The threatened species categories used in Red Data Books and Red Lists have been in place for almost 30 years. The IUCN Red List Categories and Criteria provide an easily and widely understood system for classifying species at high risk of global extinction, so as to focus attention on conservation measures designed to protect them. This latest version of the classification system was adopted by the IUCN Council in February 2001 and reflects comments from the IUCN and SSC memberships and the final meeting of the Criteria Review Working Group.

The twentieth century left humanity in despair. Two World Wars caused the death of more than seventy million people. The Holocaust of the Jews and genocide against other groups left us the images of factories of death and names of unimagined cruelty. unlimited ability to inflict suffering and death. Hell appeared as a human-made reality. Two educators, the Polish-Jewish educator and children's rights advocate Janusz Korczak (murdered in Treblinka in 1942), and Yitzhak Katzenelson, a Bible teacher, dramatist (murdered in Auschwitz in 1944), shared the same historical reality but responded in very different ways. A comparative study of their legacies leads explores questions of identity, leadership, and the educators' role in the face of totalitarianism, terror and to teachers in all disciplines who deal with their identity as educators, and to historians and civic rights activists in any society, culture or nationality.

This volume in the American Antiquarian Cookbook Collection, published in New York in 1830, is a new version of a famous recipe collection previously published in London by William Kitchiner, adapted specifically for use by the American public. Dr. William Kitchiner's The Cook's Oracle was an enormous best-seller upon publication in London in 1824, and the author developed an international reputation based on his eccentricities and the extravagance of his writing. Unlike most food writers of the day, he cooked the food himself, washed up afterward, and performed all the household tasks he wrote about. He traveled around with a "portable cabinet of taste," a folding box containing all of his unique mustards and sauces, and he was well known for his invention of the popular Wow-Wow sauce. No wonder that an anonymous American "medical gentleman" (as asserted on the title page of this edition) chose to adapt Kitchiner's English cookbook for American kitchens. In addition to over 600 recipes that run the full gamut of nineteenth century cookery, the book includes information about etiquette, dinner invitations, weights and measures (one of the first attempts to standardize cookbook measurements), carving, marketing advice, and techniques of boiling, baking, roasting, frying, and broiling. This edition of The Cook's Oracle was reproduced by permission from the volume in the collection of the American Antiquarian Society, Worcester, Massachusetts. Founded in 1812 by Isaiah Thomas, a Revolutionary War patriot and successful printer and publisher, the society is a research library documenting the lives of Americans from the colonial era through 1876. The society collects, preserves, and makes available as complete a record as possible of the printed materials from the early American experience. The cookbook collection comprises approximately 1,100 volumes.

***Researchers involved in the cytogenetics and molecular genetics of human tumors will welcome this comprehensive overview of the type of aberrations that chromosome 12 presents in human solid tumors. The authors study the implications for a cytogenetic subtyping of the tumors involved and strategies for identifying the molecular changes which underlie the karyotypic alterations. The aberrations of chromosome 12 which the book deals with are very frequent chromosomal alterations in human tumors occurring in frequent benign mesenchymal tumors, such as uterine leiomyomas and lipomas, and in tumors of epithelial origin, such as pleomorphic adenomas of the salivary glands.***
