

Toshiba Zaboon

Written in an engaging and accessible style, this first broadly focused compensatory history of technology not only includes women's contributions but begins the long-overdue task of redefining technology and significant technology and to value these contributions correctly. Stanley traces women's inventions in five vital areas of technology worldwide--agriculture, medicine, reproduction, machines, and computers--from prehistory (or origin) forward, profiling hundreds of women, both famous and obscure. The author does not ignore theory. She contributes a paradigm for male takersovers of technologies originated by women.

Over 2.75 million sold in the TouchPoints line! Finding out what God has to say about our particular needs is what the TouchPoints series is all about. TouchPoints for Men puts God's words of encouragement and affirmation at the fingertips of men. Each entry contains thought-provoking questions on a particular topic, answers from Scripture, and a promise from God's Word.

Your room is darkened. lit only by evocative, flickering candles. You sit in a chair, eyes closed, in a deep, meditative state. Your hand rests on a pad of paper on a table. Resting in your hand is a pen. Slowly the pen begins to move. You don't seem to be in control, yet, feeling safe, you allow the pen to move over the paper. Finally, your hand stops. You come out of your trance and look at the result. The paper is covered with words and drawings, ready for you to interpret. You smile at what an amazing thing it is that you have accomplished. This is not a far-fetched fiction. It is something you can learn to do easily and in a short time if you follow the directions in Edain McCoy's How to Do Automatic Writing. In this book you will discover that there are fifteen steps to follow when doing automatic writing. McCoy clearly explains each step so you can do it. Of course, even before you get there you will learn about the history of automatic writing and theories about how it works. You will also be given exercises and techniques to prepare yourself for this amazing experience. This includes everything from meditation to breathwork. Then, when you have finished your automatic writing session, you will learn how to interpret any words or symbols you have created. And what can you use this for? You can get answers to questions. You can get wisdom from your higher self. You can communicate with the spirits of loved ones, angels or spirit guides. You can even do readings for people. The possibilities are almost endless. And the really great thing about this is that it can be done at a moment's notice almost anywhere. All you need is a pen and some paper. The book also includes methods to encourage your development of the skill, ranging from astrological timing to the use of stones and herbs. The time is "write" for you to learn this skill. This book will do it.

Blue Period 8

Lonely Planet's Wild World

A comprehensive overview of a classic hockey team includes season-by-season summaries; complete stats; biographies of all Hall of Fame players, coaches, general managers and owners; details of every trade, draft pick and free-agent signing; and much more.

Best known for her portraits of Depression-era America, Lange put a human face on this difficult period, and revolutionized documentary photography. This exquisitely produced volume surveys her work throughout the 1930s and 1940s.

From Lonely Planet, the world's leading travel guide publisher, Wild World, the follow-up to the super-sized bestseller Beautiful World, is a vivid and compelling portrait of the world in which we live. Featuring breath-taking images of the natural world, this gorgeous

collection of full-page photographs, carefully curated by Lonely Planet's photography experts, brings the world's wildest corners into your home. Incredible and majestic wildlife spectacles and natural phenomena are spellbindingly on display in this beautiful, no-expense-spared hardback. Authors: Lonely Planet About Lonely Planet: Since 1973, Lonely Planet has become the world's leading travel media company with guidebooks to every destination, an award-winning website, mobile and digital travel products, and a dedicated traveller community. Lonely Planet covers must-see spots but also enables curious travellers to get off beaten paths to understand more of the culture of the places in which they find themselves. 'Lonely Planet. It's on everyone's bookshelves; it's in every traveller's hands. It's on mobile phones. It's on the Internet. It's everywhere, and it's telling entire generations of people how to travel the world.' -- Fairfax Media 'Lonely Planet guides are, quite simply, like no other.' - New York Times Lonely Planet guides have won the TripAdvisor

Traveler's Choice Award in 2012, 2013, 2014, and 2015. Important Notice: The digital edition of this book may not contain all of the images found in the physical edition.

