Works of science fiction and fantasy increasingly explore gender issues, feature women as central characters, and are written by women writers. This book examines women’s contributions to science fiction and fantasy across a range of media and genres, such as fiction, nonfiction, film, television, art, comics, graphic novels, and music. The first volume offers survey essays on major topics, such as sexual identities, fandom, women’s writing groups, and feminist spirituality; the second provides alphabetically arranged entries on more specific subjects, such as Hindu mythology, Toni Morrison, magical realism, and Margaret Atwood. Entries are written by expert contributors and cite works for further reading, and the set closes with a selected general bibliography. Students and general readers love science fiction and fantasy. And science fiction and fantasy works increasingly explore gender issues, feature women as central characters, and are written by women writers. Older works demonstrate attitudes toward women in times past, while more recent works grapple with contemporary social issues. This book helps students use science fiction and fantasy to understand the contributions of women writers, the representation of women in the media, and the experiences of women in society.

The first entry in the wildly popular Skylark series of science fiction novels, The Skylark of Space recounts the exploits of protagonist Dick Seaton as he competes against his nemesis, Marc “Blackie” DuQuesne, to be the first to build a technologically sophisticated spacecraft based on Seaton’s recent scientific discovery.

These 17 essays from the seventh annual J. Lloyd Eaton Conference examine the relationship between fantasy and science fiction. They propose that fantasy and science fiction are not isolated commercial literary forms, but instead are literary forms worthy of the recognition reserved for traditional literature. Discussion of genre identification ranges from the standard forms of literary criticism embodied in Aristotle’s mimesis and poesis to innovative and possibly controversial points of view such as a theory of humor, a philosophy of time, and a detailed analysis of Dr. Seuss’s Cat in the Hat. The essays provide not only a detailed study of literary elements but also the historical treatment of the material, its commercial use, and its relationship to similar literary forms such as the gothic tale and horror fiction. While few of the essayists agree with one another, they all contribute creative insights to the debate.

"We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history.Because of the absence of a historically grounded establishment of the Humanities, academic peripheries, usually accompanied by a weak civil society infrastructure, seem to offer the most fertile ground for rethinking the Humanities, their pedagogical practice, and their politics, as well as the greatest threats, such as the ongoing capitalization of research, and profitability as the norm of educational achievement. The sprawling presence of for-profit universities and in academic peripheries such as Albania and Kosovo is indicative of this problematic, as are consistent underfunding of universities and the relentless budget cuts in American and English, and to a lesser extent European, universities. Motivations for this ongoing attack on the university are often driven by a political system or a politics with an aggressive stance to critical thought."

All alone: an idiot boy, a runaway girl, a severely retarded baby, and twin girls with a vocabulary of two words between them. Yet once they are mysteriously drawn together this collection of misfits becomes something very, very different from the rest of humanity. This intensely written and moving novel is an extraordinary vision of humanity's next step. First published in 1952, More Than Human won the Retro Hugo Award for Best Novel.

Now available in paper, The Ivory Tower and Harry Potter is the first book-length analysis of J. K. Rowling's work from a broad range of perspectives within literature, folklore, psychology, sociology, and popular culture. A significant portion of the book explores the Harry Potter series' literary ancestors, including magic and fantasy works by Ursula K. LeGuin, Monica Furlong, Jill Murphy, and others, as well as previous works about the British boarding school experience. Other chapters explore the moral and ethical dimensions of Harry's world, including objections to the series raised within some religious circles. In her new epilogue, Lana A. Whited brings this volume up to date by covering Rowling's latest book, Harry Potter and the Order of the Phoenix.

Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His young country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

A look inside one of the greatest minds of the 20th century.

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. “Believe me,” the general said. “I ’ve taken part in many sieges but this,” he waved towards the castle walls, “is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war.” Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

The author examines the indigenous diatonic and chromatic modes used in Albanian urban music and classifies them under traditional headings and as part of a newly established grouping, here termed south-western Balkan modes. The core of the work is the analysis of Albanian urban lyric songs, seen as an artistic version of the traditional Albanian urban songs.

A depraved satanic cult called the Illuminati is waging a covert war against humanity. This is the key to mankind's tragic history and current predicament. For more than a thousand years, Cabalist money lenders have conspired to usurp power from church and aristocracy, according to a plan detailed in "The Protocols of the Elders of Zion." This plan does not represent Jews, but only a small cabal of bankers who organized in Masonic secret societies. They intermarried with prominent Gentiles and formed a vast occult and criminal underground. They are stealthily constructing a totalitarian world government. They involve nations in needless wars and enthrall the masses with porn, violence, trivia and toys. They attack our sources of identity and love -- God; family; country and race -- in order to stymie and dehumanize us. Sounds incredible, but after reading some of these 70 short essays, you'll nod in agreement. Their goal is to control your mind. If you know the truth, they can't.

