An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavín, Owen G. Parry, Alice Butler, Soojin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

An examination of young people's everyday new media practices—including video-game playing, text-messaging, digital media production, and social media use. Conventional wisdom about young people's use of digital technology often equates generational identity with technology identity: today's teens seem constantly plugged in to video games, social networking sites, and text messaging. Yet there is little actual research that investigates the intricate dynamics of youths' social and recreational use of digital media. Hanging Out, Messing Around, and Geeking Out fills this gap, reporting on an ambitious three-year ethnographic investigation into how young people are living and learning with new media in varied settings—at home, in after-school programs, and in online spaces. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and Geeking Out is distinctive for its combination of in-depth description of specific group dynamics with conceptual analysis.

Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Thrilling and revelatory, *The Shock Doctrine* cracks open the secret history of our era. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed.

It was supposed to be an easy job: find the Dark Star Revolution Starships, destroy them, and go home. But a booby-trapped vessel decimates the Meridian Alliance fleet, leaving Serengeti-a Valkyrie class warship with a sentient AI brain-on her own; wrecked and abandoned in an empty expanse of space. On the edge of total failure, Serengeti thinks only of her crew. She herds the survivors into a lifeboat, intending to sling them into space. But the escape pod sticks in her belly, locking the cryogenically frozen crew inside. Then a scavenger ship arrives to pick Serengeti's bones clean. Her engines dead, her guns long silenced, Serengeti and her last two robots must find a way to fight the scavengers off and save the crew trapped inside her.

More astounding stories of rare guitar finds and the music legends who owned them. Do you dream of finding a 1954 Stratocaster or 1952 Gibson Les Paul online, at a garage sale, or in the local penny saver? How about virtually rubbing elbows with one of your favorite rock legends? Following up his first-of-its-kind *The Strat in the Attic*, musician, journalist, and "guitarchaologist" Deke Dickerson shares the stories behind dozens of more astounding finds including: A rarer-than-hens-teeth 1966 Hallmark Sweep-Wing that originally belonged to Robbie Krieger of the Doors, stashed away in an attic in Alaska for forty years! A crazy-valuable 1958 Gibson Flying V belonging to a Chicago bluesman—who, it turns out, also happens to have an equally rare 1958 Gibson Explorer! An out-of-the-blue, a "to whom it may concern" email leads the author to a trailer park in Salem, Oregon, where one of Bob Willis and the Texas Playboys' original 1940's Epiphone Emperor archtops is waiting to be purchased for a song! Luther R.C. Allen relates the tales of buying Nat "King" Cole Trio guitarist Oscar Moore's Stromberg Master 400 archtop and of being gifted a 1953 Standel amp from Merle Travis! Buddy Merrill, the amazingly talented guitarist from the Lawrence Welk show, gives his 1970 Micro-Frets

Huntington to the author, but only if the "promises to PRACTICE." Photos of the guitars and other exciting memorabilia round out a package that no vintage-guitar aficionado will want to be without! "Deke Dickerson's love for guitars and his genius for finding some of the rarest birds in the musical aviary is matched by his not-inconsiderable writing chops. The man knows how to tell a great story." --Jonathan Kellerman

The Audio Expert is a comprehensive reference that covers all aspects of audio, with many practical, as well as theoretical, explanations. Providing in-depth descriptions of how audio really works, using common sense plain-English explanations and mechanical analogies with minimal math, the book is written for people who want to understand audio at the deepest, most technical level, without needing an engineering degree. It's presented in an easy-to-read, conversational tone, and includes more than 400 figures and photos augmenting the text. The Audio Expert takes the intermediate to advanced recording engineer or audiophile and makes you an expert. The book goes far beyond merely explaining how audio "works." It brings together the concepts of audio, aural perception, musical instrument physics, acoustics, and basic electronics, showing how they're intimately related. Describing in great detail many of the practices and techniques used by recording and mixing engineers, the topics include video production and computers. Rather than merely showing how to use audio devices such as equalizers and compressors, Ethan Winer explains how they work internally, and how they are spec'd and tested. Most explanations are platform-agnostic, applying equally to Windows and Mac operating systems, and to most software and hardware. TheAudioExpertbook.com, the companion website, has audio and video examples to better present complex topics such as vibration and resonance. There are also videos demonstrating editing techniques and audio processing, as well as interviews with skilled musicians demonstrating their instruments and playing techniques.