Sine Qua Non for Corporate Social Performance

Ultrafine bubbles (UFBs) are gas-filled bubbles with a diameter smaller than 1 μm. They are sometimes called bulk nanobubbles because these are not on a solid surface but inside a bulk liquid (water). They are already being used in commercial processes such as cleaning and plant cultivation. However, many mysteries still exist with respect to UFBs, such as mechanisms of stability, OH radical formation, and biological and medical effects. This is the first book on UFBs that reviews research done on them. It is helpful for those interested in the fundamentals of this emerging field and its applications, including cleaning, biological, medical, and dental students and researchers.

Brittany Wilkins dreamed of engineering the world around her because she wanted to live for a purpose greater than self. Letters to My Sisters in Engineering describes her journey of becoming an engineer. Through Strength, Tenacity, Empowerment, and Metamorphosis, she has persevered against all obstacles in her ten-year career. Leading by example, her experience is a testimony for the next generation of black female engineers. She shares lessons and advice to enlighten young women on how to succeed in a male-dominated STEM industry. Letters to My Sisters in Engineering inspires girls and women to answer the call and use their gifts to innovate a better world for humanity. This memoir/self-help book will encourage you to fulfill your destiny by being a purpose-driven engineer.

Fundamentals and Practice of Nuclear Logging: A Subsurface Measurement Technique exposes the reader to the basic physics utilized in nuclear measurements, exploring how it is used in tool design and interpretation. Nuclear/atomic techniques, first used in 1939 to probe the subsurface, are now a key component of the suite of down-hole physics measurements used to study geological media. These techniques allow both static and dynamic characterization of geological formations and of well-bores, with a range of interpretations unattainable from any other single subsurface technique

Fundamentals and Practice of Nuclear Logging: A Subsurface Measurement Technique discusses safety and security challenges inherent in current radionuclide-based techniques and the research underway to mitigate these risks, using advanced generator-based methods where the physics and interpretation can change. The book is designed for upper division and graduate students to gain an insight on the fundamentals and as a reference for practitioners. Relates the physics of the nuclear measurements to the intended geological interpretation. Introduces advanced techniques being developed to obtain additional information from the geology and to determine multiple parameters, simultaneously, using the same device. Includes practical case studies, hands-on exercises, well-paced quizzes, and a list of suggested projects, similar to those used by the author in his course at the University of California, Berkeley

Eula is the only square cat in town—and she doesn't think there's anything hip about it. Everything that normal cats do is hard for her: She can't get her square paw into mouse holes, she can't wear her favorite circle skirt, and all of her friends are round! Eula is sad until her two best friends show her just how well a square cat can fit into a round world. Debut author/illustrator Elizabeth Schoonmaker applies her dry wit to the topic of fitting in, and the spare text and appealing trim size of Square Cat make it ideal for repeated readings.

Children will delight in these classic fairy tales from the Brothers Grimm, retold for a younger generation, with clear, easy-to-read type and wonderful colour illustrations throughout.

Winner of the 2020 Manga Taisho Grand Prize! A manga about the struggles and rewards of a life dedicated to art. Popular guy Yatora realizes he's just going through the motions to make other people happy and finds himself in a new passion-painting. But untyethering yourself from all your past expectations is dangerous as well as thrilling... Yatora studies hard and gets good grades, and he parties hard, staying out late drinking and watching soccer with his friends. He checks all the boxes he needs to be the perfect high school student. But it all starts to feel empty, and he begins to wonder what part of his life expresses who he is...or even if he has a unique voice at all. Then he wanders into the art room one day, and a lone painting captures his eye, awakening him to a kind of beauty he never knew. Compelled and consumed, he dives in headfirst—and he's about to learn how savage, unforgiving, and exhilarating creating art can be!

Introduction to International Trade and Finance is written for a one semester course in international economics found in undergraduate business programs. The author, Dominick Salvatore, is very well known and respected in this segment of the market. He presents the material using a real-world perspective in order to help readers gain a better understanding of critical concepts.

Features new and groundbreaking research on recent changes in the English verb phrase.

