Business Process Reengineering (BPR) is the key management trend of the day. Ivar Jacobson's book The Object Advantage presents a blueprint for re-designing a business according to BPR principles. It uses one method to integrate his work of reengineering a business, its processes and its vital infrastructure the information system.

According to Ivar Jacobson's book, The Object Advantage: Business Process Reengineering With Object Technology, this type of modeling more closely reflects the company's reality. The "objects" in this type of BPR are occurrences of information or behavior that means something to the company, such as specific customers, invoices, work tasks, or events.