Renowned psychoanalyst Erich Fromm examines the creator of psychoanalysis and his followers With his creation of psychoanalysis, Sigmund Freud redefined how people relate to themselves and to the larger world. In Sigmund Freud's Mission, Freud scholar and psychoanalyst Erich Fromm demonstrates how Freud's life experiences shaped his creation and practice of psychoanalysis. Fromm also revises parts of Freud's theories, especially Freud's libido theory. In his thorough and comprehensive analysis, Fromm looks deep into the personality of Freud, and the followers who tried to dogmatize Freud's theory rather than support the further stages of psychoanalysis.This ebook features an illustrated biography of Erich Fromm including rare images and never-before-seen documents from the author's estate.

The Metamorphosis is a novella by Franz Kafka, first published in 1915. It has been cited as one of the seminal works of fiction of the 20th century and is studied in colleges and universities across the Western world. The story begins with a traveling salesman, Gregor Samsa, waking to find himself transformed (metamorphosed) into a large, monstrous insect-like creature. The cause of Samsa's transformation is never revealed, and Kafka himself never gave an explanation. The rest of Kafka's novella deals with Gregor's attempts to adjust to his new condition as he deals with being burdensome to his parents and sister, who are repulsed by the horrible, verminous creature Gregor has become.

This second edition includes 37 new pages in a new Foreword and Afterword where Logan reports on a number of new developments in his research into the origin and evolution of language. The first edition of the Sixth Language was a recipient of the Susanne K. Langer Prize of the Media Ecology Association for Outstanding Scholarship in the Ecology of Symbolic Form.

The author suggests that in this era following the postmodern we have entered a new, monist epoch in which aesthetically mediated belief replaces endless irony as the dominant force in culture. The book documents the "new monism" through an examination of popular films and novels such as American beauty, Life of Pi, and Middlesex as well as in the work of major architects and artists such as Sir Norman Foster, Andreas Gursky, and Vanessa Beecroft. --book cover.

Armageddon 2419 A.D. features the introduction of Anthony 'Buck' Rogers, the famous sci-fi adventure hero of early comics, radio, and tv shows. Originally published in Amazing Stories in 1928, this novella was later combined with Nowlan's sequel, The Airlords of Han, and re-published under this same title in the 1960s. In Armageddon 2419 A.D., we follow Buck Rogers and his mysterious transportation to far-future America.

The land has been conquered by the evil Han Empire centuries ago, and the local Americans, scattered into competing gangs, are now starting a rebellion. Buck meets the leaders of one of the gangs and is swept up in the events.

Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and the effects of language use on society. Sociolinguistics differs from sociology of language in that the focus of sociolinguistics is the effect of the society on the language, while the latter's focus is on the language's effect on the society. Sociolinguistics overlaps to a considerable degree with pragmatics. It is historically closely related to linguistic anthropology and the distinction between the two fields has even been questioned recently. It also studies how language varieties differ between groups separated by certain social variables, e.g., ethnicity, religion, status, gender, level of education, age, etc., and how creation and adherence to these rules is used to categorize individuals in social or socioeconomic classes. As the usage of a language varies from place to place, language usage also varies among social classes, and it is these sociolects that sociolinguistics studies. The social aspects of language were in the modern sense first studied by Indian and Japanese linguists in the 1930s, and also by Gauchat in Switzerland in the early 1900s, but none received much attention in the West until much later. The study of the social motivation of language change, on the other hand, has its foundation in the wave model of the late 19th century. The first attested use of the term sociolinguistics was by Thomas Callan Hodson in the title of a 1939 paper. Sociolinguistics in the West first appeared in the 1960s and was pioneered by linguists such as William Labov in the US and Basil Bernstein in the UK. For example, a sociolinguist might determine through study of social attitudes that a particular vernacular would not be considered appropriate language use in a business or professional setting. Sociolinguists might also study the grammar, phonetics, vocabulary, and other aspects of this sociolect much as dialectologists would study the same for a regional dialect. The study of language variation is concerned with social constraints determining language in its contextual environment. Code-switching is the term given to the use of different varieties of language in different social situations. William Labov is often regarded as the founder of the study of sociolinguistics. He is especially noted for introducing the quantitative study of language variation and change, making the sociology of language into a scientific discipline.