Meet Dr. Ichiro Irabu. In today's Japan, a traditional land beset by modern pressures and confusion, image-conscious people just can't be seen going to a therapist. Instead they visit "doctors of neurology" like Dr. Irabu. What makes the good doctor unique is his penchant for sharing his patients' stress-related ailments, aiding and abetting their compulsions .. and making them just much worse before they get better. In this sardonic collection by Hideo Okuda, we meet the many faces of dysfunction in modern Japan. In "In the Pool," a magazine editor's midlife crisis sends him deep into an addiction to swimming that threatens his job and his marriage. "Making a Stand" focuses on a man who, recently left by his wife, suffers a constant, painful, and embarrassing erection. In "Trade Show Model" a pretty young woman believes every man she sees on the street is a stalker. In "Cell," a high-school student addicted to his cell phone cannot stop text-messaging the "Friends" he so desperately wants. "Double Check" tells of a journalist afraid to leave home, for fear his house will burn down while he's gone. How does Dr. Irabu do it? "No, no, no. I don't do any of that fancy-pants sort of thing ... Some counselor listening to a patient's worries, then giving him wise words of encouragement. Perfectly useless." His approach seems to work.

In The Pool

Enhanced by 51 illustrations, this eye-opening work tells how Native Americans made fire, teepees, canoes, war bonnets, fishhooks, arrowheads, wampum, plus how they courted, treated women, bathed, cut their hair, danced, and much more.

Colloquial Spanish: The Complete Course for Beginners has been carefully developed by an experienced teacher to provide a step-by-step course to Spanish as it is written and spoken today. Combining a clear, practical and accessible style with a methodical and thorough treatment of the language, it equips learners with the essential skills needed to communicate confidently and effectively in Spanish in a broad range of situations. No prior knowledge of the language is required. Colloquial Spanish is exceptional: each unit presents a wealth of grammatical points that are reinforced with a wide range of exercises for regular practice. A full answer key, a grammar summary, bilingual glossaries and English translations of dialogues can be found at the back as well as useful vocabulary lists throughout. Key features include: A clear, user-friendly format designed to help learners progressively build up their speaking, listening, reading and writing skills Jargon-free, succinct and clearly structured explanations of grammar An extensive range of focused and dynamic supportive exercises Realistic and entertaining dialogues covering a broad variety of narrative situations Helpful cultural points explaining the customs and features of life in Spain An overview of the sounds of Spanish Balanced, comprehensive and rewarding. Colloquial Spanish is an indispensable resource both for independent learners and students taking courses in Spanish. Audio material to accompany the course is available to download free in MP3 format from www.routledge.com/cw/colloquials. Recorded by native speakers, the audio material features the dialogues and texts from the book and will help develop your listening and pronunciation skills.

Winner of the Akutagawa Prize, a sharp, photo-realistic novella of memory and thwarted hope 'He'd come to realise that it was a mistake to grind up his father's remains with such a thing. The mortar was lined with narrow grooves, a little too perfect for ashes to get stuck in.' Divorced and cut off from his family, Taro lives alone in one of the few occupied apartments in his block, a block that is to be torn down as soon as the remaining tenants leave. Since the death of his father, Taro keeps to himself, but is soon drawn into an unusual relationship with the woman upstairs, Nishi, as she passes on the strange tale of the sky-blue house next door. First discovered by Nishi in the little-known photo-book 'Spring Garden', the sky-blue house soon becomes a focus for both Nishi and Taro: of what is lost, of what has been destroyed, and of what hope may yet lie in the future for both of them, if only they can seize it. Tomoka Shibasaki was born in 1973 in Osaka and began writing fiction while still in high school. After graduating from university, she took an office job but continued writing, and was shortlisted for the Bungei Prize in 1998. Her first book, A Day on the Planet, was turned into a hit movie, and Spring Garden won the prestigious Akutagawa Prize in 2014.

Letters to My Sisters in Engineering

Essays and poems published as a tribute to Salvador Allende on the centenary of his death.

