and technology advances are just a few of the growing challenges that facing those who choose to instruct. This result is largely due to the editors' standing in the nursing community and their ability to secure only the very best contributors. This is only 3-in-1 nursing education resource available! While most other texts address only one component of teaching, Teaching in Nursing covers three-teaching, curriculum, and evaluation. It provides comprehensive, contemporary guidelines to help instructors meet the day-to-day challenges of teaching. Instructors will also find the guidance they need to ensure that their teaching practices reflect the evolving health care environment. The authors reference current literature in nursing education, as well as the classics in nursing, education, and other fields. Judy Halstead chairs the task force on "Development of Nurse Educator Competencies" for the National League for Nursing, and is on the front line of influencing the trends in teaching education. Dr. Halstead is also the program evaluator for the CCNE. Both Drs. Halstead and Billings serve on the NLN Think Tank for Nursing Education and are frequently sought as educational consultants. First resource to cover teaching, curriculum, and evaluation of students; the three essential components of teaching within the clinical setting. Includes contributing authors that are nationally recognized scholars in their field. Presents models of clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice Provides strategies to promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Provides online teaching resources and tools for faculty to use for both classroom and clinical settings Utilizes end of chapter summaries to enable students to draw conclusions based on the chapter content. Incorporates up-to-date research and literature that looks ahead to the needs of the future. New chapter written by Diane Billings and Judith Halstead on the utilization of web-based courses and courseware. New online Evolve page with Weblinks. New features (tables, boxes) to further guide readers and provide visual examples and references. Incorporates the most complete content for teaching the 21st century nurse with revised and updated content on international teaching, service-education connections, and generational teaching and learning. This book, now in its fourth edition, has been updated to include material focused on evidence-based practice. Covering the complete spectrum of education as applied to nursing and health care professions, this book maintains the blend of theoretical principles and practical applications that has proved successful over the preceding three editions. Among the important developments discussed are the replacement of UKCC and the four National Boards with a new Nursing and Midwifery Council, the initiative to establish the National Institute for Clinical Excellence and the move to incorporate clinical effectiveness into the clinical governance framework. Frank Quinn brings together all the major changes that apply to educators within the National Health Service, making this essential textbook an authoritative source of guidance, up-to-date information and reference.

The World Health Organization has developed these Nurse Educator Core Competencies to enable

educators to effectively contribute to the attainment of high quality education, and the production of effective, efficient and skilled nurses who are able to respond to the health needs of the populations they serve. This will enable the attainment of objectives one and two of the Global strategy on human resources for health: Workforce 2030 and is also a priority in the updated Global strategic directions on nursing and midwifery 2016-2020. The aim of this publication is to provide a clear outline of Nurse Educator Core Competencies and performance expectations, which can form the basis for developing a competence-based curriculum encompassing the cognitive, affective and psychomotor skills and behaviors expected of nurse teachers. The competencies are intended to help guide the educational preparation of nurse teachers; ensure educational quality and accountability; and, ultimately, contribute to improving the provision of nursing care and outcomes of health services. Much effort has gone into the preparation of the Nurse Educator Core Competencies. It is the aim of the World Health Organization that they will facilitate nurse educators to attain increased proficiency in assisting student nurses to acquire all the knowledge, skills and attitudes necessary to practice nursing effectively in the 21st century.

Principles of Teaching and Learning for Nursing Practice

Clinical Teaching Strategies in Nursing, Fourth Edition

An International Perspective

Nursing Education in the Clinical Setting

Teaching and Learning in a Concept-Based Nursing Curriculum

Creative Teaching Strategies for the Nurse Educator

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Nursing Education provides a strategic guide and practical focus to curriculum planning and development. It will help all those involved in the provision of nursing education to understand the issues involved at the different stages of preparing a nursing curriculum which: - meets both professional and academic requirements; - integrates theory and practice; - enables students to achieve the skills and competencies they need for professional practice; - includes different methods of teaching and learning; - provides clear guidance for student selection and assessment. Balancing theoretical principles with practical application, and linked closely to the NMC's 2010 standards for pre-registration nursing, Jennifer Boore and Pat Deeny illustrate clearly and accessibly how to develop tailored education programmes so that nurse educators and clinicians in practice can enable their students to provide up-to-date and appropriate patient care.

For healthcare professionals, clinical education is foundational to the learning process. However, balancing safe patient care with supportive learning opportunities for students can be challenging for instructors and the complex social context of clinical learning environments makes intentional teaching approaches essential. Clinical instructors require advanced teaching knowledge and skills as learners are often carrying out interventions on real people in unpredictable environments. Creative Clinical Teaching in the Health Professions is an indispensable guide for educators in the health professions. Interspersed with creative strategies and notes from the field by clinical teachers who offer practical suggestions, this volume equips healthcare educators with sound pedagogical theory. The authors focus on the importance of personal philosophies, resilience, and professional socialization while evaluating the current practices in clinical learning environments from technology to assessment and evaluation. This book provides instructors with the tools to influence both student success and the quality of care provided by future practitioners.