Michael Pupin's was a genuinely American story, the lifelong journey of a boy from rural Serbia, from a town so tiny it appeared on no maps, who became one of the greatest scientists of the early 20th century, changing the lives of people the world over with his technological innovations-he invented the therapeutic X-ray and made telephone communications practical and inexpensive-and helping to invent the modern world we know today. First published in 1922, Pupin's autobiography won the Pulitzer Prize in 1924, but Pupin's insightful and incisive words are their own greatest recommendation. American physicist and writer MICHAEL IDVORSKY PUPIN (1858-1935) was born in Serbia and emigrated to the United States as a teenager. As a professor and researcher at Columbia University, he invented sonar and made important discoveries in the fields of X-ray physics and telecommunications.

The prolific and famous science and science-fiction writer continues the tale of his life, proceeding from the years immediately following his early successes and continuing through the writing of his 200th book

The inner structure of the Earth, in the form as it's still expressed today in the standard books, is a complete reflection of the archaic method of thinking. The continual change in the state of matter by pressure and temperature rising towards the Earth center, it is not an essential change in the character of chemical elements to create the core, shell-like building of the mantle, lithosphere and the known processes. This is also a firm argument why the necessity appears to place a sort of ultra dense matter as the source of permanent transformation in the core's central region, to create different particles and sub particles in bonds of atoms or free in radiation. Lets suppose for a moment that we would remove the silicate coverings. What would be the outcome? The processes of transformation and growth would continue in the core. The "small earth" would begin to recreate the silicate coat progressively with time, and we would "see" the imitation of crust formation, as well as the differentiation, the "bone of discord" between the fixists, mobilists and supporters of the expansion and their "quarre!" would end forever.Such solution on the geologic development of Earth crust must radically change the method of thinking about the origin of the solar system.

From the moment that Gjorgj's brother is killed by a neighbour, his own life is forfeit: for the code of Kanun requires Gjorgj to kill his brother's murderer and then in turn be hunted down. After shooting his brother's killer, young Gjorgj is entitled to thirty days' grace - not enough to see out the month of April. Then a visiting honeymoon couple cross the path of the fugitive. The bride's heart goes out to Gjorgj, and even these 'civilised' strangers from the city risk becoming embroiled in the fatal mechanism of vendetta.

French political libertarian and economist CLAUDE FRDRIC BASTIAT (1801-1850) was one of the most eloquent champions of the concept that property rights and individual freedoms flowed from natural law. Here, in this 1850 classic, a powerful refutation of Karl Marx's Communist Manifesto, published two years earlier, Bastiat discusses: - what is law? - why socialism constitutes legal plunder - the proper function of the law - the law and morality - "the vicious circle of socialism" - the basis for stable government - and more.

H. G. Wells wasn't the only nineteenth-century writer to dream of a time machine. The Spanish playwright Enrique Gaspar published El anacronópete—"He who flies against time"—eight years before Wells's influential work appeared. The novel begins at the 1878 Paris Exposition, where Dr. Don Sindulfo unveils his new invention—which looks like a giant sailing vessel. Soon the doctor embarks on a voyage back in time, accompanied by a motley crew of French prostitutes and Spanish soldiers. The purpose of his expedition is to track down the imprisoned wife of a third-century Chinese emperor, believed to possess the secret to immortality. A classic tale of obsession, high adventure, and star-crossed love, The Time Ship includes intricately drawn illustrations from the original 1887 edition, and a critical introduction that argues persuasively for The Time Ship's historical importance to science fiction and world literature.

This work, by the greatest living authority on medieval palaeography, offers the most comprehensive and up-to-date account in any language of the history of Latin script. It also contains a detailed account of the role of the book in cultural history from antiquity to the Renaissance, which outlines the history of book illumination. Designed as a textbook, it contains a full and

updated bibliography. Because the volume sets the development of Latin script in its cultural context, it also provides an unrivalled introduction to the nature of medieval Latin culture. It will be used extensively in the teaching of latin palaeography, and is unlikely to be superseded.

The concept of disparity has long been a topic of obsession and argument for philosophers but Slavoj Žižek would argue that what disparity and negativity could mean, might mean and should mean for us and our lives has never been more hotly debated. Disparities explores contemporary 'negative' philosophies from Catherine Malabou's plasticity, Julia Kristeva's abjection and Robert Pippin's self-negative theology, new realisms and post-humanism and draws a radical line under them. Instead of establishing a dialogue with these other ideas of disparity, Slavoj Žižek wants to establish a definite departure, a totally different idea of disparity based on an imaginative dialectical materialism. This notion of rupturing what has gone before is based on a provocative reading of how philosophers see each other. Slavoj Žižek borrows Alain Badiou's notion that a true idea is the one that divides. Radically departing from previous formulations of negativity and disparity, Žižek employs a new kind of negativity: namely positing that when a philosopher deals with another philosopher, his or her stance is never one of dialogue, but one of division, of drawing a line that separates truth from falsity.