This book focuses on the statistical aspects of the analysis of degradation data. In recent years, degradation data analysis has come to play an increasingly important role in different disciplines such as reliability, public health sciences, and finance. For example, information on products' reliability can be obtained by analyzing degradation data. In addition, statistical modeling and inference techniques have been developed on the basis of different degradation measures. The book brings together experts engaged in statistical modeling and inference, presenting and discussing important recent advances in degradation data analysis and related applications. The topics covered are timely and have considerable potential to impact both statistics and reliability engineering.

A stylish, beautifully designed portrait of Berlin's bohemia In this striking hardcover volume, Romanian German fashion photographer Kristian Schuller (born 1970) presents his personal vision of the characters who epitomized Berlin's legendary nightlife--artists, actors, musicians and unclassifiable eccentrics. Whether in the studio or in the gardens of Berlin, these photographs foreground the multifaceted and fluid Berlin that is continuously reinventing itself. In one image shot on the green grass of a cemetery, a taut male model rests on his arms and upper body, appearing serene. Meanwhile his legs kick high above him, enveloped in poppy-red cloth that seems to grow out of him

Stories of Italy

The book Academic Social Responsibility - Sine Qua Non for Corporate Social Performance is our endeavor to disseminate the awareness of the significance of responsible (especially management) education not only for academic stakeholders, but for the whole society. It is an interesting combination of theories, studies, recognitions, and experiences gained by authors from different countries, institutions, who function in various institutional and cultural conditions. The book is divided into "introduction" and three parts: "Towards the Socially Responsible University", "Socially Responsible Education for Enterprise Development", "Human Voice in Responsible Management Education". The authors present fresh concepts for socially responsible university, their impact on real business performance as well as discussions on specific issues when implementing academic social responsibility in practice.

The signal processing task is a very critical issue in the majority of new technological inventions and challenges in a variety of applications in both science and engineering fields. Classical signal processing techniques have largely worked with mathematical models that are linear, local, stationary, and Gaussian. They have always favored closed-form tractability over real-world accuracy. These constraints were imposed by the lack of powerful computing tools. During the last few decades, signal processing theories, developments, and applications have matured rapidly and now include tools from many areas of mathematics, computer science, physics, and engineering. This book is targeted primarily toward both students and researchers who want to be exposed to a wide variety of signal processing techniques and algorithms. It includes 27 chapters that can be categorized into five different areas depending on the application at hand. These five categories are ordered to address image processing, speech processing, communication systems, time-series analysis, and educational packages respectively. The book has the advantage of providing a collection of applications that are

completely independent and self-contained; thus, the interested reader can choose any chapter and skip to another without losing continuity.

A History & Anthology

Introduction to International Economics

Our world is full of fear: fear of death, public speaking, flying, drowning, failure, rejection, snakes, needles, heights, darkness, enclosed spaces, and countless more. Satan uses fear to steal joy, kill opportunity, and destroy hope. God has an antidote: supernatural courage. Our favorite Bible heroes achieved results greater than their natural abilities because of bravery that came only from God. Followers of Jesus throughout history have had the Holy Spirit come upon them to achieve supernatural outcomes. In Supernatural Courage, Robinson uses biblical examples, interviews, and testimonies, along with Bible promises, prayers, and activations to impart spiritual bravery for strength to live a life beyond what's normal. These pages will help activate supernatural courage in your life so that you can hope—and then persevere through overwhelming challenges, stand against intimidation, believe for the impossible, forgive amid injustice, use spiritual gifts for spiritual victories, and finish the race God has given you.

Falling into Heaven is the true story of how a young skydivers life was changed when a fiery plane crash melted his face and mutilated his body. Miraculous healing and a spiritual adventure of a new life on earth followed this near death experience. Falling into Heaven is not just about a burned man getting better. It is about a dead man coming to life!

International Conference on Recent Advances in Signal Processing, Telecommunications & Computing (SigTelCom 2017) will be organised at Duy Tan University, Da Nang, Vietnam on January 9 11th 2017 SigTelCom 2017 will feature a comprehensive technical programme that spans most state of the art research in all fields of Signal Processing, Telecommunications and Computing Conference attendees will be hearing from world class speakers in keynotes and tutorials sessions, as well as presenting their own original technical works
